Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Issue. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Any of the following risks, as well as the other risks and uncertainties discussed in this Draft Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- Some events may have material impact quantitatively;
- Some events may have material impact qualitatively instead of quantitatively.
- Some events may not be material individually but may be found material collectively.
- Some events may not be material at present but may be having material impact in future.

BUSINESS RELATED RISKS

1. ***Our Company’s business highly depends on the brands recognition and reputation of the products it offers to sell and their inability to maintain or enhance brands image that we sell could have a material adverse effect on our business, financial condition and results of operations.***

Our Company is engaged in multi-brand retail selling of Smart Phones and allied accessories like Apple, Samsung, Realme, Xiaomi, Oppo, Vivo, Motorola, Google Pixel, Infinix etc. We are also engaged in multi-brand retail selling of consumer durable electronics goods such as Smart TVs, Air Conditioners, Refrigerators, Coolers, and more, from brands like Sony, LG, Panasonic, Samsung, Godrej and others.

Though we are not required to promote the products of these well-known brands, we compete on price, quality services, dedication and commitment towards customers, in our industry. Our financial performance is influenced by the success of above brands, which, in turn, depends on factors such as product design & features, the distinct character and the quality of

the products, after sale services, communication activities, public relations and marketing etc. The consumers that use and recommend the branded products have come to expect a high level of quality from these products and on the failure on the part of the brands/companies to deliver on that expectation could adversely impact our business and reputation.

2. *We are subject to quality requirements and any product defect issues or failure by us or our suppliers to comply with quality standards may lead to the cancellation of existing and future orders, recalls and exposure to potential product liability claims.*

We face an inherent business risk of exposure to product defects and subsequent liability claims if the use of any of our products results in personal injury or property damage. We may not be able to meet regulatory relevant quality standards in India, or the quality standards imposed by our customers which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If any of our products do not meet regulatory standards or are defective, we may be, inter alia, (i) responsible for damages relating to any defective products, (ii) required to replace, recall or redesign such products or (iii) incur significant costs to defend any such claims.

The failure by us or any of our suppliers to achieve or maintain compliance with regulatory requirements or quality standards may disrupt our ability to supply products sufficient to meet demand until compliance is achieved or, until a new supplier has been identified and evaluated. There is no assurance that our products will always meet the satisfaction of our customer's quality standards. Although we have not faced any failure to comply with applicable regulations in the past in the past, we cannot assure in future if our failure to comply with applicable regulations could cause adverse consequences to be imposed on us, including fines, injunctions, civil penalties, the refusal of regulatory authorities to grant approvals or renewal, delays, suspensions or withdrawal of approvals, license revocation, seizures or recalls of products, operating restrictions and criminal prosecutions, all of which could harm our business. There can be no assurance that if we need to engage new suppliers to satisfy our business requirement, we will be able locate new suppliers in compliance with regulatory requirements in a timely manner, or at all. Failure to do so could lead to the cancellation of existing and future orders and have a material adverse effect on our business and revenue.

3. *Our Company is dependent on few numbers of suppliers for purchase of products. Loss of any of this large Suppliers may affect our business operations.*

Our Top ten Suppliers contributes to 58.14 % (Rs. 15,715.91 Lakhs), 62.48 % (Rs. 27,324.74 Lakhs), 72.89 % (Rs. 23,649.63 Lakhs) and 76.18 % (Rs. 15,790.98 Lakhs) of our total Purchases for the period ended September 30, 2024 and for the year ended March 31, 2024, March 31, 2023 and March 31, 2022 respectively. The goods are procured depending on the availability and favourable terms. We cannot assure that we will be able to get the same quantum of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. Our industry operates on established distribution network, we believe that we will not face substantial challenges in maintaining our business relationship with our suppliers.

4. *Our business is a high volume-low margin business.*

We may need to generate higher volume in terms of quantity to increase our profitability. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability from the said business vertical and hence adversely affect our operating results, debt service capabilities and financial conditions. Due to the nature of our business, we may not be able to charge higher margins on our products. Hence, our business is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to procurement of traded goods, timely sales, and continuous cost control of non-core activities. For further details regarding the discussions and explanations for our past results, please refer to the chapter titled “*Management's Discussions and Analysis of Financial Position and Results of Operations*” beginning on Page No. 225 of this Draft Prospectus.

5. *We may be subject to risks associated with product warranty for the brand products.*

We are subject to risks and costs associated with product warranties on account of supply of defective or inferior quality products within the warranty periods stipulated for such products. Any defects in the products may result in invocation of such warranties. The defects in such products or any product liability claim against us could generate adverse publicity, leading to a loss of reputation, customers and/or increase our costs, thereby adversely affecting our reputation, business, results of operations, financial condition and cash flows.

6. *We are yet to apply for the registrations under Shops and Establishments Act of respective states and to obtain approval in respect of same. In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We operate our business through above 200 stores in various cities in the states of Gujarat and Maharashtra. Out of these the Company owns and / or operates around 25 retail stores and / or experience centers. However as one of the basic requirements of opening and operating retail stores in India, a store owner / operator is required to obtain registration under the Shops and Establishments Act (the Act) of respective states. However, our company is yet to apply for and obtain registration under the Act for all its stores, including its registered office and that there can be no assurance that the relevant authority will issue such approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Approvals” on page 243 of this Draft Prospectus.

7. *We may not be able to accurately manage our inventory, this may adversely affect our goodwill and business, financial condition and results of operations.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of our products and local transportation. Should our supply of our products be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In the past we have not experienced any instances of disruptions to the delivery of product to our customer occurred for reasons such as poor handling, transportation bottlenecks which could have lead to delayed or lost deliveries or damaged products and disrupt supply of these products, but there is not guarantee that these instances will not happen in future to improve our line capability, we try to stock our inventory. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we overstock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

8. *Our Company's failure to maintain the quality standards of the products or keep pace with the technological developments could adversely impact our business, results of operations and financial condition.*

Our products depend on customer's expectations and choice or demand of the customer. Any failure to maintain the quality standards may affect our business. Although we have put in place quality control procedures, we cannot assure that our products will always be able to satisfy our customers' quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations. Also, rapid change in our customers' expectation on account of changes in technology or introduction of new products or for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition. Our failure to anticipate or to respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and financial results.

9. *We generate our major portion of sales from our operations in certain domestic market. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.*

We have presence in Two (2) states namely Maharashtra and Gujarat. These sales relates to for the period ended September 30, 2024 and for the financial years ending March 31, 2024, 2023, and 2022.

Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in such regions to expand our operations in other parts of India, due to factors such as competition, culture, regulatory regimes, business

practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside such markets may adversely affect our business prospects, financial conditions and results of operations. While our management has faith that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance. Our operations are also impacted by various risks inherent in international sales and operations, including:

- currency exchange rate fluctuations;
- regional economic or political uncertainty;
- currency exchange controls;
- differing accounting standards and interpretations;
- differing domestic and foreign customs, tariffs and taxes;
- current and changing regulatory environments;
- coordinating and interacting with local representatives and counterparties to fully understand local business and regulatory requirements; and

To the extent that we are unable to effectively manage our global operations and risks such as the above (in particular, as we implement our strategy to enter into new markets where we do not have local knowledge resources), we may be unable to grow or maintain our sales and profitability, or we may be subject to additional unanticipated costs or legal or regulatory action. As a consequence, our business, financial condition, results of operations and cash flows may be adversely affected.

10. *The Restated Financial Statements have been provided by Peer Reviewed Chartered Accountants who is not Statutory Auditor of our Company.*

The Restated Financial Information of our Company as disclosed in section titled “*Restated Financial Information*” beginning on Page no. 166 of this Draft Prospectus for the period ended September 30, 2024 and for the Financial Year ended on March 31, 2024, March 31, 2023 and March 31, 2022 is furnished by Peer Reviewed Chartered Accountants i.e., M/s Mundra & Co., Chartered Accountants (having Peer Review Registration No. 014184) who is not the Statutory Auditor of our Company. While our Statutory Auditor possesses a valid peer-reviewed certificate, for the purpose of maintaining the independence, the task of providing the restated financial statements was entrusted to the aforementioned peer-reviewed chartered accountant.

11. *Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

We have experienced negative cash flows in the past which have been set out below as per the restated financial statements:

<i>(Rs. in Lakhs)</i>				
Particulars	September 30, 2024	March 31, 2024	March 31, 2023	March 31, 2022
Net cash generated from/ (used in) operating activities	(637.83)	(677.06)	(466.22)	(482.03)
Net cash generated from/ (used in) investing activities	656.58	540.69	392.38	346.30
Net cash generated from/ (used in) financing activities	80.20	131.12	198.78	90.69

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further

details, see section titled “*Restated Financial Statements*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 166 and 225 respectively of this Draft Prospectus.

12. *Our business is subject to seasonal and cyclical volatility due to which there may be fluctuation in the sales of products which could lead to higher closing inventory position, which may adversely affect our business.*

We offer products at our stores that our consumers require, and our success is dependent on our ability to meet our consumers’ requirements. The retail consumer spending is heavily dependent on the economy and, to a large extent, on various occasions such as festivals like Diwali, Navratri, Raksha Bandhan etc., seasonal changes, weddings, etc. Any year also has phases of lean sales. We have historically experienced seasonal fluctuation in our sales, with higher sales volumes associated with the festive period in the third quarter of each Financial Year. We have also seen higher sales volume of products in a certain season. These seasonal variations in consumer demand subject our sector to a considerable degree of volatility. As a result, our revenue and profits may vary during different quarters of the financial year and certain periods may not be indicative of our financial position for a full financial year or future quarters or periods and may be below market expectations. Further, any unanticipated decrease in demand for our products during our peak selling season could result into higher closing inventory position, which may lead to sale and liquidation of inventory getting delayed against the trajectory under normal course of business, which could adversely affect our financial position and business operations. Fluctuations in the electronic retail market affect the inventory owned by electronic retailers, since merchandise usually must be manufactured in advance of the season and frequently before the trends are evidenced by customer purchases. In addition, the cyclical nature of the retail electronics business requires us to carry a significant amount of inventory, especially prior to peak selling seasons when we build up our inventory levels.

13. *Competition from online retailers who can offer products at competitive prices and are also able to offer wide range of products may adversely affect our business and our financial condition, results of operations and cash flows.*

We are witnessing a growth in the competition from online retailers who have been able to offer products at competitive prices. Due to various factors, including efficient logistics management and strategic tie-ups, online retailers are not only able to offer more discounts, but also a wider range of consumer durables. Due to the said reasons, online retailing has been witnessing noticeable growth in the recent years and increased competition from them could reduce footfalls and sales in our stores. There is no assurance that we would be able to effectively offset the advantages that our competitors in the online business may have and grow our business in a similar fashion like our online competitors, or that the competition we face would not drain our financial or other resources. If we are unable to adequately address such competitive pressures, our business, financial condition, results of operations and cash flows may be adversely affected.

14. *We have certain outstanding litigation against us, an adverse outcome of which may adversely affect our business, reputation and results of operations.*

In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

16. *Our Company has taken offices on lease basis and in past some of the lease agreements were not renewed/not executed/inadequately executed, because of which operations may be adversely affected.*

As on March 20, 2025 our Company operates from 206 retail outlets, for sale of electric gadgets and allied accessories. All the retail outlets are taken on lease rental basis. Under the terms of lease agreement, it is required to be renewed at a regular interval, varying from store to store, from the date of execution. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business prospects, results of operations and financial condition. 18. *The orders placed by customers may be delayed, modified or cancelled, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control caused by matters such as acts of God, strikes, civil commotion, riots, war, revolution, acts of governments, etc. or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

19. *Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company have entered into certain related party transactions with our Promoters, members of the promoter group, Directors in the past which are in compliance with applicable provisions of Companies Act, 2013 and all other applicable laws. While our Company believes that all such transactions have been conducted on arm's length basis, there can be no assurance that it could not have been achieved on more favourable terms and that such transactions have not been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest. In terms of the Companies Act, 2013 and SEBI LODR Regulations, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain party transactions and our undertakes that such related party transactions shall not be done against the interests of the Company and its shareholders as prescribed in the SEBI LODR Regulations. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

- 20. *There are certain discrepancies/errors/delay filings noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate or any other law could impact the financial position of the Company to that extent.***

Our company has not complied with certain statutory provisions in the past including but not limited to the details as mentioned in this risk factor. There has been delay in filing of Annual Returns for 2013-14, 2018-19, 2020-21 and Financial Statements for the F.Y. 2013-14, 2014-15, 2016-17, 2018-19. Our company has not filed Form ADT-03 for resignation of M/s Vijay Papat & Associates. While no legal proceedings or regulatory action has been initiated against our Company in relation to such non-compliance or instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC as of the date of this Draft Prospectus, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by concerned regulatory authorities in this respect. Although we do not rely on limited operators for transportation of our products, transportation strikes may have an adverse effect on supplies and deliveries. In addition, products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. 24. *We face significant competition in our business which could adversely affect our operations and our profitability.*

We operate in a competitive market. Many Indian and foreign players are operating in the same market as ours. There are several strategies adopted by our competitors to increase their market share through pricing, service, new product introductions and distribution reach among others. This increased competition by both traditional and new players may affect our margins. In order to protect our existing market share or capture market share, we may be required to increase expenditure for increasing our reach and to introduce and establish new products. Due to inherent risks in the marketplace associated with new product introductions, including uncertainties about user industry's response, increased expenditure may not prove successful in maintaining or enhancing our market share and could result in lower profitability. For further details, see the section titled "Our Business – Competition" on page 113 this Draft Prospectus.

25. *Our business may expose us to potential product liability claims, which could adversely affect our results operation, goodwill and the marketability of our products.*

While we are not directly exposed to potential product liability claims given the nature of our business, we may be exposed to certain risks associated with the purchase orders issued by us, and the severity and timing of such claims are unpredictable. Further, we have not faced instances of any claims from our customers in the last three financial years. We face the risk of loss resulting from, and the adverse publicity associated with, lawsuits, whether or not such claims are valid. We may also be subject to claims resulting from defects or negligence in storage or handling which may lead to the deterioration of our products. Such claims, regardless of their merits or the ultimate success of the defence against them, are expensive. Even unsuccessful claims would likely require us to incur substantial amounts on litigation and require our management's time and focus. Any loss of our reputation or brand image may lead to a loss of existing business contracts and affect our ability to enter into additional business contracts in the future, which may have an adverse effect on our business, results of operations, financial condition and cash flows. Accordingly, such claims, may adversely affect our results of operation, goodwill and the marketability of our products.

26. *Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.*

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled "Financial Indebtedness" beginning on page 223 of this Draft Prospectus.

27. *Our loan agreements with various lenders have several restrictive covenants and certain unconditional rights in favour of the lenders, which could influence our ability to expand, in turn affecting our business and results of operations.*

We have entered into agreements for short term and long-term borrowings with certain lenders. The total amounts outstanding and payable by us as secured loans and unsecured loans were Rs. 1,918.16 lakhs, Rs. 1,747.11 lakhs, Rs. 1,425.37 lakhs and Rs. 1,115.17 lakhs as on September 30, 2024, March 31, 2024, 2023 and 2022 as per the restated financial statements. The credit facilities availed by our Company are secured by way of mortgage of fixed assets, hypothecation of assets. There may have been instances of delay in payment of our dues in time to the banks, in case we are not able to pay our dues in time, the same may amount to a default under the loan documentation and all the penal and termination provisions therein would get triggered and the loans granted to the Company may be recalled with penal interest. This could severely affect our operations and financial condition. In addition to the above, our loan documentation includes certain conditions and covenants that require us to obtain consents from the aforesaid banks prior to carrying out certain activities like entering into any amalgamation, demerger, merger and corporate reconstruction, changing our management and operating structure, making any fresh borrowings or creating fresh charges on assets, etc. Any failure to comply with any condition or covenant under our financing agreements that is not waived by the lending banks or is not otherwise cured by us, may lead to a termination of our credit facilities, acceleration of all amounts due under the said credit facility, which may adversely affect our ability to conduct our business and operations or implement our business plans. Further, the said credit facilities can be renewed/enhanced/cancelled/suspended/reduced and the terms and conditions of the same can be altered by the lending banks, at their discretion. In the event, the lending banks refuse to renew / enhance the credit facilities and / or cancels / suspends / reduces the said credit facilities and/or alters the terms and conditions to the derogation of our Company, our existing operations as well as our future business prospects and financial condition may be severely affected. As on the date of this Draft Prospectus, we have received NOC from banker.

28. *Unsecured loans taken by our Company can be recalled by the lenders at any time.*

Our Company has unsecured loans amounting to Rs. 575.15 lakhs, Rs. 517.99 lakhs, Rs. 216.23 lakhs and Rs. 253.44 lakhs for the period ended September 30, 2024 and for the financial year ended March 31, 2024, 2023 and 2022 as per the restated financial statements from banks that are repayable on demand to the relevant lender. These loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. In such cases, our Company may be required to repay the entirety of the unsecured loans together with accrued interest. Our Company may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to it. Failure to repay unsecured loans in a timely manner may have a material adverse effect on our business, cash flows and financial condition. For further details of unsecured loans of our Company, please refer the chapter titled “*Restated Financial Statements*” beginning on page 166 of this Draft Prospectus.

29. *We have taken guarantees from our directors in relation to debt facilities provided to us.*

We have taken guarantees from our directors in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Financial Indebtedness*” beginning on page 223 of this Draft Prospectus.

30. *We may not be fully insured for all losses we may incur.*

Although we attempt to limit and mitigate our liability for damages arising from negligent acts, errors or omissions through contractual provisions, limitations of liability set forth in our contracts may not be enforceable in all instances or may not otherwise protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients, are generally not limited under those agreements. We have taken insurance policies as mentioned in the section titled, “*Insurance*” under the chapter titled, “*Our Business*” on page 113 of the Draft Prospectus. Although we have adequate insurance coverage but that coverage may not continue to be available on reasonable terms or to be available in sufficient amounts to cover one or more large claims, and our insurers may disclaim coverage as to any future claim. Insurance coverage may be an inadequate remedy where the loss suffered is not easily quantifiable, for example, in the event of severe damage to our reputation. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

31. *Failure or disruption of our IT, automation systems may adversely affect our business, financial condition and results of operations.*

We have implemented various information technology (“IT”) systems to cover key areas of our operations, procurement, dispatch and accounting. These systems are potentially vulnerable to damage or interruption from a variety of sources,

which could result from (among other causes) cyber-attacks on or failures of such infrastructure or compromises to its physical security, as well as from damaging weather or other acts of nature. A significant or large-scale malfunction or interruption of one or more of our IT systems or automation systems could adversely affect our ability to keep our operations running efficiently and affect product availability, particularly in the country, region or functional area in which the malfunction occurs, and wider or sustained disruption to our business cannot be excluded. In addition, it is possible that a malfunction of our data system security measures could enable unauthorized persons to access sensitive business data, including information relating to our intellectual property or business strategy or those of our customers. While we have not faced significant disruptions in past, any such malfunction or disruptions in future could cause economic losses for which we could be held liable or cause damage to our reputation. Any of these developments, alone or in combination, could have a material adverse effect on our business, financial condition and results of operations. Further, unavailability of, or failure to retain, well trained employees capable of constantly servicing our IT, automation systems may lead to inefficiency or disruption of our operations and thereby adversely affecting our business, financial condition and results of operations.

32. *Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 165 of this Draft Prospectus.

33. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial Personnel and Senior Management as well as our ability to attract and retain personnel with technical expertise. Any loss of our Promoter, Directors, Key Managerial Personnel, Senior Management or our ability to attract and retain them and other personnel with technical expertise could adversely affect our business, financial condition and results of operations.*

Our success largely depends upon the knowledge and experience of our Promoters, Directors, Key Managerial Personnel and Senior Management as well as our ability to attract and retain skilled personnel. Any loss of our Promoters, Directors, Key Managerial Personnel and Senior Management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial condition and results of operations. We depend on the management skills and guidance of our Promoters for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business, financial condition and results of operations could be adversely affected.

There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further information, see “Our Management” on page 147 of this Draft Prospectus.

34. *Our failure to manage growth effectively may adversely impact our business, prospects, financial condition and results of operations.*

For the period ended September 30, 2024 and for the financial year ended March 31, 2024, 2023 and 2022, our revenue from operations were Rs. 27,044.16 lakhs, Rs. 45,148.40 lakhs, Rs. 33,330.66 lakhs and Rs. 21,211.05 lakhs, respectively and our restated profit after tax was Rs. 381.81 lakhs, Rs. 234.94 lakhs, Rs. 18.24 lakhs and Rs. 24.74 lakhs, respectively. Our ability to sustain growth depends primarily upon our ability to manage key issues such as our ability to sustain existing relationships with our clients, ability to compete effectively, ability to scaling up our operations, ability to bring new products to the market in a timely manner and in a cost effective way, adhering to high quality and execution standards,

our ability to expand our presence in India as well as globally, the effectiveness of our marketing initiatives, selecting and retaining skilled personnel. Sustained growth also puts pressure on our ability to effectively manage and control historical and emerging risks. Our inability to effectively manage any of these issues may adversely affect our business growth and, as a result, impact our businesses, financial condition, results of operations and prospects.

35. *Pricing pressure from customers may affect our gross margins and ability to increase our prices, which in turn may adversely affect our revenue from operations, profits and cash flows.*

Consumer demand for our products depends in part on the pricing of our products. We differentiate certain of our products based on their economical pricing coupled with their quality. Our pricing depends on various factors, from time to time. We cannot assure you that we will be able to maintain our margins while offering discounts, or that our discounts will continue to attract consumer demand for our products. The pricing of our products is agreed between us and customers, and changes to such prices require mutual agreement. The pricing is determined by our cost of products and other costs and other factors. Our cost of products may increase in the future due to various factors, including factors beyond our control caused by matters such as acts of God, strikes, civil commotion, riots, war, revolution, acts of governments, lack of adequate, etc. We cannot assure that, in the future, we would be able to pass increased costs on to our customers. Any inability to do so may adversely affect our business and results of operation.

36. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategies could have an adverse effect on our business, results of operations and financial condition. The success of our business will depend greatly on our ability to effectively implement our business and growth strategies.*

Our growth strategies require us to develop and strengthen relationships with existing customers for our business who may drive high volume orders on an ongoing basis. To remain competitive, we seek to increase our business from existing customers and by adding new customers, as well as expanding into new geographical markets. Our success in implementing our growth strategies may be affected by:

- our ability to maintain the quality of our products;
- our ability to increase our geographic international presence;
- the general condition of the global economy (particularly of India and the other markets that we currently or may operate in);
- our ability to compete effectively with existing and future competitors,
- changes in the Indian or international regulatory environment applicable to us.

Many of these factors are beyond our control and there is no assurance that we will succeed in implementing our strategies. While we have successfully executed our business strategies in the past, there can be no assurance that we will be able to execute our strategies on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could adversely impact our results of operations. We expect our growth strategies to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and growth strategies could have a material adverse effect on our business, financial condition and profitability.

37. *Any inability to address changing industry standards and consumer trends may adversely affect our business, results of operations and financial condition.*

The future success of our business will depend in part on our ability to respond to technological advances, consumer preferences and emerging industry standards and practices in a cost-effective and timely manner. The development and implementation of such new technology entails technical and business risks. While we continue to invest in adding new products in the product basket, we are subject to general risks associated with introduction and implementation of new products including the lack of market acceptance and delays in product development. There can be no assurance that we will be able to successfully procure new products or that such new products will receive market acceptance or address changing consumer trends or emerging industry standards. Any rapid change in the expectations of our customers, in our business on account of changes in technology or introduction of new alternate products could adversely affect our business, results of operations and financial condition.

38. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since, the Proceeds from Issue is less than Rs. 5,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, as per the Section 177 of the Companies Act, 2013 and applicable laws, the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

39. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” beginning on page 75 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of the Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use Net Proceeds towards Repayment of loan and General corporate purposes. We intend to deploy the Net Proceeds in financial year 2025-26 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled “Objects of the Issue” beginning on page 75 of this Draft Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “Objects of the Issue” beginning on page 75 of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations and amendments thereto, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoter and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

40. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the Issue, Our Promoters and Promoter Group will collectively own 73.49 % of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AOA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

41. *We might infringe upon the intellectual property rights of others and any misappropriation of our intellectual property could harm our competitive position.*

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty as to whether we are infringing on any existing third-party intellectual property rights, which may require us to alter our technologies, obtain licenses or cease some of our operations. We may also be susceptible to claims from third parties asserting infringement and other related claims. If such claims are raised, those claims could: (a) adversely affect our relationships with current or future customers; (b) result in costly litigation; (c) cause product shipment delays or stoppages; (d) divert management’s attention and resources; (e) subject us to significant liabilities; (f) require us to enter into potentially expensive royalty or licensing agreements and (g) require us to cease certain activities. While in the last three financial years we have not been involved in litigation or incurred litigation expenses in connection with our trademarks or intellectual property rights, in the case of an infringement claim made by a third party, we may be required to defend such claims at our own cost and liability and may need to indemnify and hold harmless our customers. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. In addition, we may decide to settle a claim or action against us, which settlement could be costly. We may also be liable for any past infringement that we are not aware of. Any of the foregoing could adversely affect our business, financial condition and results of operations.

42. *Employee misconduct including misuse of confidential data and failure to maintain confidentiality of information could harm us and is difficult to detect and deter.*

We could be harmed by employee misconduct if our customers confidential information is misappropriated by us or our employees, our customers may consider us liable for that act and seek damages and compensation from us, in addition, to seeking termination of the contract. While there have been no instances during the last three financial years of information technology breach or instances of cyber-attack, assertions of misappropriation of confidential information or the intellectual property of our customers against us, if successful, could have a material adverse effect on our business, financial condition and results of operations. Even if such assertions against us are unsuccessful, they may cause us to incur reputational harm and substantial cost.

Although we closely monitor our employees, misconduct, including acts of bribery, corruption or fraud by employees or executives, such acts could include binding us to transactions that exceed authorized limits or present unacceptable risks, or they may hide unauthorized or unlawful activities from us, which may result insubstantial financial losses and damage to our reputation and loss of business from our customers. Employee or executive misconduct could also involve the improper use or disclosure of confidential information, which could result in regulatory sanctions and serious reputational or financial harm, including harm to our brand. While we have not experienced any such employee misconduct in the past, it is not always possible to deter employee or executive misconduct and the precautions taken and systems put in place to prevent and detect such activities may not be effective in all cases. Any instances of such misconduct could adversely affect our business and our reputation.

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis so that our operations adhere to our policies, compliance requirements and internal guidelines. We periodically test and update our internal processes and systems and there have been no past material instances of failure to maintain effective internal controls and compliance system. The Finance Act, 2020, has, among o others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Comp any may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian ta x treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2024 and the Finance Act, 2023 received assent from the President of India on March 31, 2023. There is no certainty on the impact that the Finance Act, 2023 may have on our business and operations or in the industry we operate in.

52. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Our restated financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled “*Presentation of Financial Industry and Market Data*” beginning on Page 16 of this Draft Prospectus.

Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited. India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary

significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards, i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

53. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

EXTERNAL RISKS

54. Subsequent to the listing of the Equity Shares, we may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges in order to enhance the integrity of the market and safeguard the interest of investors.

Subsequent to the listing of the Equity Shares, we may be subject to Additional Surveillance Measures (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges and the Securities and Exchange Board of India. These measures have been introduced to enhance the integrity of the market and safeguard the interest of investors. The criteria for shortlisting any security trading on the Stock Exchanges for ASM is based on objective criteria, which includes market-based parameters such as high low-price variation, concentration of client accounts, close to close price variation, market capitalization, average daily trading volume and its change, and average delivery percentage, among others. A scrip is subject to GSM when the share price is not commensurate with the financial health and fundamentals of the company. Specific parameters for GSM include net worth, net fixed assets, PE, market capitalization and price to book value, among others. Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by SEBI and the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

55. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price issue process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

56. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares shall be determined by Fixed price method. The price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 80 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue.

The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- changes in revenue or earnings estimates or publication of research reports by analysts;
- results of operations that vary from those of our competitors;
- speculation in the press or investment community;
- new laws and governmental regulations applicable to our industry;
- future sales of the Equity Shares by our shareholders;
- general market conditions; and
- domestic and international economic, legal and regulatory factors unrelated to our performance.

57. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

58. *An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.*

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

59. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the BSE SME Platform in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE SME. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

60. *Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoters or other shareholders may adversely affect the trading price of the Equity Shares.*

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

61. *There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder’s ability to sell for the price at which it can sell, equity shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by

the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

62. *Investors may not be able to enforce judgments obtained in foreign courts against us.*

We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgments against them obtained from courts outside India, including judgments predicated on the civil liability provisions of the United States federal securities laws.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, which includes the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908 (the “**Civil Code**”). The Civil Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgment is rendered may bring a fresh suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgment. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgment rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with public policy in India. In addition, any person seeking to enforce a foreign judgment in India is required to obtain prior approval of the Reserve Bank of India to repatriate any amount recovered pursuant to the execution of the judgment.

63. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate thereby reducing our margins.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. Further, an increase in interest rates may have a detrimental to our business in respect of lowering demand for our residential and industrial development projects and increasing our financing costs. In addition, high fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

64. *We may be affected by competition law in India and any adverse application or interpretation of the Competition Act may in turn adversely affect our business.*

The Competition Act, 2002, of India, as amended (“**Competition Act**”), regulates practices having an appreciable adverse effect on competition in the relevant market in India (“**AAEC**”). Under the Competition Act, any formal or informal arrangement, understanding, or action in concert, which causes or is likely to cause an AAEC, is considered void and may result in the imposition of substantial penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment, or the provision of services, or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or number of customers in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an AAEC and is considered void. The Competition Act also prohibits abuse of a dominant position by any enterprise.

On April 11, 2023, the Competition (Amendment) Bill 2023 received the assent of the President of India to become the

Competition (Amendment) Act, 2023 (“**Competition Amendment Act**”), amending the Competition Act and giving the CCI additional powers to prevent practices that harm competition and the interests of consumers. It has been enacted to increase the ease of doing business in India and enhance transparency. The Competition Amendment Act, inter alia, modifies the scope of certain factors used to determine AAEC, reduces the overall time limit for the assessment of combinations by the CCI and empowers the CCI to impose penalties based on the global turnover of entities, for anti-competitive agreements and abuse of dominant position.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, all agreements entered by us could be within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct, or combination occurring outside India if such agreement, conduct, or combination has an AAEC in India. However, the impact of the provisions of the Competition Act on the agreements entered by us cannot be predicted with certainty at this stage. We may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, results of operations, cash flows and financial condition.

65. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company is generally taxable in India. A securities transaction tax (“**STT**”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months may be subject to long-term capital gains tax in India at the specified rates depending on certain factors, such as STT paid, the quantum of gains and any available treaty exemptions. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. While non-residents may claim tax treaty benefits in relation to such capital gains income, generally, Indian tax treaties do not limit India’s right to impose tax on capital gains arising from the sale of shares of an Indian company.

In terms of the Finance Act, 2024, with effect from July 23, 2024, taxes payable by an assessee on the capital gains arising from transfer of long-term capital assets (introduced as Section 112A of the Income-Tax Act, 1961) shall be calculated on such long-term capital gains at the rate of 12.50%, where the long-term capital gains exceed ₹125,000, subject to certain exceptions in case of resident individuals and Hindu Undivided Families. The stamp duty for transfer of certain securities, other than debentures, on a delivery basis is currently specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

The Government of India announced the Union Budget for Fiscal 2025, pursuant to which the Finance Bill 2025 proposes various amendments. Further, the Income Tax Act, 1961 is proposed to be amended. We cannot predict whether the amendments proposed to be made pursuant to the Finance Act, 2025 or the Income Tax Act, 1961 would have an adverse effect on our business, financial condition, future cash flows and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

66. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

67. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the exchange control regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain restrictions) if they comply with the pricing guidelines and reporting requirements

specified by the Reserve Bank of India. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the approval of the Reserve Bank of India will be required for such transaction to be valid.

Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as Department of Industrial Policy and Promotion) and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the Consolidated FDI Policy and the FEMA Rules. These investment restrictions shall also apply to subscribers of offshore derivative instruments. Neither the Consolidated FDI Policy nor the FEMA Rules provide a definition of the term “beneficial owner”. The interpretation of “beneficial owner” and enforcement of this regulatory change may differ in practice, which may have an adverse effect on our ability to raise foreign capital. We cannot assure you that any required approval from the Reserve Bank of India or any other governmental agency can be obtained on any particular terms or at all.

68. *Natural calamities could have a negative impact on the Indian economy and cause our Company’s business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

69. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

70. *Changing laws, rules and regulations and legal uncertainties, including adverse application or interpretation of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements. The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements.

Additionally, SEBI has issued a notification in the official Gazette vide notification no. SEBI/LAD-NRO/GN/2025/233 dated March 03, 2025 and has amended various regulations of SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018 and has introduced SEBI (Issue of Capital and Disclosure Requirements) (Amendment), Regulations, 2025, which also includes the amendments pertaining to the SME IPO’s for the Company’s getting listed over SME platforms of the stock exchanges which includes, the amendments made in the categories of allocation in case of Book Built Issue and restrictions on the Offer for Sale and such other amendments. We cannot predict whether the amendments made pursuant to the SEBI (Issue of Capital and Disclosure Requirements) (Amendment), Regulations, 2025 would have an adverse effect on our business, financial condition. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

Further, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under

these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2024 ("Finance Bill"), has introduced various amendments. The Finance Bill has received assent from the President of India on February 15, 2024, and has been enacted as the Finance Act, 2024. We cannot predict whether any amendments made pursuant to the Finance Act, 2024 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

Further, The Government of India announced the Union Budget for Fiscal 2025, pursuant to which the Finance Bill 2025 proposes various amendments. Further, the Income Tax Act, 1961 is proposed to be amended. We cannot predict whether the amendments proposed to be made pursuant to the Finance Act, 2025 or the Income Tax Act, 1961 would have an adverse effect on our business, financial condition, future cash flows and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, financial condition, results of operations and prospects.

71. Our business is substantially affected by prevailing economic, political and other conditions.

We are incorporated in and substantially all our operations are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations and cash flows are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations and cash flows, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporates;
- volatility in, and actual or perceived trends in trading activity on India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- other significant regulatory or economic developments in or affecting India or its construction sector.

On February 24, 2022, Russian military forces invaded Ukraine. Although the length, impact and outcome of the ongoing military conflict in Ukraine is highly unpredictable, this conflict and responses from international communities could lead to significant market and other disruptions, including significant volatility in commodity prices and supply of energy

resources, instability in financial markets, supply chain interruptions, political and social instability, changes in consumer or purchaser preferences as well as increase in cyberattacks and espionage.

To date, we have not experienced any material interruptions in our supply chain, distribution network in connection with these conflicts. We have no way to predict the progress or outcome of the conflict in Ukraine as the conflict, and any resulting government reactions, are rapidly developing and beyond our control. The extent and duration of the military action, sanctions and resulting market disruptions could be significant and could potentially have a substantial impact on the global economy and our business for an unknown period of time. Any of the abovementioned factors could affect our business, financial condition and results of operations.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

72. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

73. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

74. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

ANNEXURE TO THE STATEMENT OF TAX BENEFITS

The information provided below sets out the special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act, 1961 presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

A. PECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:

Under the Income Tax Act, 1961 ("the Act")

Special tax benefits available to the Company

- The Company is not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

B. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS:

- The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

NOTES:

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above Annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year 2024-25. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 ('the Amendment Act, 2019') with effect from Financial Year 2019-20 granting an option to domestic companies to compute corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and cess of 4%), provided such companies do not avail specified exemptions/ incentives. The option under section 115BAA of the Act once exercised cannot be subsequently withdrawn for any future financial year. The Amendment Act, 2019 further provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax ('MAT') under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

In such a case, the Company is not allowed to claim any of the following deductions/ exemptions under the Act: -

- ✓ Deduction under the provisions of Section 10AA.
- ✓ Deduction under clause (ia) of sub- section (1) of Section 32 (additional depreciation).
- ✓ Deduction under section 32AD or Section 33AB or Section 33ABA
- ✓ Deduction under section 35AD or Section 35CCC
- ✓ Deduction under section 80G

Lower corporate tax rate under Section 115BAA of the Act and Minimum Alternate Tax ('MAT') credit under section 115JAA of the Act which are in general available and hence may not be treated as special tax benefits.

The Company has evaluated and decided to exercise the option permitted under Section 115BAA of the Act for the purpose of computing its income-tax liability for the Financial Year 2019-20 and onwards.

6. This Annexure is intended only to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of tax consequences, each investor is advised to consult his or her tax advisor with respect to specific tax consequences of his/her investment in the shares of the Company.
7. No assurance is given that the revenue authorities/ courts will concur with the views expressed herein. The views are based on the existing provisions of law and its interpretation, which are subject to changes from time to time. GLOBAL ECONOMIC OVERVIEW

Global Growth: Divergent and Uncertain

Global growth is projected at 3.3 percent both in 2025 and 2026, below the historical (2000–19) average of 3.7 percent. The forecast for 2025 is broadly unchanged from that in the October 2024 World Economic Outlook (WEO), primarily on account of an upward revision in the United States offsetting downward revisions in other major economies. Global headline inflation is expected to decline to 4.2 percent in 2025 and to 3.5 percent in 2026, converging back to target earlier in advanced economies than in emerging market and developing economies.

Medium-term risks to the baseline are tilted to the downside, while the near-term outlook is characterized by divergent risks. Upside risks could lift already-robust growth in the United States in the short run, whereas risks in other countries are on the downside amid elevated policy uncertainty. Policy-generated disruptions to the ongoing disinflation process could interrupt the pivot to easing monetary policy, with implications for fiscal sustainability and financial stability. Managing these risks requires a keen policy focus on balancing trade-offs between inflation and real activity, rebuilding buffers, and lifting medium-term growth prospects through stepped-up structural reforms as well as stronger multilateral rules and cooperation.

Forces Shaping the Outlook

The global economy is holding steady, although the degree of grip varies widely across countries. Global GDP growth in the third quarter of 2024 was 0.1 percentage point below that predicted in the October 2024 WEO, after disappointing data releases in some Asian and European economies. Growth in China, at 4.7 percent in year-over-year terms, was below expectations. Faster-than-expected net export growth only partly offset a faster-than-expected slowdown in consumption amid delayed stabilization in the property market and persistently low consumer confidence. Growth in India also slowed more than expected, led by a sharper-than-expected deceleration in industrial activity. Growth continued to be subdued in the euro area (with Germany's performance lagging that of other euro area countries), largely reflecting continued weakness in manufacturing and goods exports even as consumption picked up in line with the recovery in real incomes. In Japan, output contracted mildly owing to temporary supply disruptions. By contrast, momentum in the United States remained robust, with the economy expanding at a rate of 2.7 percent in year-over-year terms in the third quarter, powered by strong consumption.

Global disinflation continues,

But there are signs that progress is stalling in some countries and that elevated inflation is persistent in a few cases. The global median of sequential core inflation has been just slightly above 2 percent for the past few months. Nominal wage growth is showing signs of moderation, alongside indications of continuing normalization in labor markets. Although core goods price inflation has fallen back to or below trend, services price inflation is still running above pre-COVID-19 averages in many economies, most notably the United States and the euro area. Pockets of elevated inflation, reflecting a range of idiosyncratic factors, also persist in some emerging market and developing economies in Europe and Latin America. Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labor market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global Financial Conditions

Remain largely accommodative, again with some differentiation across jurisdictions. Equities in advanced economies have rallied on expectations of more business-friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic Policy Uncertainty

Has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries. Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

The Outlook

IMF staff projections assume current policies in place at the time of publication. They incorporate recent market developments and the impact of heightened trade policy uncertainty, which is assumed to be temporary, with the effects unwinding after about a year, but refrain from making any assumptions about potential policy changes that are currently under public debate. Energy commodity prices are expected to decline by 2.6 percent in 2025, more than assumed in October. This reflects a decline in oil prices driven by weak Chinese demand and strong supply from countries outside of OPEC+ (Organization of the Petroleum Exporting Countries plus selected non-member countries, including Russia), partly offset by increases in gas prices as a result of colder-than-expected weather and supply disruptions, including the ongoing conflict in the Middle East and outages in gas fields. Nonfuel commodity prices are expected to increase by 2.5 percent in 2025, on account of upward revisions to food and beverage prices relative to the October 2024 WEO, driven by bad weather affecting large producers. Monetary policy rates of major central banks are expected to continue to decline, though at different paces, reflecting variations in growth and inflation outlooks. The fiscal policy stance is expected to tighten during 2025–26 in advanced economies including the United States and, to a lesser extent, in emerging market and developing economies.

Global growth is expected to remain stable, albeit lackluster. At 3.3 percent in both 2025 and 2026, the forecasts for growth are below the historical (2000–19) average of 3.7 percent and broadly unchanged from October. The overall picture, however, hides divergent paths across economies and a precarious global growth profile.

Among advanced economies, growth forecast revisions go in different directions. In the United States, underlying demand remains robust, reflecting strong wealth effects, a less restrictive monetary policy stance, and supportive financial conditions. Growth is projected to be at 2.7 percent in 2025. This is 0.5 percentage point higher than the October forecast, in part reflecting carryover from 2024 as well as robust labour markets and accelerating investment, among other signs of strength. Growth is expected to taper to potential in 2026.

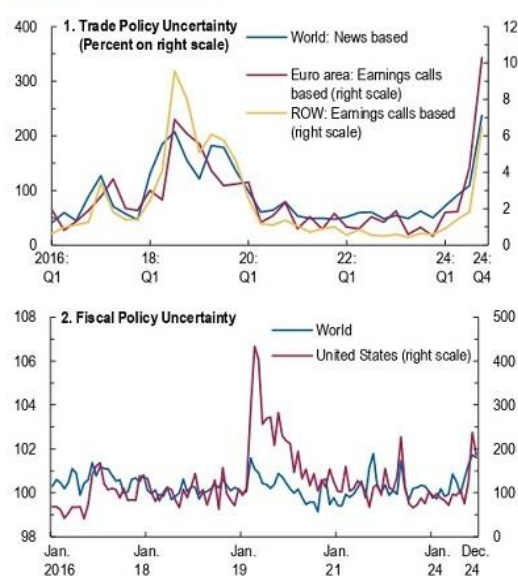

In the euro area, growth is expected to pick up but at a more gradual pace than anticipated in October, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened political and policy uncertainty explain a downward revision of 0.2 percentage point to 1.0 percent in 2025. In 2026, growth is set to rise to 1.4 percent, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat.

In other advanced economies, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds including the sharp uptick in trade policy uncertainty are expected to keep investment subdued.

In emerging market and developing economies, growth performance in 2025 and 2026 is expected to broadly match that in 2024. With respect to the projection in October, growth in 2025 for China is marginally revised upward by 0.1 percentage point to 4.6 percent. This revision reflects carryover from 2024 and the fiscal package announced in November largely offsetting the negative effect on investment from heightened trade policy uncertainty and property market drag. In 2026, growth is projected mostly to remain stable at 4.5 percent, as the effects of trade policy uncertainty dissipate and the retirement age increase slows down the decline in the labour supply. In India, growth is projected to be solid at 6.5 percent in 2025 and 2026, as projected in October and in line with potential.

In the Middle East and Central Asia, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3 percentage point downward revision to 2025 growth in Saudi Arabia, mostly driven by the extension of OPEC+

production cuts. In Latin America and the Caribbean, overall growth is projected to accelerate slightly in 2025 to 2.5 percent, despite an expected slowdown in the largest economies of the region. Growth in sub-Saharan Africa is expected to pick up in 2025, while it is forecast to slow down in emerging and developing Europe.

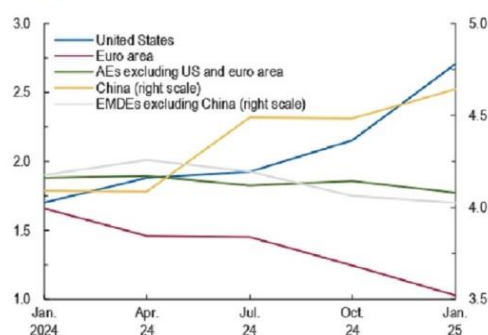

World trade volume estimates are revised downward slightly for 2025 and 2026. The revision owes to the sharp increase in trade policy uncertainty, which is likely to hurt investment disproportionately among trade-intensive firms. That said, in the baseline, the impact of heightened uncertainty is expected to be transitory. Furthermore, the front-loading of some trade flows in view of elevated trade policy uncertainty, and in anticipation of tighter trade restrictions, provides some offset in the near term.

Progress on disinflation is expected to continue. Deviations from the October 2024 WEO forecasts are minimal. The gradual cooling of labour markets is expected to keep demand pressures at bay. Combined with the expected decline in energy prices, headline inflation is projected to continue its descent toward central bank targets. That said, inflation is projected to be close to, but above, the 2 percent target in 2025 in the United States, whereas inflationary dynamics are expected to be more subdued in the euro area. Low inflation is projected to persist in China. Consequently, the gap between anticipated policy rates in the United States and other countries becomes wider.

Risks to the Outlook

In the medium term, the balance of risks to the outlook is tilted to the downside, with global growth poised to be lower than its 2025–26 average and five-year-ahead forecasts at about 3 percent.

Note: The x-axis shows the months the *World Economic Outlook* is published. AEs = advanced economies; EMDEs = emerging market and developing economies.

Near-term risks, in contrast, could reinforce divergences across countries: they are tilted to the upside in the United States, whereas downside risks prevail in most other economies amid elevated policy uncertainty and headwinds from ongoing adjustments (in particular, energy in Europe and real estate in China).

An intensification of protectionist policies, for instance, in the form of a new wave of tariffs, could exacerbate trade tensions, lower investment, reduce market efficiency, distort trade flows, and again disrupt supply chains. Growth could suffer in both the near and medium term, but at varying degrees across economies.

Looser fiscal policy in the United States, driven by new expansionary measures such as tax cuts, could boost economic activity in the near term, with small positive spill-overs onto global growth. Yet in the longer run, this may require a larger fiscal policy adjustment that could

become disruptive to markets and the economy, by potentially weakening the role of US Treasuries as the global safe asset, among other things. Furthermore, higher borrowing to fund looser fiscal policy could increase demand for capital globally, leading to an increase in interest rates and possibly depressing economic activity elsewhere.

Confidence and positive sentiment in the United States, partly driven by deregulation, could boost both the demand and the supply side of the economy. While relaxation of unduly tight regulations and reduced red tape for businesses may spur near-term US growth through higher investment, dollar appreciation could fuel risks of capital outflows from emerging market and developing economies and drive risk premiums upward. Moreover, an excessive rollback of regulations designed to put limits on risk-taking and debt accumulation may generate boom-bust dynamics for the United States in the longer term, with repercussions for the rest of the world. Downside risks to macro-financial stability may be amplified if compounded by a weaker fiscal outlook or stalled progress on structural reforms. Other supply-side shocks, such as labour force disruptions driven by reductions in migration flows to the United States, may permanently reduce potential output and raise inflation during the adjustment period.

A near-term boost for the US economy emanating from these factors would further underscore the divergent growth patterns across economies. If the adverse effects of tariffs and reduction in the labour force dominates, global activity as well as activity in the United States might be affected negatively in the medium term. Uncertainties are high: the effects of each factor would unfold differently across countries, influenced by trade and financial linkages; policy responses to actions taken by other countries could play out in a variety of ways, including an escalation of retaliatory tariffs; and the impacts of different policy combinations or different magnitudes of policy changes could be quite different.

Inflation dynamics could be shaped in opposite directions by these factors. The magnitude of the inflationary effect from tariffs is especially uncertain. While recent empirical studies find high pass-through to import prices, estimates of pass-through to consumer prices are lower and subject to significant uncertainty. Nevertheless, compared with what took place in earlier episodes of trade disputes, several factors suggest that upside risks to inflation from tariff hikes could be higher

this time. First, the global economy is coming out of the most significant inflation surge in recent memory. Inflation expectations, especially in many advanced economies, are farther above the central bank target today than in 2017–21. Second, the cyclical positions of many major economies are more conducive to higher inflation today than in 2016. Third, retaliation in the form of restrictions on specific, difficult-to-substitute materials or intermediate goods may have an outsized impact on aggregate inflation.

World Economic Outlook

The risk of renewed inflationary pressures could prompt central banks to raise policy rates and intensify monetary policy divergence. Higher-for-even-longer interest rates could worsen fiscal, financial, and external risks. A stronger US dollar, arising from interest rate differentials and tariffs, among other factors, could alter capital flow patterns and global imbalances and complicate macroeconomic trade-offs.

In addition to risks from economic policy shifts, geopolitical tensions could intensify, leading to renewed spikes in commodity prices. The conflicts in the Middle East and Ukraine could worsen, directly affecting trade routes as well as food and energy prices. Commodity-importing countries may be particularly affected, with the stagflationary impact of higher commodity prices compounded by an appreciating dollar.

On the upside, global economic activity may enjoy a bounce if incoming governments can renegotiate existing trade agreements and forge new deals. This could relieve uncertainty faster and be much less disruptive to growth and inflation. By boosting confidence, such cooperative outcomes could even support investment and medium-term growth prospects. Momentum on other policy fronts could also lift growth. Many countries may embrace structural reforms to prevent divergence from their better-performing peers from becoming entrenched. Efforts to increase labour supply, reduce misallocation, enhance competition, and support innovation could raise medium-term growth.

INDIAN ECONOMIC OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to

list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already

reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL TRADING INDUSTRY

Introduction

Global trade is, in many ways, at a crossroads. As governments respond to economic and geopolitical pressures, trade policies are evolving in ways that, while intended to address national concerns, are putting unprecedented pressure on businesses. Since the 2007-2008 financial crisis, there has been a steady increase in trade-restricting measures – such as tariffs, non-tariff measures, export controls and investment restrictions – contributing to growing trade fragmentation. In 2024 alone, over 3,000 trade restrictions were implemented globally. While the challenges to the multilateral trading system are not new, they are intensifying, with a significant risk of further erosion. The erosion of the rules-based multilateral trading system is driving greater uncertainty and higher costs for businesses, and potentially leading to higher prices for consumers. This will particularly affect developing countries, for which the multilateral trade rules provide opportunities for higher growth and income convergence with advanced countries. Without the global trading system, developing countries would see a 33% drop in merchandise trade relative to a baseline scenario with the multilateral system still in place, and a permanent GDP loss of over 5% – driven in part by a 5% decline in foreign direct investment flows. Fragmentation in trade or foreign direct investment (FDI) could reduce global GDP on average by about 2%. These figures underscore the indispensable role that the World Trade Organization (WTO) plays in ensuring a stable, transparent and predictable trading environment – a role strongly supported by the global business community. As part of its efforts to assess recent industrial policy trends, the International Chamber of Commerce (ICC), the world's largest business organisation, conducted extensive consultations as well as two focus group meetings with several international companies across various industries and regions to explore the evolving shift in trade policies, including tariffs and their potential impact on business operations.

Several key themes emerged from our consultations and focus group discussions that shed light on the priorities of the global business community at the start of 2025.

Key takeaways

- A strong, rules-based global trading system anchored in a fully-functioning WTO remains a top concern for businesses, which need stability, transparency and predictability to make informed long-term trade, business and investment decisions.
- Unilateral trade measures and the risk of retaliation to unilateral trade measures raise the spectre of a domino-effect race to the bottom, leaving no country safe from shocks or potential disruptions, fuelling further uncertainty. Tariffs would also raise the cost of inputs, many of which are imported, further affecting domestic exporters higher up the value chain.
- New trade policies and instruments are expected to affect a much larger array of firms. Many that were previously unaffected by rising protectionism now anticipate being directly affected. This challenge is further compounded by a post COVID-19 trade environment characterised by higher interest rates, sticky inflation, record debt levels and geo-economic fragmentation.
- Businesses have strengthened their defences against abrupt changes in trade policies. They have already been responding to geopolitical pressures and tariff uncertainty by diversifying from different geographic locations, stockpiling inputs, and adjusting pricing and cost absorption strategies. However, these costly adaptations are affecting profitability and investment while providing no failsafe against major trade disruptions.
- Efforts to strengthen supply chain resilience, including reshoring, are constrained by a shortage of skilled workers and related suppliers, which will take time to address.
- Active and continuous negotiations among governments, incorporating industry perspectives, are essential to address evolving challenges and seize new opportunities.

Spotlight on tariffs

During our consultations, as tariffs were widely expected to increase, companies stressed the importance of resolving uncertainty and ensuring predictability and policy transparency. Clear communication on the size, scope and time length of tariffs (i.e., which goods and jurisdiction, how much, and for how long) is essential to effectively plan and mitigate risks.

They underscored the negative effects of tariffs on profitability, market share, investment and potential price hikes.⁴ Firms' international competitiveness may also suffer.

In response, firms have been adapting to the new reality of tariffs and anticipating new measures by diversifying their suppliers, lengthening their supply chains via third countries, and stockpiling inputs. However, the companies expressed concern that alternative sourcing destinations, such as Vietnam and Mexico, may also face tariffs because of efforts to decrease large current account surpluses or curb trade diversions.

Finally, if the main goal of tariffs is to support domestic companies or attract investment, businesses noted that other factors need to be considered. Businesses all agreed that these goals will take time to materialise as the availability of supply chains and of skilled labour is critical in relocation and investment decisions. Therefore, tariffs, which were used in the 19th and 20th century to promote infant industries, are not the most efficient tool in the modern era, and other ones are needed to achieve these goals.

Business response and adaptation policies

Our consultations revealed several key strategies for businesses to navigate trade policy uncertainty. Companies emphasized the need to prioritise:

- Education and compliance capabilities as an immediate first step. Teams need to thoroughly understand trade regulations, tariff structures and potential policy impacts. Having dedicated compliance expertise helps companies prepare for and navigate policy changes effectively. This education should extend to key suppliers to ensure aligned understanding and preparation in the supply chain.
- Effective supply chain strategies and contingency planning are essential, including analysing potential scenarios and diversifying suppliers where appropriate.
- Leveraging technologies like artificial intelligence can also enhance adaptability and help businesses respond quickly to policy shifts.
- Engagement with business organisations provides crucial support throughout these efforts. Companies should actively work with their chambers of commerce and industry associations to stay informed, access practical guidance and ensure business perspectives are heard by policymakers.

Conclusion

Throughout our extensive consultations and roundtables with businesses worldwide, one message has remained consistent: the private sector urgently needs predictability and certainty to operate effectively in global markets. Unilateral actions contribute to the very uncertainty that companies of all sizes fear most – their ability to plan investments, manage supply chains and create jobs. This feedback from multinational enterprises to small businesses underscores why sustained multilateral engagement and a rules-based system must remain the cornerstones of international trade relations. The WTO provides an essential forum for trade monitoring, negotiation and enforcement, built on principles of transparency and predictability. It provides the stable foundation that businesses need to engage in cross-border trade and make long-term investments and is fundamental to fostering global.

INDIAN TRADING INDUSTRY

India's trade opportunities in a changing global context

a. *India's Path to Greater Trade and Global Value Chain Participation in a Challenging Global Context*

The global backdrop is challenging

The global backdrop is characterized by significant geopolitical risks and a general rise in protectionism. Although global trade is rebounding, with a projected 2.6 percent growth in the volume of merchandise trade in 2024 and expected growth of 3.3 percent in 2025, risks to this forecast are significant. They include geopolitical tensions, policy uncertainty and a rise in protectionism (WTO 2024). In recent years, trade linkages and supply chains have been shown to be highly vulnerable to geopolitical and other disruptions. At the same time, a global trend towards protectionist economic policies has gained momentum, with many nations increasingly adopting trade distorting measures. For example, almost 3,000 new trade-distorting measures were imposed in 2023, three times as many as in 2019³⁶ (Global Trade Alert, 2024). A significant proportion of these trade-distorting measures took the form of industrial policy, with the most active practitioners including the US, China, India, and most of the EU economies.

but there are opportunities for India to leverage

Heightened perceptions of geopolitical risks have prompted companies to diversify their sourcing strategies. This presents an opportunity for countries like India with an abundant workforce and a growing manufacturing base. To make the most of these new opportunities, however, India's trade policy must be supportive.

On trade, India is punching well below its weight

Despite its rising economic heft, India's trade in goods and services has been declining as a percentage of GDP over the last decade, and it is lower than in countries at similar stages of development

India's exports have evolved in recent years, but more can be done to push intensive and extensive margins

The composition of India's exports has changed over the past decades. Services exports growth has significantly outpaced merchandise exports growth (Figure 4.3), led by telecom services, including computer and information services, and other business services (which together account for over two-thirds of the India's services exports - IMF BOP 2023). Still, in 2022 India caters to just 4.3 percent of global services demand and there is significant potential for further growth: in 2022, India had a strong revealed comparative advantage (RCA) in telecommunication, computer, and information services as well as in other business and transport services (RBI, 2024). Within goods exports, in addition to gems and petrol, skill-intensive products of moderate complexity —such as engineering and transport equipment and pharmaceuticals— have gained in importance (WITS 2024). However, to achieve its merchandise export target of USD 1 trillion by 2030 (from USD 435 billion in FY23/24), India will need to diversify its export basket even further and enter new markets. That would bring added benefits in terms of (i) risk diversification, by reducing reliance on traditional markets, which may face slower growth or protectionist measures, as well as (ii) opportunities for innovation and productivity growth.

India's exports are relatively capital intensive

Direct employment related to exports has fallen from a peak of 9.5 percent of total domestic employment in 2012 to 6.5 percent in 2020. There was a similar trend in indirect employment, which peaked at 9.6 percent in 2006 and then fell to 6.4 percent by 2020³⁷. This is because India's exports have increasingly consisted of skill-intensive manufacturing and

services. Because these sectors are highly capital intensive, they are ill-suited to employ large shares of the Indian workforce.

b. Gains from trade diversification, upgrading and deeper GVC participation.

Trade diversification can enhance a country's economic resilience and growth prospects. By expanding into new sectors and markets, countries can reduce their vulnerability to fluctuations in demand and prices. Diversification also opens new avenues for growth, creating more and better jobs and fostering innovation across various sectors.

Upgrading within existing industries and GVCs can further augment these benefits. Upgrading may involve enhancing technological capabilities, improving product quality, and adopting more sophisticated production processes, while GVC upgrading entails moving into higher-value activities within the global production network. Upgrading can increase a country's share of value-added and capture greater gains from international trade, facilitated by knowledge and technology transfers.

Deepening GVC participation involves increasing the number and diversity of GVCs a country participates in, expanding the range of activities and tasks undertaken within those GVCs, and forging stronger linkages with other firms and countries in the network. This deeper integration facilitates knowledge and technology transfer, enhances productivity and competitiveness, and can lead to sustained economic growth, improved living standards, and greater resilience to external shocks.

Greater trade diversification, upgrading and deeper GVC

A multi-pronged approach focusing on trade diversification, upgrading and deeper integration into GVCs would boost job creation and productivity growth. Diversification can be achieved by expanding into more labor-intensive sectors such as textiles, apparel, leather, and footwear, which have traditionally generated substantial.

Integration would boost job creation and long-term growth employment, particularly for women.

India could focus specifically on higher value-added segments of textiles and apparel, including through GVC participation. Additionally, India could seek to upgrade into sectors with high future potential, such as environmental goods and services. Simultaneously, deeper integration into GVCs would enable India to enhance technological capabilities and productivity across various sectors of the economy. This, in turn, would foster long-term economic resilience, growth and more jobs.

Labor-intensive sectors such as textiles, apparel, leather, and footwear are important for job creation

In 2020, capital-intensive sectors⁴⁰ accounted for 70 percent of manufacturing GVA and 50 percent of formal manufacturing job in India. In contrast, labor-intensive sectors, such as apparel and textiles, which account for less than 20 percent of formal manufacturing GVA, were responsible for over 40 percent of formal manufacturing jobs. These labor intensive activities present vast opportunities for job growth, particularly for women (33 percent of workers in the apparel

and textile sectors are female, compared to only 15 percent in non-textile and non-apparel manufacturing). Increased textile and apparel exports played a key role in creating approximately 800,000 formal jobs between 1999 and 2011.

As China withdraws from low-skill manufacturing due to increasing wages, India has the potential to capitalize on this opportunity.

As China's participation in low-skill manufacturing decreases, due to rising wages, India can do more to capitalize on this opportunity. Currently, countries such as Bangladesh and Vietnam, and even advanced economies such as Germany and the Netherlands, have become the primary beneficiaries of China's shrinking market share. India's share in global exports of Apparel, Leather, Textiles, and Footwear (ALTF) initially grew from 0.9 percent in 2002 to a peak of 4.5 percent in 2013, but it subsequently declined to 3.5 percent in 2022. In contrast, Bangladesh and Vietnam have achieved strong growth, with Bangladesh reaching 5.1 percent and Vietnam 5.9 percent of global ALTF exports in 2022.

C. Trade Policy Priorities: Reducing Costs, Lowering Barriers, and Re-strategizing Participation in FTAs

India could consider a new strategic trade plan to diversify exports and leverage the changing geopolitical landscape

Shifting geopolitical, demographic, and environmental realities, call for a new strategic trade roadmap. If India wishes to leverage its strengths and appeal as a business-friendly alternative (or complement) to China, it should ideally double down on: (i) continuing to reduce the trade cost and improve facilitation to boost export competitiveness; (ii) reducing trade barriers, such as tariff and non-tariff barriers and service restrictions; and (iii) reevaluating trade integration approaches, including India's position on RCEP, given the potential benefits of greater plurilateral and multilateral cooperation.

India can reduce trade costs and continue improving trade facilitation to boost export competitiveness

A comprehensive approach to reduce trade costs and improve trade facilitation can be achieved through ongoing reforms aimed at simplifying and streamlining customs procedures, increasing transparency and predictability in regulations and policies, and reducing bureaucratic red tape. For example, simplifying and automating customs procedures through digital platforms can reduce clearance times and increase efficiency. Improving infrastructure at ports and logistics hubs will help streamline the movement of goods, while establishing single-window clearance systems will minimize bureaucratic delays. Enhancing transparency by providing accessible, up-to-date information on trade regulations and tariffs can support businesses in compliance. Strengthening regulatory coordination among agencies will ensure consistency and predictability in trade processes, fostering a more conducive environment for international trade.

Reducing trade barriers and domestic impediments would promote diversification and deepen GVC participation

Reducing tariff and non-tariff barriers, relaxing services restrictions, and increasing the predictability of trade policies are fundamental steps to boost competitiveness in both goods and services sectors. Policies that help exporting firms access imported intermediate goods and services would significantly improve their performance. Empirical evidence for India, Bangladesh, and China suggests that access to imported inputs helps promote product diversification and productivity of domestic firms (Kee, Forero, and Fernandes 2021). Trade promotion policies include tariff and value-added tax reductions and duty drawbacks on imported materials and expanded access to trade financing, 43 | particularly for small exporting firms. Rationalizing tariffs on intermediary inputs is crucial for labor-intensive sectors. These reforms can create a conducive environment for foreign as well as domestic investments, increasing access to capital goods (such as machinery and equipment) essential for upgrading the production process and participating in GVCs. India's trade opportunities could be further expanded by integrating rural products and services into global value chains through support for small-medium enterprises, promotion of organic and sustainable agriculture, and enhancing market access for rural artisans.

India could reconsider regional integration options

Assessments of regional integration scenarios show that the highest gains come from comprehensive integration scenarios that include trade facilitation, services, and FDI. This means that in addition to reducing tariffs and other trade barriers, India should focus on improving the ease of doing business and reducing barriers to trade in services and FDI. India's recent focus on bilateral FTAs with Australia, the UAE, the US, the UK, and the European Union is a step in the right direction, as these FTAs aim to secure greater market access for goods and services as well as high-quality imports. However, the impact from these new FTAs remains to be determined. For example, the India-EFTA Trade and Economic Partnership Agreement (TEPA) is relatively limited in scope, as it excludes critical areas like digital trade and e-commerce, offering no preferential measures for these sectors. At the same time, India does not participate in mega trade blocs such as the Regional Comprehensive Economic Partnership (RCEP), while other South Asian countries such as Bangladesh and Sri Lanka, have recently indicated interest in integrating with this East Asian regional trade and GVC hub. As smaller, regional economies are considering trade agreements beyond South Asia, India may want to reevaluate its trade integration strategy, including its options on RCEP. In an ideal situation, more emphasis on plurilateral and multilateral cooperation would be beneficial.

GLOBAL ELECTRONICS INDUSTRY

Electronics and Electrical Industry Overview

In recent years, the Electronics & Electrical industry has experienced substantial development, which has been driven by the widespread adoption of electronic devices in a variety of sectors and technological advancements. According to cognitive market research, the global electronics market size was USD 3 trillion in 2023 and will be USD 3.5 trillion in 2024. Consumer electronics, automotive, telecommunications, and healthcare are among the industries that are contributing to this robust growth. Revenue from smartphones, laptops, and wearable devices is substantial, and consumer electronics continue to be a fundamental component of this industry. The global smartphone market alone generated over USD 450 billion in 2023, with shipments eclipsing 1.4 billion units. This market will reach to USD 500 billion by 2024 as emerging markets, including India and Southeast Asia, continue to accelerate the adoption of smartphones.

The market growth in India is driven by prominent companies such as Reliance Jio, Tata Electronics, and Infosys.

PESTEL Analysis of Electronics and Electrical Market

Political

The electronics and electrical market is substantially influenced by the political landscape, which includes government policies, regulations, and international relations. The supply chain and cost structures can be significantly influenced by trade policies and tariffs, particularly those between key economies such as the United States and China. For example, the trade tensions and tariffs that have arisen between these two nations in recent years have resulted in heightened costs for raw materials and components, which have had a global impact on manufacturers. In addition, government regulations concerning data privacy and security are of crucial importance. The manner in which companies manage consumer data is influenced by the implementation of laws such as the General Data Protection Regulation (GDPR) in the European Union. This necessitates that they invest in secure systems and compliance measures. Furthermore, manufacturing centers must maintain political stability. The political stability of countries such as China, South Korea, and Vietnam, which are significant producers of electronic components, guarantees the uninterrupted supply and production of these components. In contrast, the global supply chain can be disrupted by political unrest in these regions, resulting in increased costs and delays.

Economical

Economic factors are of the utmost importance in the development of the electronics and electrical market, as they influence both production and consumption. Global economic conditions, including inflation rates, GDP growth, and consumer expenditure, directly influence market demand. Consumer electronics, including smartphones, laptops, and residential appliances, are more expensive during periods of economic expansion due to the increased disposable income. In contrast, economic downturns can lead to decreased consumer expenditure, which can have an impact on sales volumes and revenues. Additionally, exchange rates are of paramount importance to organizations that engage in international commerce. Profit margins can be influenced by fluctuations in currency values, which can affect the cost of importing raw materials and

exporting finished products. For example, a robust U.S. dollar may result in an increase in the cost of American electronic products in foreign markets, which could potentially decrease demand. Interest rates influence the cost of financing for companies. Investment in new technologies and the expansion of manufacturing capacities are stimulated by lower interest rates, which reduce the cost of capital. This is essential for the electronics industry, which is capital-intensive as a result of the ongoing need for innovation and the upgrading of production facilities.

Social

In the electronics and electrical market, consumer preferences and behaviors are influenced by social factors. Key determinants of market demand include demographic shifts, lifestyle changes, and cultural trends. The demand for consumer electronics, including smartphones, tablets, and wearable devices, is driven by the younger generation's affinity for technology, which is resulting in an increasing digitalization of lifestyles. This demographic is technologically adept and prioritizes the most recent developments, which promotes frequent product enhancements and ongoing innovation. Urbanization and the proliferation of smart cities are also substantial social trends that influence the market. Smart home devices, such as smart thermostats, lighting, and security systems, are in increasing demand as more individuals relocate to urban areas. The Internet of Things (IoT) and related electronic products are being driven by this trend toward connected living spaces. The adoption of medical devices and ubiquitous technology has been on the rise as a result of health and wellness trends. Smartwatches, fitness monitors, and health monitoring devices are increasingly important components of individuals' lives, indicating a growing awareness of personal health and fitness. Social factors also influence corporate social responsibility (CSR) initiatives within the industry.

Technological

Innovation and growth are propelled by technological advancements, which are the foundation of the electronics and electrical market. The market is constantly being reshaped by the rapid advancements in technology, which result in the development of new products and the improvement of existing ones. The Internet of Things (IoT), artificial intelligence (AI), machine learning, and 5G technology are among the most significant technological influencers. AI and machine learning are revolutionizing a variety of industries, including consumer electronics and industrial applications. These technologies facilitate the implementation of intelligent functions in devices, including predictive maintenance in industrial apparatus and voice recognition in smartphones. The automotive electronics sector is being substantially impacted by the development of autonomous vehicles, which is also being driven by AI-driven innovations. The introduction of 5G technology is a significant technological advancement that facilitates quicker data transfer rates and improves connectivity. This development facilitates the proliferation of IoT devices, thereby enabling the automation of industrial processes, smart cities, and residences. It is anticipated that the enhanced connectivity and speed of 5G networks will revolutionize sectors such as healthcare and manufacturing through telemedicine and remote monitoring, and through real-time data analytics and enhanced automation.

Environmental

It is becoming increasingly evident that environmental factors are influencing the electronics and electrical market, as both consumers and manufacturers prioritize sustainability and eco-friendliness. Regulatory mandates and consumer preferences for environmentally friendly products exert substantial pressure on the industry to diminish its environmental impact. E-waste management is a critical environmental concern. The substantial e-waste generated by the accelerated obsolescence of electronic devices poses significant environmental hazards. Manufacturers are currently emphasizing the development of products that are more easily recyclable and disposed of, as well as the implementation of recycling and take-back programs, in order to address this issue. Another critical environmental factor is energy efficiency. There is an increasing demand for energy-efficient products, which is being driven by consumer awareness and regulatory standards. Manufacturers are increasingly relying on energy-efficient technologies, including low-power semiconductors, energy-efficient appliances, and LED lighting, to remain competitive and in compliance with environmental regulations. The industry is also being affected by the adoption of renewable energy sources. Companies are progressively utilizing renewable energy to power their manufacturing operations, thereby reducing their carbon footprint.

Legal

The electronics and electrical market is required to adhere to a diverse array of regulations and standards, which impact product design, manufacturing processes, and market entry strategies. These factors are referred to as legal factors. The industry is heavily dependent on innovation and proprietary technologies, which is why intellectual property (IP) laws are of particular importance. In order to safeguard their innovations and prevent infringement, companies must navigate intricate patent landscapes, which can be both time-consuming and expensive. In the electronics industry, product safety regulations are rigorous, necessitating those manufacturers comply with standards that guarantee consumer protection. In order to prevent legal repercussions and market withdrawals, it is imperative to adhere to these regulations, including those established by the Consumer Product Safety Commission (CPSC) in the United States and the European Union's CE marking. Additionally, environmental regulations are indispensable. Significant modifications to product design and material procurement are necessary to comply with these regulations. Impacting the development and deployment of connected devices are data privacy regulations, including the GDPR in the EU and the California Consumer Privacy Act

(CCPA) in the US. In order to prevent substantial penalties and legal complications, manufacturers must guarantee that their products adhere to these regulations.

INDIAN ELECTRONICS INDUSTRY

Electronics industry is the world's largest and fastest growing industry and is increasingly finding application in all sectors of the economy. The government's support for the electronics industry has been strong, with numerous conducive policies. The government of India is focusing on manufacturing electronics hardware within India, which seems to be the conceptual origin for both the Make in India and the Digital India programmes. These initiatives encourage domestic manufacturing and exports across the electronics system design and manufacturing (ESDM) value chain. Today India's production of electronics is estimated at US\$ 90 billion and export is estimated to be US\$ 23 billion.

Apart from policies like the Make in India initiative, the National Policy on Electronics (NPE) 2019 and Digital India, the Indian government has also backed the sector with the Electronics Development Fund (EDF), the Modified Special Incentive Package Scheme (MSIPS), the Phased Manufacturing Programme (PMP), Preferential Market Access (PMA), and by rationalising the duty structure. The National Policy on Electronics launched by the Indian Government in 2019,

targets \$400 billion turnovers by 2025 from domestic manufacturing, setting up clusters for the entire value chain, and employing over 10 million people directly or otherwise to achieve a growth rate of 32 percent.

India has emerged as the second largest manufacturer of mobile phones in the world. Over 200 units are manufacturing cellular mobile phones and parts / components thereof in the country, up from only 2 units in 2014. The domestic demand is almost completely being met out of domestic production. India which was importing 90 per cent of its mobile phones till 2014 is now catering to 97 per cent of all mobile phones that are consumed in India.

The electronics sector of India contributes around 3.4% of the country's Gross Domestic Product (GDP). The government has committed nearly US\$ 17 billion over the next six years across various incentive schemes to grow the industry. The Government of India has also worked on making the country investor-friendly and has been laying out the red carpet for manufacturing companies.

By 2026, India has laid out a goal of US\$300 billion of manufacturing and US\$ 120 billion of exports.

The Government has launched 3 schemes to support the electronics industry of India namely:

- **Production Linked Incentive Scheme (PLI):** The scheme is proposed to offer a production linked incentive of 4% to 6% to boost domestic manufacturing and attract large investments in mobile phone manufacturing and specified electronic components, including Assembly, Testing, Marking and Packaging (ATMP) units, IT hardware, networking equipment, White goods (ACs & LED) etc.
- **Scheme for Promotion of Manufacturing of Electronics Components and Semiconductors (SPECS):** The scheme will provide financial incentive of 25% on capital expenditure for the identified list of electronic goods that comprise downstream value chain of electronic products, i.e., electronic components, semiconductor/ display fabrication units, ATMP units, specialized sub-assemblies and capital goods for manufacture of aforesaid goods, all of which involve high value added manufacturing.
- **Electronics Manufacturing Clusters (EMC) 2.0:** EMC 2.0 scheme envisages to create quality infrastructure along with industry specific facilities like Common Facility Centers, Ready Factory Sheds / Plug and Play facilities etc.

These schemes are expected to contribute significantly to achieving a \$1 trillion digital economy and a \$ 5 trillion GDP by 2025.

The Government has announced an outlay of Rs. 3 trillion for the Production Linked Incentive (PLI) Schemes across 14 key sectors including electronics, to create national manufacturing champions and generate employment opportunities for the country's youth. PLI scheme offers incentives on incremental sales for products manufactured in India.

India has a very strong manufacturing base for electronics components. Electronic components are considered to be the building blocks for this sector. A proper and impeccable structure of manufacturing electronic components requires a supportive ecosystem and a high capital investment. India produces high quality electronic components mainly electro-mechanical components (like printed circuit boards, connectors, etc.) and passive components (like wound components, resistors, etc.). Over the years, the active components (like integrated circuits, diodes, etc.) and the associated components (like optical disc, magnets, RF Tuners, etc.) have also witnessed its growth.

India is a global R&D hub and the third largest start-up ecosystem in the world. India is home to 1140+ R&D Centres of Global MNCs employing 900,000+ professionals. India is the preferred investment destination for electronics manufacturing given the low cost of manufacturing combined with the rapid transformation in ease of doing business. 100% FDI is allowed under the automatic route. Under Defence electronics, FDI up to 49% is allowed under automatic route and beyond 49% through government approval.

Electronics Landscape in India

Market Trends and Forecast

The outlook for India's electronics manufacturing industry is promising, with projections aiming to reach US\$ 540 billion by 2025, showing a significant increase from the US\$ 215 billion demand in FY19. The market has demonstrated steady growth during years indicating a robust 14% Compound Annual Growth Rate (CAGR) between 2016 and 2019 and 16.6% CAGR Growth between FY19-FY25. Further, the electronics system Design and Manufacturing market is forecasted to achieve US\$ 220 billion by FY25. Notably, key products within the Electronics & Telecommunications Development (ESDM) sector, including IT/OA, industrial electronics, and automotive electronics, have shown the highest CAGR. The

import and export data portray a dynamic trade scenario, showcasing imports of electronic goods amounting to US\$ 73.46 billion and exports totalling US\$ 22.68 billion during the previous fiscal year (FY23). The growth trajectory extends to specific sectors, with smartphone shipments reaching 168 million units in CY 2021. Likewise, 5G device shipments are anticipated to surge by 129% year-on-year. The electronics design segment, is poised to constitute 27% of the total ESDM market size by FY25. With a firm commitment, India aims to achieve US\$ 300 billion worth of electronics manufacturing and exports totalling USD 120 billion by 2025-26.

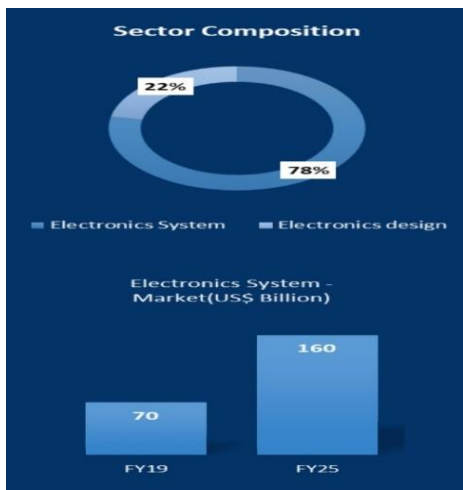

Advantage India

India's electronics industry exhibits robust growth, fueled by strong design and R&D capabilities in sectors such as Auto Electronics and Industrial Electronics. Notably, the country stands as the second-largest global mobile phone manufacturer and is anticipated to become the fifth-largest consumer of electronic products by 2025. In response to the challenges posed by the COVID-19 pandemic, the government aims to elevate India's contribution to the electronics sector by approximately US\$ 400 billion, positioning it to account for 9-10% of global value chains. Key initiatives like the Production-linked Incentive (PLI) scheme for large-scale electronics manufacturing have already attracted significant investments, totaling Rs. 6,887 Crore as of June 2023. Additionally, government programs such as 'Digital India' and 'Make in India' streamline the process of establishing manufacturing units, while the National Policy on Electronics (NPE 2019) further supports the goal of fostering domestic manufacturing, targeting US\$ 400 billion by 2025.

India's trajectory in the electronics industry points towards a promising future, with projections indicating its ascent to a \$1 trillion digital economy by FY26. Presently, the electronics market stands at a substantial value of \$155 billion, with domestic production accounting for a significant share of 65%. This growth is fueled by technological transitions such as the advent of 5G networks and the Internet of Things (IoT), which are catalyzing the adoption of electronic products across various sectors. Initiatives like 'Digital India' and 'Smart City' projects further bolster this trend by amplifying the demand for IoT-enabled devices. Noteworthy is the remarkable increase in domestic production, which surged by 13% from \$49 billion in FY17 to \$101 billion in FY23. Additionally, the outlook for electronics exports appears promising, expected to reach \$120 billion by FY26. Despite these advancements, India ranks 60th in the Network Readiness Index of 2023, indicating areas for further improvement. Nevertheless, significant strides have been made in enhancing accessibility, with a notable 96% reduction in data costs from INR 269 per GB in 2014 to INR 10.1 per GB in 2023. Facilitating this growth is the liberalized foreign direct investment (FDI) policy, with 100% FDI permitted under the automatic route and 49% specifically allotted for defense electronics, fostering an environment conducive to both domestic and international investments in the sector.

India's Digital Revolution

India's digital transformation is fueling a surge in electronic device consumption, buoyed by a growing middle-class population, increasing disposable incomes, and declining electronics costs. The electronics system design & manufacturing (ESDM) sector is poised for significant expansion, with projections indicating a reach of approximately US\$ 220 billion by 2025, demonstrating a robust compound annual growth rate (CAGR) of 16.1% between 2019 and 2025. India sets ambitious targets, aiming to produce 1 billion mobile handsets valued at US\$ 190 billion by 2025, including 600 million handsets worth US\$ 110 billion earmarked for exports. Segmenting the ESDM sector into electronics systems and electronics design, its value stood at US\$ 90 billion in FY19. Notably, over 90% of global semiconductor companies have established R&D centers in India, contributing approximately US\$ 2.5 billion in revenue and generating 600,000 jobs. Positioned as one of the largest consumer electronics markets in the Asia Pacific Region, India is committed to achieving US\$ 300 billion in electronics manufacturing and US\$ 120 billion in exports by 2025-26.

Driving Forces of Indian Electronics Industry

- Robust Demand***
 The electronics industry exhibits robust demand, bolstered by strong design and research and development (R&D) capabilities, particularly in auto electronics and industrial electronics. With India emerging as the second-largest mobile phone manufacturer globally, the country is poised to become the fifth-largest consumer of electronic products by 2025. Notably, exports of electronic goods surged in FY23, reaching US\$ 23.57 billion, marking a remarkable 50.52% growth from FY22.
- Competitive Advantage***
 India remains steadfast in its commitment to achieving US\$ 300 billion worth of electronics manufacturing and exports totalling US\$ 120 billion by 2025-26. The nation possesses significant talent in electronic chip design and embedded software, providing a competitive edge in the global market.
- Policy Support***
 Government-led initiatives such as production-linked incentive schemes, along with policies like 'Make in India' and 'Digital India', streamline the setup process for manufacturing units in the country. Moreover, a favourable Foreign Direct Investment (FDI) policy further facilitates the establishment of manufacturing facilities in India.
- Increasing Investments***
 In the wake of the COVID-19 pandemic, India aims to bolster its contribution to the electronics industry by approximately US\$ 400 billion, including exports valued at US\$ 120 billion. This ambitious goal aims to solidify India's position within global value chains, accounting for 9-10% of the total global value chains in the electronics sector.

BUSINESS STRATEGY

1. *To increase brand visibility*

The market for our products is highly competitive on account of both the organized and unorganized players. Our market goodwill is significantly dependent on brand recall and our ability to compete effectively would significantly depend on our ability to promote and develop our brand. We propose to increase the number of dealers in order to broaden our reach. We believe greater visibility of our brand would ensure brand retention in the minds of the customers and would in effect further enhance our reach.

2. *Improve Sales*

We currently sale through 206 stores spread across Gujarat and Maharashtra. Our plan is to improve the sales by opening retail stores in Tier 2 and Tier 3 towns. This will enable us to grab better market size. Our Company further intends to reduce the overhead costs which will spread out over time. Further, in advent of the post-GST era and implementation of e-way bill, the consumer electronics retail industry which is largely dominated by unorganized players will witness some shift towards organized and established players, increasing their focus on lower middle-class segment.

3. *Leveraging our market skills and relationship*

The business of our Company is customer oriented and always strives to maintain good relationship with the customers. Leveraging our market skills and relationships is a continuous process in our organization and the skills that we impart in our people give importance to customers. Our wide product range provides us competitive edge over our competitors. In order to maintain our competitive edge, we will continue to add newer products to our products portfolio.

5. *Diversification of Product Portfolio*

The diversification of the product portfolio is a key strategy for a mobile and electronic item trading company, aiming to expand beyond smartphones into a wide range of products, including mobile accessories, smart TVs, home appliances, and other consumer electronics. By offering a variety of products at different price points, from budget to premium, the company can appeal to a broad customer base. Additionally, introducing exclusive product lines, seasonal items, and bundled offers allows the company to differentiate itself from competitors, drive sales across multiple categories, and enhance customer loyalty, ultimately contributing to sustained growth and reduced dependence on a single product segment.

6. Improve Debt - Equity ratio

As on September 30, 2024, our debt - equity ratio stands at 1.58:1. We intend to repay certain amount of the loans to improve our debt equity ratio and also this will help our company to obtain working capital loans / term loans for expansion in future which will improve our operational efficiency. Goods and Service Tax Act, 2017

The Central Goods and Services Tax Act, 2017 is an Act to make a provision for levy and collection of tax on intra-State supply of goods or services or both by the Central Government and for matters connected therewith or incidental thereto. In line with CGST Act, each state Governments has enacted State Goods and Service Tax Act for respective states. Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the central and state governments on goods as services. This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services or both as part of their normal commercial activity. The mechanism provides for two level taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called as intra-state transactions, then both the CGST and SGST will be collected. Whereas if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to the destination-based taxation principle in addition to the Customs Duty which has not been subsumed in the GST.

Customs Act, 1962

The provisions of the Customs Act, 1962 and rules made there under are applicable at the time of import of goods i.e., bringing into India from a place outside India or at the time of export of goods i.e. taken out of India to a place outside India. The Restated Statement of Assets and Liabilities of the Company as on September 30, 2024, March 31, 2024, March 31, 2023 and March 31, 2022 and the Restated Statement of Profit and Loss and Restated Statements of Cash Flows for the period/year ended on September 30, 2024, March 31, 2024, March 31, 2023 and March 31, 2022 and the annexure thereto (collectively, the “**Restated Financial Statements**”) have been extracted by the management from the Audited Financial Statements of the Company.

The financial statements of the company have been prepared and presented in accordance with the Generally Accepted Accounting Principles (GAAP). GAAP comprises the Accounting Standards notified u/s Section 133 read with Section 469 of the Companies Act, 2013. The accounting policies have been framed, keeping in view the fundamental accounting assumptions of Going Concern, Consistency and Accrual, as also basic considerations of Prudence, Substance over form, and Materiality. These have been applied consistently, except where a newly issued accounting standard is initially adopted or a revision in the existing accounting standards require a revision in the accounting policy so far in use. The need for such a revision is evaluated on an ongoing basis.

The Financial Statements have been prepared on a going concern basis, in as much as the management neither intends to liquidate the company nor to cease operations. Accordingly, assets, liabilities, income and expenses are recorded on a Going Concern basis. Based on the nature of products and services, and the time between the acquisition of assets and realization in cash or cash equivalents, the company has ascertained its operating cycle as 12 months for the purposes of current and non-current classification of assets and liabilities

2. Use of estimates

The preparation of the financial statements in conformity with the generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities as at the balance sheet date, the results of operation during the reported period and disclosure of contingent liabilities as on the reporting date. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable and are in their best knowledge of current event and actions. Actual results could differ from these estimates and differences between actual results and estimates are recognized in the period in which the results are known or materialize. Significant estimates used by the management in the preparation of these financial statements include provision for employee benefits,

estimates of the economic useful life of plant and equipment, provision for expenses, provisioning for taxation etc.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue Recognition

- a) Revenue is recognized to the extent that is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.
- b) Revenue from sale of goods is recognized when the significant risk and rewards are transferred as per the terms of sale. Revenues are recorded at invoice value. Revenue are stated at net of returns, trade discounts and taxes like GST, TCS, etc.
- c) Income in respect of interest, incentives, etc. is recognized to the extent the company is reasonably certain of its ultimate realization.

2. Inventories

Inventories comprising stock-in-trade are valued at lower of cost or net realizable value. Cost here represents landed cost including custom duty in case of imports and is net of duty which is cenvatable or refundable. Cost of inventories is determined on FIFO basis. Net realizable value is the estimate of the selling price in the ordinary course of business less further cost expected to be incurred for its completion and disposal.

3. Foreign Currency Transaction:

- a) Foreign currency transactions are recorded at the exchange rates prevailing on the date of the transaction.
- b) Short term monetary items denominated in foreign currencies (such as cash, receivable, payable etc.) outstanding at the year end, are translated /re-converted at the year-end exchange rate unless covered by a forward contract.
- c) Any gain or loss arising on settlement and / or translation of short-term monetary transaction in foreign currency is accounted for in the statement of Profit and Loss.

4. Employee Benefits

- Defined Benefit Plans

For Defined Benefit Plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at the date of each statement of financial position.

The retirement benefit obligations recognised in the statement of financial position represents the present value of the defined benefit obligations reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

5. Borrowing Costs

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production

of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

6. Accounting for Taxes on Income

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

- a) Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.
- b) Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

The carrying amount of deferred tax assets are reviewed at each reporting date. The company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

7. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, share split and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

8. Property, Plant and Equipment

Property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment losses. The initial cost of a property, plant and equipment comprises its purchase price, any costs directly attributable to bringing the property, plant and equipment into the location and condition necessary for it to be capable of operating in the manner intended by management.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement

of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in statement of profit and loss.

The Company provides depreciation on items of property, plant and equipment on Straight Line Method (SLM) Method based on useful life specified as below:

Asset	Useful Life (in years)
Building	60
Furniture & Fixtures	10
Electric Installations & Equipment	10
Motor Vehicle	10
Office Equipment	5
Computer	3

Depreciation amount for asset is the cost of an asset less its estimated residual value. In case of impairment, depreciation is provided on revised carrying amount over its remaining useful life.

9. Intangible assets

Intangible assets are stated at cost of acquisition net of recoverable taxes less accumulated amortisation/depletion. All costs, including financing costs till commencement of commercial production, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the intangible assets are capitalised.

Amortisation of Intangible assets is calculated on Straight Line Method (SLM) Method based on useful life specified as below:

Asset	Useful Life (in years)
Computer Software	3
Trademark	5

10. Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognized only when there is a present obligation as a result of past events and when a reliable estimate of the amount of obligation can be made.

Contingent Liability is disclosed for:

- Possible obligation which will be confirmed only by future events not wholly within the control of the Company, or
- Present obligations arising from the past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.
- A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.
- Contingent Assets are not recognized in the financial statements since this may result in the recognition of income that may never be realized.

11. Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

12. Segment Accounting

Business Segment

- a) The business segment has been considered as the primary segment.
- b) The Company's primary business segments are reflected based on principal business activities, the nature of service, the differing risks and returns, the organization structure and the internal financial reporting system.

Revenue from Operation

Revenue from operations increased by 57.14%, from ₹21,211.05 lakhs in fiscal 2022 to ₹33,330.66 lakhs in Fiscal 2023. This growth was primarily driven by the company's strategic expansion, which included the opening of new retail stores by broadening its presence in diverse locations.

In the electronic goods trading industry, a company's revenue from operations can be improved by strategically identifying potential marketplaces at various locations and opening new retail stores in these areas. Each new retail stores are opened considering the following factors:

- By identifying locations with high demand for electronic products, our company can place retail stores where customers are most likely to purchase. These areas may include growing urban centers or underserved regions.
- Opening retail stores in varied locations helps our company expand its market reach. We diversify our customer base, reduces dependence on a single market, and enables our brand to capture new segments of consumers who might not have access to our products otherwise.
- Each new retail store serves as a touchpoint for our company to penetrate different local markets, enhancing brand visibility and accessibility. The physical presence in diverse locations often boosts brand recognition and consumer loyalty.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public Issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing would continue to be six working day.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public offers, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. However, the time duration from public Issue closure to listing would continue to be six working days during this phase.

Phase III: Pursuant to SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, Phase III has been notified, and accordingly the revised timeline of T+3 days has been made applicable in two phases i.e., (i) voluntary for all public issues opening on or after September 1, 2023; and (ii) mandatory on or after December 1, 2023. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Circular, once Phase III becomes applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post – issue LM will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI.

Our Company will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The DPIIT, issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident outside India) Regulations 2017. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.
