 DECLARATION 4

SECTION III – RISK FACTORS

1. ***Our Company has acquired the business of M/s MNT Technologies (sole - proprietorship firm of one of our Promoters) thus we have limited operating history as a Company. Our limited history as a Company can make it difficult for investors to evaluate our historical performance or future prospects and any future acquisition(s) can result in operating difficulties, integration issues and other adverse consequences.***

Our Company was originally incorporated on June 26, 2023 as “Nanta Tech Private Limited” under the Companies Act, 2013 with Registrar of Companies, Central Registration Centre through a certificate of incorporation dated June 26, 2023. Our Company acquired M/s MNT Technologies, sole-proprietorship firm of one of our Promoters i.e., Mansiben Mayankkumar Jani on February 20, 2024. Our Company has very limited operating history which may make it difficult to evaluate our business, future prospects and viability. For the financials of the past periods prior to February 20, 2024 we have restated the financials of MNT Technologies. Our present business was earlier carried out by the proprietorship firm i.e. MNT Technologies which has been acquired by our Company. Although the proprietorship firm has shown growth in the past but there is no assurance that this growth will continue in future.

This acquisition has helped our Company to acquire an existing business. Before this acquisition our Company was not operating in any business. However, in future we may not be able to identify suitable acquisitions/opportunities, or adequately priced acquisitions, entering into agreement with such parties or obtaining the necessary financing to make such acquisitions. This may adversely affect our future growth. Further, any future acquisition(s) may not be beneficial to our Company as we may have to pay a premium to acquire any business which may be higher than the value of those firms / businesses / companies.

Our business exposes us to a wide range of risks. Future growth in business, if any, will also place significant demands on our management, finances and other resources and will require us to continuously improve our operational, financial and internal controls. There can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits in terms of growth and profitability. Further, we may be unable to develop adequate systems, infrastructure and technologies, devote sufficient financial resources or develop and attract talent to manage our growth. Our inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects.

Our future revenues and profitability are difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may be volatile. We may not be able to increase revenue or maintain profitability on a half yearly or an annual basis. If this occurs, our results of operations and financial condition will be adversely affected.

For further details, see the chapter titled “History and Certain Corporate Matters” and “Restated Financial Statements” on page 173 and 197 respectively.

15. ***Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.***

As per our Restated Financial Statements, our cash flows from operating, investing and financing activities are as set out below:

(₹ in Lakhs)

Particulars	For the Financial Year ended on		
	March 31, 2025	March 31, 2024	March 31, 2023
Net Cash Generated/(Used) from Operating Activities	(186.24)	19.61	85.59
Net Cash Generated/(Used) from Investing Activities	(209.15)	0.00	(2.70)
Net Cash Generated/(Used) from Financing Activities	379.57	0.98	(93.38)

For further details and reasons of such negative cash flow, please see chapter titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 245.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

SECTION III – RISK FACTORS

An investment in Equity Shares involves a high degree of financial risk. Investors should carefully consider all information in this Draft Red Herring Prospectus, including the risks described below, before making an investment in our Equity Shares. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could suffer, the price of the Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Issue. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Any of the following risks, as well as the other risks and uncertainties discussed in this Draft Red Herring Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment.

This Draft Red Herring Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. See chapter titled “Forward Looking Statements” beginning on page 21.

To obtain a better understanding of our business, you should read this chapter in conjunction with other chapters of this Draft Red Herring Prospectus, including the chapters titled “Our Business”, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, “Industry Overview” and “Restated Financial Statements” on page 133, 245, 118 and 197 respectively of this Draft Red Herring Prospectus, together with all other Restated Financial Statements contained in this Draft Red Herring Prospectus. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus.

Unless otherwise stated, the financial data in this chapter is derived from our Restated Financial Statements for the financial years ended March 31, 2025, 2024 (Consolidated financials of M/S MNT Technologies and Nanta Tech Limited) and 2023 (M/s MNT Technologies) as included in “Restated Financial Statements” beginning on page 197.

MATERIALITY

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- Some events may have material impact quantitatively;
- Some events may have material impact qualitatively instead of quantitatively.
- Some events may not be material individually but may be found material collectively.
- Some events may not be material at present but may be having material impact in future.

BUSINESS RELATED RISKS

- 1. *Our Company has acquired the business of M/s MNT Technologies (sole - proprietorship firm of one of our Promoters) thus we have limited operating history as a Company. Our limited history as a Company can make it difficult for investors to evaluate our historical performance or future prospects and any future acquisition(s) can result in operating difficulties, integration issues and other adverse consequences.***

Our Company was originally incorporated on June 26, 2023 as “Nanta Tech Private Limited” under the Companies Act, 2013 with Registrar of Companies, Central Registration Centre through a certificate of incorporation dated June 26, 2023. Our Company acquired M/s MNT Technologies, sole-proprietorship firm of one of our Promoters i.e., Mansiben Mayankkumar Jani on February 20, 2024. Our Company has very limited operating history which may make it difficult to evaluate our business, future prospects and viability. For the financials of the past periods prior to February 20, 2024 we have restated the financials of MNT Technologies. Our present business was earlier carried out by the proprietorship firm

i.e. MNT Technologies which has been acquired by our Company. Although the proprietorship firm has shown growth in the past but there is no assurance that this growth will continue in future.

This acquisition has helped our Company to acquire an existing business. Before this acquisition our Company was not operating in any business. However, in future we may not be able to identify suitable acquisitions/opportunities, or adequately priced acquisitions, entering into agreement with such parties or obtaining the necessary financing to make such acquisitions. This may adversely affect our future growth. Further, any future acquisition(s) may not be beneficial to our Company as we may have to pay a premium to acquire any business which may be higher than the value of those firms / businesses / companies.

Our business exposes us to a wide range of risks. Future growth in business, if any, will also place significant demands on our management, finances and other resources and will require us to continuously improve our operational, financial and internal controls. There can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits in terms of growth and profitability. Further, we may be unable to develop adequate systems, infrastructure and technologies, devote sufficient financial resources or develop and attract talent to manage our growth. Our inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects.

Our future revenues and profitability are difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may be volatile. We may not be able to increase revenue or maintain profitability on a half yearly or an annual basis. If this occurs, our results of operations and financial condition will be adversely affected.

For further details, see the chapter titled “History and Certain Corporate Matters” and “Restated Financial Statements” on page 173 and 197 respectively.

2. We are highly dependent on certain customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations.

We depend on certain customers who have contributed to a substantial portion of our total revenues. The table below sets forth the revenue derived from our top 10 customer, top 5 customers and top 1 customer during the respective financial years:

(₹ in Lakhs)

Particulars	For the Year ended					
	2024-25		2023-24		2022-23	
	₹ in Lakhs	%	₹ in Lakhs	%	₹ in Lakhs	%
Top 10 customers	4,711.35	91.95%	2,143.13	80.58%	813.55	85.12%
Top 5 customers	3,941.66	76.93%	1,791.50	67.36%	732.77	76.67%
Top 1 customer	1,271.27	24.81%	580.93	21.84%	602.56	63.05%

As certified by Statutory Auditor of our Company, by way of their certificate dated September 22, 2025.

Our success is contingent upon our ability to retain our existing customer base, attract new users, and maintain or increase the level of engagement with the Audio-Video (AV) products we offer, which include indoor and outdoor active LED screens, professional display screens (both touch and non-touch), digital signage displays, digital podiums, video conferencing cameras, processors, media players, speakers, microphones, amplifiers, unified communication (UC) devices as well as mounts, cables, and other related accessories, as well as our tailored AV solution for customized AV solutions for corporates, education, hospitality and manufacturing industry and others, Service robots and Software Development related services. There is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. Reliance on a limited number of customers for our business may generally involve several risks. The reason behind concentration in top 10 customers is our dealer & distribution channel under which we appointed a various dealers and distributors who majorly keeps stock for us and is given annual targets and responsibilities to grow our brand across various regions responsible for range of functions like procurement, logistics, technical support, and marketing of the company. Additionally, for ease of doing business and communication with our clientele over different regions, these dealers also represent our company and engage with them as and when required by us. Hence, our dealers and distributors are the major customers as depicted above.

These risks may include, but are not limited to, reduction, delay or cancellation of orders from our significant customers; failure to renegotiate favourable terms with our key customers; the loss of these customers; all of which would have a material adverse effect on the business, financial condition, results of operations and future prospects of our Company. In order to retain some of our existing customers we may also be required to offer terms to such customers which we may place restraints on our resources.

Maintaining strong relationships with our key customers is, therefore, essential to our business strategy and to the growth of our business. Some of these customers have been associated with us for the past three years. Some of our customers may place demands on our resources or may require us to undertake additional obligations which have the effect of increasing our operating costs and therefore affect our profitability. Additionally, the loss of any key customer, may significantly affect our revenues, and we may have difficulty securing comparable levels of business from other customers to offset any loss of revenue from the loss of any of our key customers including our largest customer or even our top five customers. If one or more of our customers were to become insolvent or otherwise unable to pay for the products supplied by us, this could have a have an impact on our business as we may not be able to recoup the unpaid production costs and materials incurred for operation purposes. While we have not encountered any loss of any major customers in the last three Fiscals, there can be no assurance that we would not lose any of our major customers in the future. Any loss of our major customers may reduce our sales and affect our estimates of anticipated sales, and may have an adverse effect on our business, results of operations, financial condition and cash flow. Further pricing pressure from customers may adversely affect our gross margin, profitability and ability to increase our prices, which in turn may materially adversely affect our business, results of operations and financial condition.

3. *Our business and profitability heavily rely on the consistent and timely availability of products. Any disruption in supply or price volatility of these products can negatively impact our operations and financial health. Additionally, our dependence on third-party manufacturers/suppliers/vendors, without firm supply commitments or exclusive arrangements, poses a risk. The loss of any suppliers could adversely affect our business, operational outcomes, and financial condition.*

Our Company is engaged in the business of Audio Visual (AV) integration, supply and distribution of AV Products, Service Robots and Software Development related services. We provide comprehensive, end-to-end AV integration solutions which includes everything from system design, integration and management to on-site support. We are offering our customized solution to various sectors. Our offerings play a vital role in driving digital transformation across sectors.

The products we use are obtained from our global suppliers/ manufacturers or domestic vendors. There is a risk that these products may not meet the specified terms and conditions or performance standards, which could disrupt our business operations and damage our brand value. The success of our business operations is critically dependent on the availability of these finished products from our third-party global suppliers/manufacturers and domestic vendors. A substantial portion of the company's purchases of Audio-Video (AV) products has been dependent upon a few suppliers. Our inability to obtain good products in a timely manner, in sufficient quantities could adversely affect our operations, financial condition and/or profitability. Further our company imports products from global brands. However, this import comes with several risks. Any deterioration in India's trade relations with these countries, or challenges faced by suppliers in their respective regions, could disrupt our supply chain, impacting our profitability. Purchases made from our top 10 suppliers for the financial year ended March 31, 2025, 2024 and 2023, were ₹ 4,287.21lakhs, ₹ 1,827.30 lakhs and ₹ 550.94 lakhs representing 95.91%, 91.12% and 77.09% of our total purchases.

We outsource the manufacturing of robots through third-party manufacturers and procure other products for sale from suppliers/vendors with whom we do not have any long-term agreements. Our reliance on third-parties subjects us to various risks, including:

- dependence on relationships with third party manufacturers/suppliers/vendors, particularly for continuity of supply of products to us;
- changes in cost of acquisition of our products from such manufacturers/suppliers/vendors which would directly affect our profit margins and selling prices of our products;
- despite quality control exercised by us, there is dependence on quality control systems and processes of such manufacturer;
- We do not have any long-term agreements/contracts with such manufacturers/suppliers/vendors. We may be unable to replace our existing manufacturers/suppliers/vendors at short notice, or at all, and may face delays in supplies and added costs as a result of the time required for identifying new manufacturers/suppliers/vendors for supplies in accordance with our standard processes and quality control standards;
- dependence on third party manufacturers/suppliers/vendors, are subject to customary operational risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, unavailability of consumables and spare parts, labour disputes, natural or man-made disasters, accidents, planned or unplanned shutdowns, and compliance with relevant government regulations;
- failure to comply with various product-related regulations and laws in India, including those related to the product registration, product ingredients, health and safety, manufacturing standards, labelling declaration standards, environmental and waste management including plastic management, public disclosure, product testing and storage;
- compliance with the evolving regulatory and policy environment in which we operate;
- adverse changes in the financial or business condition of our manufacturers/suppliers/vendors; and

- delays in delivery and shipment;

Our manufacturers/suppliers/vendors do not supply products exclusively for us and accordingly, may choose to supply products for other parties, including our competitors, at any time, which may lead to conflicts of interest. In addition, they may also supply products identical to ours and we may not be able to prevent the same. This may adversely affect our business, results of operations, financial condition and cash flows. However, our Company confirms that no such instance has occurred in the past which have adversely affected the Company's business.

Any disruptions in the supply chain such as delays in manufacturing, transportation issues, or shortages of key components could hinder our ability to deliver products to our customers in a timely manner. This could lead to unfulfilled orders, customer dissatisfaction, and potential loss of market share. Price volatility of AV products, driven by factors such as fluctuations in raw material costs, changes in international trade policies, or currency exchange rate movements, could also adversely affect our cost structure and profitability. Sudden increases in the cost of acquiring these products may reduce our profit margins, especially if we are unable to pass on these costs to our customers through price adjustments.

Our business model depends on third-party global and domestic suppliers, with whom we do not have long-term or exclusive agreements but procure the products on order basis or short-term arrangement basis. This reliance exposes us to potential supply chain disruptions. If any key suppliers were to reduce or stop supplying products, or prioritize other customers, we may struggle to source comparable alternatives at similar costs or within required timelines. Identifying new suppliers could be both time-consuming and expensive, leading to operational delays. The loss or reduced availability of products from major suppliers could compel us to find alternatives at higher costs or potentially lower quality, adversely affecting our operations, profitability, and financial health. These disruptions may weaken our competitive position and hinder our long-term growth prospects. While we have not experienced any interruptions in the supply of finished products in previous three financial years, we cannot assure you that such instance will not arise in the future.

4. *Our future growth is dependent upon our ability to identify and maintain new products, technologies and customers that achieve market acceptance with acceptable margins.*

Our Company is engaged in the business of Audio Visual (AV) integration, supply and distribution of AV Products, Service Robots and Software Development related services. We provide comprehensive, end-to-end AV integration solutions which includes everything from system design, integration and management to on-site support. Thus, the markets in which we compete are characterized by changing consumer tastes, preferences, evolving industry standards and continuous improvements in product quality and variants. Our future success depends on our ability to timely identify & upgrade our self with competitive and innovative products and to market them quickly and cost effectively. If the end-user demand is low, we may see significant changes in orders from our customers and may experience greater pricing pressures. Our ability to anticipate customer needs and develop or acquire new products at competitive prices requires significant resources. The failure to successfully address these challenges could materially disrupt our sales and operations.

In case of any mismanagement in level of inventory and market demand, we may lose customers and be required to discount certain products, all of which could have an adverse effect on our business, results of operations, financial condition, cash flows and prospects. Decline in the demand for some of the products without a corresponding increase in demand for alternative products sold by us could negatively impact our revenue temporarily or permanently. These trends may also cause fluctuations in our results of operations between different periods. Our success is also dependent on the ability of our global suppliers/manufacturers or domestic vendors to anticipate, identify and respond to the latest technological trends and customer demands and to translate such trends and demands into product offerings in a timely manner, adapt to customer preferences, and our ability to continue upgrading our platforms in a manner so as to cater to evolving customer preferences.

5. *Our business is dependent on global suppliers/manufacturers effectively maintaining, promoting or developing their brands and maintaining standard quality products including launching new AV (Audio-Video) products and service robots at regular intervals.*

Maintaining, developing, and enhancing brands, as well as retaining customers, involves several critical factors, such as increasing brand awareness through brand-building initiatives and ensuring customer satisfaction with quality customer service. If global suppliers/manufacturers cannot adapt to technological advancements or the growing popularity of alternative products, their products may become obsolete. To remain competitive, global suppliers/manufacturers need to develop, test, manufacture, and commercialize new products promptly.

Since we do not manufacture the products, we cannot assure that these global suppliers/manufacturers will effectively promote, develop their brands, or maintain product quality. If these brands fail to launch new products or innovate to meet evolving customer demands, the demand for their products may decline. In such situations, we endeavour to liquidate our inventory early or return products to the global suppliers/manufacturers to reduce write-downs. However, we may not always find customers or dealers willing to purchase our inventory of products that lack market demand. A slowdown in

demand for existing products could result in a write-down in the value of our inventory. We are not involved in the innovation or quality control of products manufactured by the global suppliers/manufacturers we distribute. However, if any of the products we distribute do not meet quality and performance standards or customers' expectations, our reputation and customer retention may suffer, and the demand for such products may decrease. If we fail to maintain our reputation or increase positive awareness of AV (Audio-Video) products and automation solutions and utilisation of service robots or if the quality of products declines due to our global brand partners' inability to maintain required standards, our business, financial condition, and results of operations may be adversely affected. While we have not experienced any such event in the past three Fiscals, we cannot assure you that such instance will not arise in the future.

6. ***Our Company, Promoters, Directors, KMP and SMP are involved in certain legal proceedings and litigations. Any adverse decision in such proceedings may render us/them liable to liabilities/penalties which may adversely affect our business, financial condition and results of operations.***

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

Further, as on the date of this Draft Red Herring Prospectus, our Promoters and Promotor Group have confirmed that there are no instances where any First Information Report (FIR) has been registered against them, and no chargesheet has been filed by any investigating authority. They have further confirmed that they have not been subjected to any preventive action under the Code of Criminal Procedure, 1973, nor have they received any formal warning, notice, or been required to execute any bond for maintaining peace or good behavior by any law enforcement authority.

While these confirmations demonstrate a clean legal record as on the date hereof, there is no assurance that no such proceedings or preventive actions will arise in the future. Any initiation of legal or regulatory proceedings, could adversely affect the reputation of our Promoters and Promotor Group and, consequently, impact investor confidence and our business operations. For further details of certain material legal proceedings involving our Company, our Promoters, our directors, see “*Outstanding Litigations and Material Developments*” beginning on page 259.

7. ***Our revenue is heavily reliant on our operations within certain geographical regions. Any adverse developments, such as economic downturns, political instability, or natural disasters, in these regions could significantly impact our revenue and overall financial performance. Additionally, any disruption, breakdown or shutdown of our operating facilities concentrated in Gujarat, may also have a material adverse effect on our business, financial condition, results of operations and cash flow.***

We have derived a significant portion of our revenue from operations from customers located in certain geographical regions especially Gujarat. The following table sets forth our revenue from the major customers located in Gujarat and other regions for the years indicated, which are also expressed as a percentage of our total revenue from operations:

(₹ in Lakhs)

Particulars	For the Year ended					
	March 31, 2025		March 31, 2024		March 31, 2023	
	Amount	%	Amount	%	Amount	%
Revenue from the customers located in Gujarat	4,492.02	87.67%	2,457.96	92.42%	843.95	88.30%
Revenue from the customers located in Karnataka	228.64	4.46%	3.08%	0.12%	0.11	0.01%
Revenue from the customers located in Madhya Pradesh	180.33	3.52%	173.77	6.53%	19.88	2.08%

As certified by Statutory Auditor of our Company, by way of their certificate dated September 22, 2025.

The concentration of our revenues from Gujarat and above-mentioned regions heightens our exposure to adverse developments related to competition, as well as economic, political, regulatory circumstances including on account of any on-going economic slowdown and inflationary trends. The existing and potential competitors to our businesses in India may increase their focus in the said region, which could reduce our market share. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. While we have not experienced any such event in the past three Fiscals, we cannot assure you that such instance will not arise in the future.

Further expansion into new geographic regions, including different states in India and overseas expansion, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including, laws and regulations, uncertainties and customer’s preferences, political and economic stability. By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

Our operations are concentrated in Ahmedabad, Gujarat. Our Registered Office, godown and experience centre are located in Ahmedabad. We do not have any other office, own facilities in any other place. Any event impacting state of Gujarat may disrupt our operations. Further, our operations are subject to operating risks, such as the breakdown or failure of infrastructure facilities, disruption in power supply or processes, severe weather conditions, staff disputes, natural disasters, infectious diseases (such as COVID-19 pandemic), political instability, the need to comply with the directives of relevant Government authorities and the requirement to obtain certain material approvals to operate our facilities as our operations are concentrated in one place. We do not have any alternative facilities to supply from any other place.

8. *Majority of our revenue from operation is derived from one segment i.e. providing Audio-Video Solutions to our clients. Any disruption in the continuous supply from our vendors would have a material adverse effect on our business, results of operations and financial.*

Our Revenue is majorly generated from providing Audio-Video Solutions to our clients. Our revenue from this segment, contributed 75.86%, 77.77%, and 84.42% of our total revenue from operations for the financial year ended March 31, 2025, 2024 and 2023, respectively.

Our revenues may be adversely affected on account of any downward trend in the demand. Our sales and margins from this segment may decline due to various factors including increased competition, pricing pressures or fluctuation in the demand or supply from vendors of these products. While we have not experienced any decrease in demand or supply from vendors in the past three Fiscals, there can be no assurance that we will not experience any decrease in demand of our product categories in lighting products, which may adversely affect our business, financial condition, cash flows and results of operations. We are dependent on this segment for our major business. Although, recently we have also added service robots in our product portfolio to expand our business. Any adverse disruption due to lack of repeat and new orders, competition from our competitors, in future, may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

9. *We could be subject to product liability claims, refunds and recalls or return of products, warranty claims which may have a material adverse impact, in which case our business and revenues, and ultimately our reputation, could be negatively affected.*

Due to the nature of our business, we face a risk of the products containing quality issues or undetected errors or defects. These may result from the design or manufacture of the product or other parts used in the product, over which we have no control. We may face the risk of legal proceedings and claims being brought against us by our customers on account of sale of any defective products. While the suppliers/manufacturers/OEMs are accountable for defective products, our ability to avoid such liabilities may be limited as a result of differing factors, such as the inability to exclude such damages due to applicable laws of the specific jurisdiction where the business is conducted. Our business and reputation may be adversely affected as a result of a significant quality or performance issue in the products sold by us, if we are required to pay for the associated damages. Further, when relying on contractual liability exclusions, we could lose customers if their claims are not addressed to their satisfaction. In addition, serious quality issues can expose us to product liability or recall claims in the event that the products we distribute fail to meet the required quality standards, or are alleged to cause harm to customers. While we have not experienced any such event in the past three Fiscals, we cannot assure you that such instance will not arise in the future.

While we are generally not held accountable for such claims, we may face the risk of legal proceedings and product liability claims being brought against us, legitimate or otherwise, by various entities including consumers, dealers and corporates for various reasons including for defective products sold. There can be no assurance that we will be able to recover cost of such liability or recall from the global suppliers/manufacturers of such products, in a timely manner, and without initiating legal proceedings. Enforcement of provisions in our agreements that hold global suppliers/manufacturers liable for defective products can be a time-consuming and expensive legal process. A product recall or a product liability claim may also adversely affect our reputation and brand image, as well as entail significant costs in excess of our available insurance coverage, which may adversely affect our reputation, business and results of operations.

10. *We may face the risk of becoming obsolete due to rapid technological changes.*

Our company engaged in AV integration and robotics, we operate in a rapidly evolving industry characterized by continuous technological innovation, emerging standards, and shifting regulatory landscapes. The effectiveness of our services depends significantly on staying ahead of these changes, adapting our strategies, and investing in cutting-edge tools and technologies.

We operate in an industry that is constantly evolving, driven by rapid advancements in technology and shifting regulatory landscapes. The effectiveness of our services depends significantly on staying ahead of these changes, adapting our strategies, and investing in cutting-edge tools and technologies. If we fail to anticipate and adapt to these changes promptly,

our ability to deliver optimal results may be compromised, leading to potential dissatisfaction among our clients and a loss of business. Furthermore, the increasing adoption of AI, machine learning, and automation in robotics and control systems demands ongoing investment in R&D, workforce training, and the modernization of our integration methodologies. If we do not invest in upgrading our technology stack, integrating AI-powered solutions, and training our team on the latest industry advancements, we risk falling behind our competitors. To mitigate these risks, we must continuously innovate, invest in new technologies, and enhance our expertise in emerging trends. Additionally, staying updated on regulatory changes and ensuring compliance will be crucial in maintaining trust with our clients and sustaining long-term growth. Failure to proactively address these evolving challenges could lead to reduced campaign effectiveness, lower client retention, increased operational costs, and ultimately, a negative impact on our financial performance.

11. *The industry in which we operate possess various risks and challenges could have a material adverse effect on our business, financial condition, cash flow, and results of operations.*

The AV integration and robotics industries are subject to rapid technological change, complex project requirements, evolving customer expectations, and increasing regulatory oversight. These dynamics introduce several inherent risks and challenges that could have a material adverse effect on our business, financial condition, cash flows, and results of operations. We may face followings risk and challenges:

- **Technological Obsolescence:** Continuous advancements in automation, smart systems, and control technologies require ongoing investment in research, training, and infrastructure. Failure to keep pace with innovation may result in the delivery of outdated or non-competitive solutions.
- **Integration Complexity:** AV and robotics solutions often involve complex systems that must be seamlessly integrated with infrastructure or third-party platforms. Any failure in integration, configuration, or performance optimization could lead to project delays or customer dissatisfaction.
- **Supply Chain Disruptions:** Our reliance on domestic and global suppliers for components such as LED screens, digital podiums, video conferencing cameras, processors, media players, speakers, microphones, amplifiers, unified communication, hardware of service robots exposes us to risks from geopolitical tensions, import/export restrictions, and supply shortages. Any disruption can delay delivery schedules and impact project execution.
- **Regulatory Compliance:** Robotics and AV systems are increasingly subject to regulations concerning safety, data privacy, electromagnetic compatibility (EMC), and accessibility standards. Non-compliance with such regulations can result in legal penalties, loss of certifications, or customer rejections.
- **Cybersecurity and Data Integrity:** As AV and robotics systems become more interconnected and IoT-enabled, the risk of cyber threats and data breaches increases. A security failure could damage customer trust, lead to liability claims, and affect business continuity.
- **Project-Based Revenue Model:** Our revenues are often tied to large-scale, milestone-based projects. Delays in client approvals, scope changes, or payment cycles can strain working capital and adversely impact cash flows.
- **Talent Acquisition and Retention:** A shortage of skilled professionals in robotics, control systems, AV programming, and automation can limit our capacity to scale or fulfil technically demanding projects, thereby impacting growth and service quality.

If we are unable to effectively manage these risks through strategic planning, continuous innovation, regulatory compliance, and operational excellence, we may face reduced market competitiveness, customer attrition, increased costs, and long-term financial impact.

12. *Restrictions on import may adversely impact our business, cash flows and results of operations.*

We have done imports from China and Hong Kong. Any change in government policy for import or sourcing of such items like imposition of minimum domestic content, increase in customs duty, anti-dumping duty, import restrictions, etc may have a material adverse effect on our profitability and results of operations. During the Fiscal 2024 and 2023, the import purchases accounted for 1.88% and 17.73% of total purchases in the respective years.

However, the greater impact of any change in Government policy on a minimum domestic raw material content in the Service Robots or in any of the other products sold by us would be on our service robots as they are currently imported from China. In a situation of change in Government policies, we will have to explore options of procuring the same from

other countries and domestically and the same may have an impact on the business/financials and profitability of the Company.

- 13. *Our business and results of operations are dependent on the contracts/purchase orders that we enter into. Our Company has not entered into any long-term contracts with our customers and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow and any breach of the conditions under these contracts/ purchase orders may adversely affect our business and results of operations.***

We have not entered into any fixed contracts with our customers and we cater to them on an order-by-order basis. Generally, we enter into project-based contracts. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. We enter into contracts and purchase orders with our customers which, depending on the customer, may contain terms and conditions which include among others the nature and specification of products to be supplied by us, details of vendors that are approved by some of our customers, manner of inspection and testing of products representation and warranties, process to be followed in case of defects, steps to ensure compliance with applicable laws, quality of products, undertakings in relation to protection of intellectual property of our customers, indemnification of our customers due to our negligence or breach of any term of the agreement, defect warranties in relation to the products supplied by us. Such onerous terms may have an effect on our future growth including expansion of customer base. This may result in potential loss of customers as we may not be able to provide our services to such customers in the future as we may not be willing to work with them. Additionally, non-compliance with the terms of the contractual arrangements may lead to among others damages or penalties, termination of the agreements and will also result in us being unable to attract further business in the future.

Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, quality consistency, fluctuation in demand for our Company's products and customer's inventory management. Although we place a strong emphasis on quality, pricing and timely delivery of our products and after sales service such as feedback on the trends in their market, personal interaction by the top management with the customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

- 14. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by a public financial institution or a scheduled commercial bank and our management will have broad discretion over utilization of the Net Proceeds.***

We intend to use Net Proceeds towards meeting the funding capital expenditure requirements of our company towards purchasing an experience centre cum product display area; Funding Working Capital Requirements of our Company and General corporate purpose. Our proposed deployment of Net Proceeds has not been appraised by a public financial institution or a scheduled commercial bank and is based on management estimates. Further the deployment of the Net Proceeds will be at the discretion of our Board and the management of our Company will have significant flexibility in applying the proceeds received by our Company from the Issue in compliance with companies act and other rules and regulations. However, audit committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue and as per regulation 262(5) of SEBI ICDR regulations 2018, we shall submit a certificate of the statutory auditor for utilization of money raised through the public issue to exchange while filing the quarterly financial results, till the issue proceeds are fully utilized.

Further in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard. Various risks and uncertainties, including those set forth in this section including inability to obtain necessary approvals for undertaking proposed activities, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. We cannot assure you that use of the Net Proceeds to meet our future capital requirements, fund our growth and for other purposes identified by our management would result in actual growth of our business, increased profitability or an increase in the value of our business and your investment.

- 15. *We do not own the registered office, godown and experience centre from which we carry out our business activities. In case of nonrenewal of rent agreements or dispute in relation to use of the said premise, our business and results of operations can be adversely affected.***

Our registered office, godown and experience centre from which we carry out our business activities, are being taken by us on rent. In the event of termination/ non-renewal of said agreements, we may be required to vacate the said premises which

may cause disruption in our corporate affairs and business and impede our effective operations which could temporarily impact on our business operations until we get suitable alternative premises. For details on the duration of existing rent/ lease agreements for our premises, please refer to the section titled “*Our Business*” beginning on page 133 of this Draft Red Herring Prospectus. There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our business operations which could materially and adversely affect our business, financial condition and results of operations.

16. *Any disruption or shutdown of our godown, could adversely affect our business, results of operations and financial condition.*

We utilize godown located at 30, Arbuda House, Gst Road, Ranip, Ahmedabad, Gujarat - 382480. For further details, please refer to the section titled “*Our Business*” beginning on page 133. This facility serves as a crucial storage hub for our products. We manage our inventory within this godown and fulfil customer orders by transporting products directly from these locations. While we diligently monitor inventory levels and maintain oversight of warehouse capacity and utilization, any unforeseen disruptions or shutdowns at our godown beyond our control could severely impact our supply chain and operational capabilities. Such disruptions may hinder our ability to fulfil contractual obligations promptly, potentially exposing us to legal liabilities and claims. Further having limited storage capacity which can result in stock out cost and loss of customer adversely affecting our business and results of operations. Further Improper storage and handling of our products could damage our inventories and, as a result, have an adverse effect on our business, results of operations and cash flows.

17. *Currently our Company has only one experience centre for display of our products.*

Large Experience centres are the key growth driver in our business and ensures acquiring more customers, live demonstrations, strengthening brand image, tangible interaction with customers. These experience centre also helps in attracting a variety of customers. Currently, our Experience Centre spans 35.78 sq. mtrs. and is used to showcase our extensive range of products for AV and robotics segment, however our Company intends to setup a larger experience centre cum product display area admeasuring in built-up area of approximately 5,678 sq. ft. from IPO proceeds. For further details, see “*Objects of the Issue*” on page 93 of this Draft Red Herring Prospectus. An experience centre with appropriate space can significantly enhance our business by providing a space for meaningful dealers & distributor interactions along with other customers, strengthening the brand, and driving sales. It also offers logistical benefits and valuable market insights, contributing to the overall growth and success of the business.

18. *The Company’s customers operate in various industry segments/verticals and fluctuations in the performance of the industries in which the customers operate may result in a loss of customers, a decrease in the volume of work undertake or the price at which the company offer its products.*

The company's business is highly sensitive to the performance of the industries in which its key customers operate. When these industries experience downturns, whether due to economic slowdowns, shifts in demand, or regulatory changes, it can lead to reduced spending on services and a decline in outsourcing activities. For example, during the pandemic, industries across the board were significantly impacted by government-imposed lockdowns and restrictions. The resulting cash flow problems, combined with an uncertain economic outlook, prompted many businesses to cut costs and re-evaluate their operational priorities. This environment created a ripple effect, impacting not just the company's clients, but also its ability to secure new business or retain existing contracts, leading to decreased revenues.

When customers face financial pressure or a reduction in demand, they may scale back on their outsourcing needs or even switch to cheaper alternatives, leading to a decrease in the volume of business the company receives. This situation is particularly concerning when major clients reduce their spending or exit the market altogether, leaving the company with a significant gap in its revenue base. Moreover, in times of economic hardship, customers may also push for lower prices, further squeezing the company’s profit margins. Such disruptions in customer behaviour can cause immediate financial strain and may lead to a longer-term impact on the company’s market position, making it harder to recover or attract new business. While we have not experienced any such event in the past three Fiscals, we cannot assure you that such instance will not arise in the future.

19. *We may seek to expand our product portfolio and target emerging product areas. If such products do not witness demand that we expect them to, our business and results of operations may be adversely affected.*

We plan to target emerging AV (Audio-Video) products, AV integration segments and robotics in their developmental stages and establish product expertise allowing us to keep our broad product line current with emerging trends. For further information, see “*Our Business – Business Strategies*” on page 150. We expect that this will enable us to effectively introduce new products to our customers while simultaneously allowing us to establish a preferred position in servicing emerging global brands. Our focus on such product diversification may expose us to new operational, regulatory and market risks as well as risks associated with additional capital requirements as well as other considerable risks, including:

- our inability to integrate new operations, personnel, products, services and technologies;
- unforeseen or hidden liabilities, including exposure to lawsuits associated with new product quality and sales;
- the diversion of resources from our existing businesses;
- failure to comply with laws and regulations as well as industry or technical standards of product categories into which we seek to diversify;
- our inability to generate sufficient revenues to offset the costs and expenses behind focusing our resources on the new product categories; and
- potential loss of, or harm to employees or customer relationships.

Any of these events could disrupt our ability to manage our business, which in turn could have a material adverse effect on our financial condition and results of operations. Such risks could also result in our failure to derive the intended benefits of the product diversification, and we may be unable to benefit from such expansion initiatives, which may adversely impact our growth and prospects.

20. *Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain or increase our historical growth rates.*

Our business has experienced growth in prior periods. Our revenue from operations increased from ₹ 955.72 Lakhs in F.Y. 2022-23 to ₹ 2,659.62 Lakhs and ₹ 5,123.56 Lakhs in Financial Years 2023-24 and 2024-25, respectively. Although we plan to continue to expand our scale of operations, we may not be able to sustain or increase these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & make new customers, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, competition with other players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

21. *Any Penalty or demand raised by statutory authorities in future will affect financial position of the Company.*

In the past, our company has at several instances, delayed in filing of GST and TDS as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues and late filing penalties, if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows.

1. The details of delays in filing GST returns including period of delay, return filing date, reason for delay and steps taken by the Company to address such delays are as follows:

Financial Year	Return Type	Total Number of Establishments	Establishments with Delayed Filings	Status	
				No. of Instances	Period of Delay – (in days)
2022-23 (MNT Technologies)	GSTR-3B	1	1	8	5-70
2023-24 (MNT Technologies)	GSTR-3B	1	1	10	1-112
2024-25 (Nanta Tech Limited)	GSTR-3B	1	1	4	14-32

2022-23 Technologies)	(MNT	GSTR-1	1	1	3	31-61
2023-24 Technologies)	(MNT	GSTR-1	1	1	3	9-90
2023-24 Limited)	(Nanta Tech	GSTR-1	1	1	1	9

Due to a combination of operational and technical challenges, our company experienced delays in filing the GSTR within the prescribed timeline. The primary reasons include intermittent technical issues on the GST portal, delayed receipt of necessary input data from key vendors, and internal reconciliation processes taking longer than expected. Additionally, the transition to a new accounting system and the temporary unavailability of key compliance staff further impacted the timely filing. Recognizing the importance of timely compliance, the company has taken corrective steps, including the implementation of a more robust accounting and GST compliance software, establishing internal deadlines well ahead of the statutory due dates, and appointing a dedicated GST compliance officer to ensure better coordination and accountability. Regular internal checking and staff training have also been initiated to prevent such delays in the future.

- The details of delays in filing TDS/TCS returns including No. of Instances, reason for delay etc. and steps taken by the Company to address such delays are as follows:

Period/ Financial Year	26Q		24Q		27EQ		Payment	
	No. of Instances	Range of Delay in days	No. of Instances	Range of Delay in days	No. of Instances	Range of Delay in days	No. of Instances	Range of Delay in days
2024-25 (Nanta Tech Limited)	4	5-309	1	97	4	1-416	16	8-423
2023-24 (Nanta Tech Limited)	-	-	-	-	-	-	4	53-70
2022-23 (MNT Technologies)	2	5-114	-	-	-	-	5	11- 151

The delay in filing TDS returns was due to delays in payment data reconciliation, system transition issues, and coordination gaps between teams. To prevent future delays, the company has strengthened internal timelines, assigned a dedicated TDS compliance resource, and implemented system-based reminders for timely filing.

If we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows.

22. We are dependent on third-party transportation providers for the delivery of products supplied and distributed by us.

Our success relies on the uninterrupted supply and transportation of the products we supply and distribute. We deliver these products from our godown to our customers, substantially depending on third-party transportation and logistics providers for these deliveries. We have not entered into any long-term arrangement with these third-party transportation providers. Although we have not experienced significant disruptions in supply and transportation in the past, we cannot guarantee that such disruptions will not occur in the future due to various factors, potentially resulting in material impacts. While we do not depend on a limited number of transportation operators, transportation strikes could adversely affect our supply chain and delivery schedules. Additionally, products may be lost or damaged in transit due to accidents or natural disasters, and delivery delays may negatively impact our business and operational results. Failure to deliver our products efficiently and reliably could adversely affect our business, financial condition, and results of operations.

23. Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuation.

Our Company procures AV products and service robots from international market as per the need. We are exposed to fluctuations in the prices of these products as well as their unavailability. We may be unable to control the factors affecting the price at which we procure the products. We also face the risks associated with compensating for or passing on such increase in our cost of products on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of products may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial

condition and results of operations. Our Company is involved in business transactions with international suppliers and has to conduct the same in accordance with the rules and regulations prescribed under FEMA. Our Company may fail to adhere to the prescribed timelines and may be required to pay penalty to the appropriate authority or department to regularize the payment. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it may adversely affect our business, results of operations, financial conditions and cash flows.

24. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

Our operations are subject to accidents which are inherent to any business such as risks of employee accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including accidents that may cause injury and loss of life, severe damage to and the destruction of property, equipment and environment. Our significant insurance policies consist of Bharat Sookshma Udyam Suraksha and Burglary Insurance Policy to protect the stock against fire, natural calamities, terrorism and to protect the stock from burglars or thief. While our existing insurance provides a level of protection, there can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. The details of amount insured and insured amount as percentage of total assets of the company for last 3 FY are as follows:

(Rs. in Lakhs)

Particulars	March 31, 2025	March 31, 2024	March 31, 2023
Total Insurable Assets (Stock)	816.72	365.13	296.25
Total Amount of Sum Insured	250.00	250.00	0.00
Sum Insured as % of Total Insured Assets	30.61%	68.47%	Nil

As certified by Statutory Auditor of our Company, by way of their certificate dated September 22, 2025.

If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. However, no such instance has occurred in the past which have adversely affected the Company's business.

25. We are exposed to credit risk from our customers and the recoverability of our trade receivables is subject to uncertainties.

We generally extend a credit period to our customers, which exposes us to credit risk. The table below outlines specific details regarding our trade receivables and trade receivable turnover days for the indicated year/period:

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Trade Receivables (₹ in lakhs)	2,078.70	1,127.76	69.95
Trade Receivable Days (number of days)	114	81	46

**Not annualised*

A customer's ability to make timely payments depends on various factors, including general economic conditions and their cash flow situation, which are beyond our control. Delays in receiving payments from customers could negatively impact our cash flow and hinder our ability to meet working capital requirements. There is no guarantee that our customers will pay us promptly or at all, which may affect the recoverability of our trade receivables.

Taking legal action against our customers to enforce their contractual obligations can be challenging, and there is no guarantee that we will receive a favourable judgment or that it will be issued in a timely manner. If any of our customers fail to fulfil their contractual commitments, or if they face insolvency or liquidation, it could negatively impact our financial condition and results of operations.

26. There are certain discrepancies/errors/delay filings noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate or any other law could impact the financial position of the Company to that extent.

There are certain discrepancies/errors/delay filings noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, missing attachments, typographical error in minutes, reporting in number of board meetings in annual returns and typographical errors in forms filed in ROC filing made by our company.

In the past, there have been some instances of delays in filings with certain provision of statutory regulations applicable to us. Following are the details of delay filings:

Sr. No.	ROC Form	Particulars of Event	Delay in days	Reason
1.	Form AOC-4*	Form for filing financial statement and other documents with the Registrar for FY 2023-24	36	Technical error of website
2.	Form INC-27	Conversion of Private Company into Public Company	16	Technical error of website

4.	DIR-12	Form for Resignation of CS	25	Technical error of website
5.	MGT - 14	Form for Resignation of CS	24	Technical error of website
6.	MGT - 14	Form for Resignation of CFO	28	Technical error of website

*Revised form AOC-4 was re-submitted due to change in paid-up share capital as on 31.03.2024.

Further, we have obtained secured loans from SMFG India Credit Co. Ltd. for which charge was not registered with MCA in the past. However, for corrective measures company has filed GNL-1 on 23.07.2025.

While no legal proceedings or regulatory action has been initiated against our Company in relation to such non-compliance or instances of delays in filing statutory forms with the RoC as of the date of this Draft Red Herring Prospectus, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by concerned regulatory authorities in this respect. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

27. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

As per our Restated Financial Statements, our cash flows from operating, investing and financing activities are as set out below:

(₹ in Lakhs)

Particulars	For the Financial Year ended on		
	March 31, 2025	March 31, 2024	March 31, 2023
Net Cash Generated/(Used) from Operating Activities	(186.24)	19.61	85.59
Net Cash Generated/(Used) from Investing Activities	(209.15)	0.00	(2.70)
Net Cash Generated/(Used) from Financing Activities	379.57	0.98	(93.38)

For further details and reasons of such negative cash flow, please see chapter titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 245.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

28. Our operations require a significant amount of working capital. Any inability to meet our working capital requirements may adversely affect our business, financial condition, cash flows and results of operations.

Our operations require a significant amount to working capital, including to finance the purchase of AV products, maintenance of adequate levels of inventory and execution of integration processes before payment is received from customers. Any inability to source the required amount of working capital for addressing any integration processes needs may lead to halt the integration processes, decreased revenues and a dissatisfied customer base. Further, any delay in the processing of payments by our customers may increase our working capital requirement. In the event a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that would be otherwise available.

All below factors mentioned below collectively create an environment that can lead to substantial changes in the company's working capital cycle and its overall working capital requirements:

- a) **Operational Requirements** – Our company operates in AV Integration, trading of AV Products, supply of Service Robots and Software Development related services. We typically provide a credit period of 80-120 days to our customers. Further, we have to maintain an inventory of 50-70 days to ensure the timely execution of the client's projects. Lead times from suppliers, especially for specialized AV equipment and robotic parts, necessitate stocking. On the other hand, we get an average credit period of 85-95 days from our suppliers. As a result, there exists a significant working capital gap that we must bridge to maintain smooth operations and ensure liquidity.
- b) **Strategic Expansion Plans** – As part of our growth strategy, we plan to expand operations by establishing an Experience Centre to strengthen brand visibility and enhance customer engagement. This proposed centre will allow our dealers and customers to interact with and experience our robotics solutions firsthand, thereby improving convenience and strengthening selling opportunities. A portion of the Net Proceeds amounting to Rs. 1,404.76 lakhs is proposed to be utilized for setting up the experience centre. This expansion is expected to enhance the company's operational capacity, leading to increased business activity. As a result, the company will require additional working capital to support and sustain the growth in operations.

Our Company's composition of working capital as of March 31, 2025, March 31, 2024, and March 31, 2023, based on audited financial statements and estimated & projected working capital requirements for Fiscal 2026 and Fiscal 2027, respectively, is as set out in the table below*:

(Rs. in Lakhs)

As certified by Statutory Auditor of our Company, by way of their certificate dated September 22, 2025

*Figures of Audited financials have been regrouped for better comparability.

While we have not faced any instances of difficulties to meet our working capital requirements in the Fiscals 2025, 2024 and 2023, there can be no assurance that such instances will not occur in the future. There can be no assurance that payments will be remitted by our customers to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims. Accordingly, continued increases in our working capital requirements may have an adverse effect on our business, financial condition, cash flows and results of operations. For further details regarding working capital requirement, please refer to the chapter titled "Objects of the Offer" beginning on page 93.

29. Any IT system failures or lapses on part of any of our employees may lead to operational interruption, liabilities or reputational harm.

The success of our businesses depends in part upon our ability to effectively deploy, implement and use information technology systems and advanced technology initiatives in a cost effective and timely basis. Our information technology systems include multiple applications, coding, configuration and other systems that allocate resources and facilitate internal and external communications, enabling us to coordinate and make quick decisions across our business. Our computer

networks may be vulnerable to unauthorised access, computer hacking, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by our employees, subcontractors or third-party vendors. Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business.

30. The markets we serve are subject to cyclical demand and vulnerable to economic downturn, which could harm our business and make it difficult to project long-term performance.

Demand for our products and services depends in large part upon the level of capital and maintenance expenditures by many of our customers and end-users, in particular those customers in the AV and IT sector. These customers' expenditures historically have been cyclical in nature and vulnerable to economic downturns. Decreased capital and maintenance spending by these customers could have a material adverse effect on the demand for our products and services and our business, financial condition, and results of operations. In addition, this historically cyclical demand limits our ability to make accurate long-term predictions about the performance of our Company. Even if demand improves, it is difficult to predict whether any improvement represents a long-term improving trend or the extent or timing of improvement. There can be no assurance that historically improving cycles are representative of actual future demand.

31. Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.

As certified by Statutory Auditor of our Company, by way of their certificate dated September 22, 2025.

For details, please refer to Section titled "Restated Financial Statements" beginning on page 197 of this Draft Red Herring Prospectus.

While our Company believes that all such transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with

unrelated parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest. In terms of the Companies Act, 2013 and SEBI LODR Regulations, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain related party transactions and we undertake that such related party transactions shall not be done against the interests of the Company and its shareholders as prescribed in the SEBI LODR Regulations. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

32. ***If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks. Despite our internal control systems, we may be exposed to operational risks, including fraud, petty theft and embezzlement, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.***

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. We cannot assure you that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may affect ability to accurately report, or successfully manage, our financial risks, and to avoid fraud, which may in turn adversely affect our business, financial condition or results of operations.

Further, given the high volume of transactions we process on a daily basis, notwithstanding the internal controls that we have in place, we may be exposed to the risk of fraud or other misconduct by employees, contractors, or customers. Fraud and other misconduct can be difficult to detect and deter. Certain instances of fraud and misconduct may go unnoticed or may only be discovered and successfully rectified after substantial delays. Even when we discover such instances of fraud or theft and pursue them to the full extent of the law or with our insurance carriers, there can be no assurance that we will recover any of the amounts involved in these cases. In addition, our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.

33. ***Our expansion into product categories and business verticals and increase in the number of products offered may expose us to new challenges and more risks.***

We may face challenges in inspecting and controlling quality, regulatory requirements, handling, storage and delivery of our products. We may also need to price aggressively in our product categories to retain and attract consumers, which may not be possible in instances where a product manufacturer imposes restrictions on our ability to offer such products at a discount and which would adversely affect our gross margins.

We may also make substantial investments in launching such new products on our platform. Expansion of our offerings or business verticals may also strain our management and operational resources. It may also be difficult for us to achieve profitability with new products and as a result, our profit margins may be lower than we anticipate, which would adversely affect our results of operations. We cannot assure you that we will be able to recover our investments in introducing any new products or that any such new products will be successful by any measure.

34. ***We have not yet placed orders in relation to the capital expenditure to be incurred for the Proposed Manufacturing Unit. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the plant and machineries or complete the civil and related works etc. in a timely manner, or at all, the same may result in time and cost over-runs.***

We intend to utilize portions of the Net Proceeds for funding capital expenditure requirements to set up the proposed manufacturing unit. While we have procured quotations from various vendors in relation to the capital expenditure to be incurred for the proposed purchase of products, we have not placed any firm orders for any of them. For details in respect of the foregoing, see "Objects of the Issue" beginning on page 91. Such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure that we will be able to undertake such capital expenditure at the costs indicated by such quotations or that there will not be cost escalations over and above the contingencies proposed to be funded out of the Net Proceeds. Further, the actual amount and timing of our future capital requirements may differ from our estimates as a result of, among other things, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, engineering design changes and technological changes.

In the event of any delay in placing the orders, or in the event the vendors are not able to provide the products or complete the civil and related works etc. in a timely manner, or at all, the same may result in time and cost over-runs. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or completion of the civil and related works, or in the event the vendors are not able to provide the equipment and services in a timely manner, or at all, we may encounter time and cost overruns. Further, if we are unable to procure the requisite products and ancillary items or avail services from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the similar kind of products and ancillary items and services, which satisfy our requirements at acceptable prices. Our inability to procure the machinery and equipment and services at acceptable prices or in a timely manner, may result in an increase in capital expenditure, extension or variation in the proposed schedule of implementation and deployment of the Net Proceeds, thereby resulting in an adverse effect on our business, prospects and results of operations.

Our proposed manufacturing unit remain subject to the potential problems and uncertainties that construction project face including cost overruns or delays. Problems that could adversely affect our expansion plan include labour shortages, increased costs of equipment or manpower, inadequate performance of the equipment and machinery installed in our manufacturing facilities, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals, incremental pre-operating expenses, taxes and duties, interest and finance charges, working capital margin, environment and ecology costs and other external factors which may not be within the control of our management. Further, there can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects.

35. *We are required to obtain, renew or maintain statutory and regulatory permits, licenses and approvals to operate our business and in case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Further we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company to public Company.

We believe that our Company has obtained all the material approvals required to carry on its business activities as on the date of this Draft Red Herring Prospectus. Many of these approvals are granted for a fixed period of time and are required to be renewed from time to time. Non-renewal of the said permits and licenses would adversely affect our operations, thereby having a material effect on our business, results of operations and financial condition.

Further, since our constitution have been converted from Private company to public company, we are required to change the name to the effect on all our licenses. Although we have got our names changed in all our licenses, few of them are yet to be applied for endorsement of the changed name. While no penalties are prescribed for delay in change of name in the relevant certificates, extended delays may misinterpret the Company's status with the investors and authorities attracting queries and unnecessary diversion of attention from the business. For further details regarding the material approvals, licenses, registrations and permits, see "*Government and Other Approvals*" on page 264.

Further certain permits, licenses and approvals obtained by our Company are conditional in nature. While our Company endeavors to meet such conditions, we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, renew, maintain or obtain the required permits, licenses or approvals, or revocation, cancellation or suspension of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. There can be no assurance that the relevant authorities will issue any or all such permits or approvals in the time-frame anticipated by us or at all. Non-receipt of the aforesaid license would result in payment of fines under the respective laws. We are also required to make certain payments to various statutory authorities from time to time, including but not limited to payments pertaining to Income Tax. Any failure or delay in payment of such statutory dues may expose us to statutory and regulatory action, as well as significant penalties, and may adversely impact our business, results of operations and financial condition.

36. *Our Company is not having any exact comparable Indian peer which have similar business to our Company.*

Our Company is not having any exact comparable Indian peer which have exact similar business to our Company in terms of product mix, size, scale in the same market with the same customer portfolio. The Issue Price of the Equity Shares will be determined by our Company in consultation with the BRLM through the Book Building Process. A comparison of valuation of the issue with its listed peers would give a fair idea of what to pay in the market. In absence of the exact comparable Indian peer, investors might not be able to compare our results.

37. *We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected. Further we may be subject to employee unrest, slowdowns and increased wage costs, which may have an adverse effect on our business, operations, our cash flow and financial condition.*

Our business operation required skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

As of July 31, 2025 we have 19 employees, with 4 employees being dedicated sales and marketing personnel and 9 employees being dedicated technical personnel. For the Fiscal 2025, 2024, 2023 we incurred employee benefits expense of ₹ 105.29 lakhs, ₹ 14.68 lakhs and ₹ 10.14 lakhs, respectively, amounting to 2.05 %, 0.55 %, and 1.06 % of our revenue from operations in the corresponding periods. As on the date of this Draft Red Herring Prospectus, our employees are not unionized. However, in the event that employees seek to unionise, it may become difficult for us to maintain flexible employee policies, which may increase our costs and adversely affect our business. We believe our employees and personnel are critical to maintain our competitive position. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal, and legislation that imposes certain financial obligations on employers upon retrenchment.

Although we have not experienced any employee unrest, we cannot assure you that we will not experience disruptions in our work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any employee unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are very difficult for us to predict or control and any such event could adversely affect our business, results of operations and financial condition. A potential increase in the salary scale of our employees as a result of organisation or unrest, or a disruption in services from our employees or contract manufacturers due to potential strikes, could adversely affect our business operations and financial condition.

38. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial Personnel and Senior Management as well as our ability to attract and retain them. Any loss of our Promoter, Directors, Key Managerial Personnel, Senior Management or our ability to attract and retain them could adversely affect our business, financial condition and results of operations.*

Our success largely depends upon the knowledge and experience of our Promoters, Directors, Key Managerial Personnel and Senior Management as well as our ability to attract and retain skilled personnel. Any loss of our Promoters, Directors, Key Managerial Personnel and Senior Management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial condition and results of operations. We depend on the management skills and guidance of our Promoters for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business, financial condition and results of operations could be adversely affected.

There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. Among our Key Managerial Personnel and Senior Management, we not experienced any attrition in the Fiscals 2025, 2024, 2023, respectively and among our total employees,

we experienced attrition (calculated as employees who have left/ average employees) of 120% and Nil in the Fiscals 2025 and 2024 respectively. For further information, see “Our Management” on page 178.

39. We face substantial and increasingly intense competition in the AV (Audio-Video) Industry & Robotics industry. If we are unable to compete effectively, our business, financial condition, results of operations and prospects would be materially and adversely affected.

We face competition from unlisted players in the AV (Audio-Video) industry & Robotics Industry which have a presence across multiple regions in India. There are various companies offering products and services similar to us. The critical factors that determine the success of a product or service vary by geographical market and product and service segment. We believe the principal elements of competition in our industry are price, durability, product quality, user experience, operational efficiency, timely delivery and reliability and most importantly our pace in keeping up with the changing technology in the industry. Due to the intensity, complexity and diversity of the competition overall, the competitive landscape in our industry or in specific industry segments can change very rapidly.

Further, new competitors may emerge at any time. Our competitors may be able to respond more quickly to new or emerging technologies or customer requirements, and may bring with them customer loyalties that may limit our ability to compete, which could decline our sales. In addition, a variety of known and unknown events could have a material adverse impact on our ability to compete. The success of our products as well as our ability to maintain or increase our sales may also depend upon the effectiveness of our marketing initiatives which may adversely affect our ability to compete effectively. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability.

Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

40. Adverse publicity regarding any product we sell could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

41. Some of our trade names and our Company’s logo are not registered as on date of this Red Herring Prospectus. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.

The promoter had applied for brand name/logo/trademark “ NANTA,” with Trademark Registry Intellectual property India, Ahmedabad and as on date of this Draft Red Herring Prospectus, we have not registered our logo under the Trademarks Act, 1999, hence, we do not enjoy the statutory protections accorded to a registered logo. Further, as on the date of the Draft Red Herring Prospectus, the status of registration of our trademarks is as under:

Sr. No.	Particulars of the Mark	Certificate/ Application No. & Date	Class	TM Type	Status	Steps taken by Company
1.	Device “NANTA TECHNOLOGY” 	6095159 Dated September 04,2023	9	Device	Objected	The Company is yet to file reply for Objection
2.	Device “Nanta” 	7143389 Dated July 28, 2025	9	Device	Formalities Check Pass	Pending at Authority

We cannot assure you that any application for registration of our logo in future by our Company will be granted by the relevant authorities in a timely manner or at all. Further, there can be no assurance that third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. We may not be able to detect any unauthorized use or our efforts to protect our intellectual property may not be adequate and may lead to erosion of our

business value and our operations could be adversely affected. In the event we receive any objection/opposition from the authority or any third party, we may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others and any such litigation could be time consuming and costly, and the outcome cannot be guaranteed.

For further details, please refer to chapters titled “*Business Overview - Intellectual Property*” and “*Government and Other Statutory Approvals - Intellectual Property*” on page 162 and 264 of the Draft Red Herring Prospectus.

42.  ***The trademark “ ALLBOTIX ” is originally registered in the name of our Promoter, Mayank Arvindbhai Jani. Our Company has acquired the same on the basis of a No Objection Certificate dated September 01, 2023.***

Our brand name “  ” has been registered as a trademark in favour of our Promoter, Mayank Arvindbhai Jani and our Company has acquired the same through a trademark assignment agreement dated September 01, 2023. The assignment agreement is not permanent and can be revoked by either of the parties on a prior notice. Further our Company shall be required to pay an annual royalty for the usage of the mark with limitations of not to make any alterations to same without prior approval. In such event if we fail to make the payment of royalty on time or adhere to the terms of the agreement, the owner may revoke the agreement in which event we may lose our brand name or alternatively shall also be required to change the first name of the Company. In such an event we may lose the goodwill acquired under the name and be required to incur extra efforts and costs to create a new brand name, thus adversely affecting the business and cash flows of the Company.

43. ***Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.***

Our operations may be subject to incidents of theft or damage to our products. The business may also encounter some product loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance, losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

44. ***There may be potential conflict of interests between our Company and other venture or enterprises promoted by our promoters or directors.***

The main business object/activities of our Company and our Group Company i.e. MNT Info Vision Private Limited also permit them to undertake similar business to that of our business, which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Conflicts of interests may arise in allocating business opportunities between our Company and our Group Company in circumstances where our respective interests diverge. Further, our Company and our Group Company are allowed to carry on activities as per its articles, which are similar to the activities carried by our Group. Further, our Promoters, are also directors on the board of our Company and our Group Company. This may be a potential source of conflict of interest in addressing business opportunities, strategies, implementing new plans and affixing priorities. In cases of conflict, our Promoters may favour other companies in which our Promoters have interest.

Although we have entered into a non-compete arrangement, under which MNT Info Vision Private Limited have agreed not to compete with our business. However, we cannot assure you that there will be no conflict of interest in allocating business opportunities between us and our Promoter Group entity or that we will be able to suitably resolve any such conflict without an adverse effect on our business and financial performance.

45. ***We have incurred indebtedness and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.***

Some of the financing arrangements entered into by us include conditions that require our Company to obtain consents/NOCs from respective lenders prior to carrying out certain activities and entering into certain transactions. Failure to meet these conditions or obtain these consents/NOCs could have significant consequences on our business and operations. These covenants vary depending on the requirements of the financial institution extending such loan and the conditions negotiated under each financing agreement. Some of the corporate actions require prior consents/NOCs from or intimations to certain lenders.

While we all relevant consents/NOCs required for the purposes of this Issue and have complied with these covenants, a failure to comply with such covenants in the future may restrict or delay certain actions or initiatives that we may propose to take from time to time. While we have not defaulted on any covenants, we cannot assure you that this will continue to be the case in the future, which may in turn adversely affect our business, results of operations, cash flows and financial condition.

If the obligations under any of our financing arrangements are accelerated, we may have to dedicate a portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. In addition, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. A default by us under the terms of any financing documents have an adverse effect on our operations, financial position and any credit ratings. For further information regarding our borrowings, please see "*Financial Indebtedness*" on page 244.

46. *Certain unsecured loans availed by our Company are repayable on demand. Any demand for repayment of such unsecured loans, may adversely affect our cash flows.*

As at March 31, 2025, we had availed unsecured loans aggregating to ₹18.29 lakhs from our directors. The unsecured loans our Company have availed are repayable on demand. Any failure to service such indebtedness, or otherwise perform any obligations under such financing agreements may lead to acceleration of payments under such credit facilities, which may have a material adverse effect on our business, cash flows and financial conditions. For further information regarding our loans, please see "*Financial Indebtedness*" on page 244.

47. *We rely on financing from banks or financial institutions to carry on our business operations, and inability to obtain additional financing on terms favourable to us or at all could have an adverse impact on our financial condition. Further, certain of our financing agreements involve variable interest rates and an increase in interest rates may adversely affect our results of operations and financial condition. If we are unable to raise additional capital, our business and future financial performance could be adversely affected.*

As at March 31, 2025, we had total fund based outstanding financial indebtedness of ₹ 50.35 lakhs. Our existing operations and execution of our business strategy may require substantial capital resources and we may incur additional debt to finance these requirements in the future. However, we may be unable to obtain sufficient financing on terms satisfactory to us, or at all. If interest rates increase it will be difficult to obtain credit. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure. We cannot assure you that we will have sufficient capital for our current operations, any future expansion plans that we may have and our ability to complete such expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any unfavourable change to terms of borrowings may adversely affect our cash flows, results of operations and financial conditions. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, financial condition and cash flows could be adversely affected.

There can be no assurance that we will be able to comply with our current financing arrangements or continue to access funds, including by way of short-term borrowings, on acceptable terms or at all. While we seek to mitigate against such risks by exploring favourable funding options from banks/financial institutions, there is no assurance that we will be successful in doing so. Any failure to obtain the requisite funds to meet our requirements or expand or modernize existing capabilities could result in our inability to effectively compete with other players in the industry, which could have a material adverse effect on our profitability, cash flows and results of operations.

48. *Our members of Promoter Group have mortgaged their property and provided personal guarantees to loan facility availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.*

Our members of promoter group have mortgaged their property and provided personal guarantees in relation to loan facility availed of by us. In the event that any of these properties or guarantees are revoked by promoters, members of promoter group, the lenders for such facilities may require alternate properties as mortgages/guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative properties/guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition. For more information, please see the chapter titled "*Financial Indebtedness*" beginning on page 244.

49. *Our Promoters and promoter group members are interested in our Company's performance in addition to their remuneration and reimbursement of expenses.*

In addition to regular remuneration or benefits and reimbursement of expenses, our promoters and promoter group members are otherwise interested in our Company. This interest is to the extent of their shareholding in our Company, their rights to the extent of any dividends, repayment of unsecured loans Company availed from our promoters, and their rights in relation to interest payment on unsecured loans by them to our Company. We cannot assure you that our promoters and promoter group members will exercise their rights as Shareholders to the benefit and best interest of our Company. As Shareholders of our Company, our promoters may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information on the interest of our promoters and promoter group members of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see "Our Management", "Our Promoters and Promoter Group- Interests of Our Promoters" and "Restated Financial Information - Related Party Disclosure – Annexure –32" on pages 178, 192 and 197 respectively.

50. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for the objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled "Objects of the Issue" beginning on page 93.

51. *There is no monitoring agency appointed by our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 5,000.00 Lakhs. Since, the issue size is below 5,000.00 Lakhs, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds and our company will have full discretion in respect of issue proceeds. However, audit committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue and as per regulation 262(5) of SEBI ICDR regulations 2018, we shall submit a certificate of the statutory auditor for utilization of money raised through the public issue to exchange while filing the quarterly financial results, till the issue proceeds are fully utilized. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

52. *Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" on page 196.

53. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to the industry data contained in the Draft Red Herring Prospectus. Industry information included in this Draft Prospectus has been derived from publicly available industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

While facts and other statistics in the Draft Red Herring Prospectus relating to the industry has been based on various governmental and organizational web site data that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore

we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 118 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

54. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the Issue, our Promoters and Promoter Group will collectively own [•] % of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

55. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

56. *The average cost of acquisition of Equity Shares by the Promoters may be less than the Issue Price.*

The average cost of acquisition of Equity Shares by the Promoters may be less than the Issue Price. The details of the average cost of acquisition of Equity Shares held by the Promoters are set out below:

Sr. No.	Name	No of Equity Shares held	Average cost of Acquisition (in ₹) *
Promoters			
1.	Mayank Arvindbhai Jani	1,35,600	Nil
2.	Mansiben Mayankkumar Jani	30,12,355	Nil

As certified by Statutory Auditor of our Company, by way of their certificate dated September 22, 2025.

57. *The Promoters and Executive Directors of our Company do not have experience of being a director of a public listed company.*

The Promoters and Executive Directors of our Company do not have the experience of having held directorship of public listed company. Accordingly, they have limited exposure to management of affairs of the listed company which inter-alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, our Company will require to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted company. Our Company will also be subject to the SEBI Listing Regulations, which will require it to file audited annual and unaudited half yearly reports with respect to its business and financial condition. If our Company experiences any delays, we may fail to satisfy its reporting obligations and/or it may not be able to readily determine and accordingly report any changes in its results of operations as promptly as other listed companies.

Further, as a publicly listed company, our Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our Company’s disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of Directors of our Company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial

condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

EXTERNAL RISKS

58. *Recent global economic conditions have been challenging and continue to affect the Indian market, which may adversely affect our business, financial condition, results of operations and prospects.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India and could then adversely affect our business, financial performance and the price of our Equity Shares.

Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our equity shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

59. *Natural or man-made disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.*

Natural disasters (such as typhoons, flooding, and/or earthquakes), epidemics, pandemics such as COVID-19, and man-made disasters, including acts of war, terrorist attacks, and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, and results of operations. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, adversely impact availability of natural gas, increase in supply chain, logistics times and costs, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. Our operations may be adversely affected by fires, natural disasters, and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity, and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic, and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares. A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1, and H1N1 strains of influenza in birds and swine and more recently, the SARS-CoV-2 virus and the monkeypox virus. A worsening of the current outbreak of the COVID-19 pandemic or future outbreaks of SARS-CoV-2 virus or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

60. *Any downgrading of India's sovereign debt rating by an international rating agency could have a negative impact on our business and results of operations.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. Any adverse revisions to credit ratings for India and other jurisdictions we operate in by international rating agencies may adversely impact our ability to raise additional financing. This could have an adverse effect on our ability to fund our growth on favourable terms and consequently adversely affect our business and financial performance and the price of the Equity Share.

61. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, United States, United Kingdom, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any

worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

62. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate thereby reducing our margins.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

63. *We may be affected by competition laws, the adverse application or interpretation of which could adversely affect our business.*

The Competition Act, 2002, of India, as amended (“**Competition Act**”), regulates practices having an appreciable adverse effect on competition in the relevant market in India (“**AAEC**”). Under the Competition Act, any formal or informal arrangement, understanding, or action in concert, which causes or is likely to cause an AAEC is considered void and may result in the imposition of substantial penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment, or the provision of services or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or number of clients in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an AAEC and is considered void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to and pre-approved by the Competition Commission of India (the “**CCI**”). Additionally, on May 11, 2011, the CCI issued Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, all agreements entered by us could be within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct, or combination occurring outside India if such agreement, conduct, or combination has an AAEC in India. However, the impact of the provisions of the Competition Act on the agreements entered by us cannot be predicted with certainty at this stage. However, since we pursue an acquisition driven growth strategy, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, results of operations, cash flows, and prospects.

64. *The trading volume and market price of the Equity Shares may be volatile following the Issue.*

Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares. Further, the market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- Half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

65. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

66. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any capital gain exceeding ₹125,000, realised on the sale of listed equity shares on a recognised stock exchange, held for more than 12 months immediately preceding the date of transfer, will be subject to long term capital gains in India, at the rate of 12.5% (plus applicable surcharge and cess). This beneficial rate is, among others, subject to payment of Securities Transaction Tax ("STT"). Further, any gain realised on the sale of equity shares in an Indian company held for more than 12 months, which are sold using any platform other than a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. Such gains will be subject to tax at the rate of 20% (plus applicable surcharge and cess), subject to STT being paid at the time of sale of such shares. Otherwise, such gains will be taxed at the applicable rates. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. Similarly, any business income realised from the transfer of Equity Shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller.

The Government of India announced the union budget for Fiscal 2026, following which the Finance Bill, 2025 ("Finance Bill") was introduced in the Lok Sabha on February 1, 2025. Subsequently, the Finance Bill received the assent from the President of India and became the Finance Act, 2025, with effect from April 1, 2025 as amended by the Finance Act (No.2), ("Finance Act"). As per the Finance Act, in case of domestic company, the rate of income-tax shall be 25% of the total income, if the total turnover or gross receipts of the previous year 2023-24 does not exceed ₹ 400 crores and where the companies continue in Section 115BA regime. In all other cases the rate of income-tax shall be 30% of the total income. However, domestic companies also have an option to opt for taxation under section 115BAA of the Act on fulfilment of conditions contained therein. The rate of income-tax rate is 22% under section 115BAA, having a surcharge at 10% on such

tax. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning, investing or trading in the Equity Shares.

We cannot predict whether any amendments made pursuant to the Finance Act would have an adverse effect on our business, results of operations, financial condition and cash flows. Unfavourable changes in or interpretations of existing laws, rules and regulations, or the promulgation of new laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals

- 67. *Our Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for our Equity Shares. Further, our Equity Shares may not result in an active or liquid market and the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Issue Price or at all.***

Prior to this Issue, there has been no public market for our Equity Shares. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. We cannot assure you that an active trading market for the Equity Shares will develop or be sustained after this Issue. The Issue Price of our Equity Shares will be determined through the Book Building Process and may not be indicative of the market price of our Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of our Equity Shares may be subject to significant fluctuations in response to various factors, including variation in our operating results, market conditions specific to our industry, and volatility in stock exchange and securities markets.

Further, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a company. These broad market fluctuations and industry factors may materially reduce the market price of our Equity Shares, regardless of our Company's performance. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

- 68. *There is no guarantee that our Equity Shares will be listed on the BSE in a timely manner or at all and any trading closure at stock exchange may adversely affect the trading price of our Equity Shares. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.***

There is no guarantee that the Equity Shares will be listed on the BSE in a timely manner or at all and any trading closure at stock exchange may adversely affect the trading price of our Equity Shares. In accordance with Indian law, permission for listing and trading of the Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued by SEBI, the Equity Shares are required to be listed on the BSE within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares. Further, there can be no assurance that the Equity Shares once listed will continue to remain listed on the Stock Exchange. Indian laws permit a company to delist its equity shares on compliance with prescribed procedures including the requirement to obtain the approval of its shareholders. Further, certain instances of non-compliance with applicable laws can result in the delisting of the Equity Shares. We cannot assure you, therefore, that the Equity Shares, once listed, will continue to remain listed.

- 69. *Any future issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by shareholders with significant shareholding may adversely affect the trading price of the Equity Shares.***

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares including to comply with minimum public shareholding norms applicable to listed companies in India or, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. There can be no assurance that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

- 70. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Non-debt Instruments Rules, all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of the Equity Shares is situated in or is a citizen of any such country, can only be made through the Government approval route, as prescribed in the FDI Policy dated October 15, 2020 and the FEMA Non-debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

71. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our restated Consolidated financial statements, including the financial statements provided in this Draft Red Herring Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled “Presentation of Financial Industry and Market Data” beginning on Page 19.

Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited. India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards, i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

72. Changing laws, rules and regulations and legal uncertainties, including adverse application or interpretation of corporate and tax laws, may adversely affect our business, prospects and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such

as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the Government of India announced the union budget for Fiscal 2026, following which the Finance Bill was introduced in the Lok Sabha on February 1, 2025. Subsequently, the Finance Bill received the assent from the President of India and became the Finance Act, 2025, with effect from April 1, 2025 as amended by the Finance Act (No.2), ("Finance Act"). We cannot predict whether any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

73. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Individual Investors are not permitted to withdraw their Bids after Bid/ Issue Closing Date.*

Details of the Objects of the Issue

1. Funding capital expenditure requirements of our company towards setting up an experience centre cum product display area:

Our Company is engaged in the business of Audio Visual (AV) integration, supply and distribution of AV Products, Service Robots and Software Development related services which serves different verticals like Corporates, Education, among others. Within our robotics segment, product demonstrations form an integral part of our business process, necessitating a dedicated display-cum-experience centre. At present, our operations are based in Ahmedabad, Gujarat. Our registered office is located at Office No. 703, Skywalk – The Element, Godrej Garden City, Jagatpur, Ahmedabad – 382481. Our Company is also having an Experience Centre located at Ganesh Glory-11, Block E 114, Near BSNL Office, Jagatpur Road, Jagatpur, Ahmedabad – 382470 admeasuring the area of 35.78 sq. mtrs. and is used to showcase our extensive range of products for AV and robotics segment.

As part of our growth strategy, we plan to expand operations by establishing a larger Experience Centre to strengthen brand visibility and enhance customer engagement. The proposed centre will allow our dealers and customers to interact with and experience our robotics solutions firsthand, thereby improving convenience and strengthening selling

opportunities. A portion of the Net Proceeds is proposed to be utilized towards setting up this expanded facility. Further details of our registered office and other business locations are provided under the chapter titled “*Our Properties*” on page 162 of this Draft Red Herring Prospectus, all of which are currently on a rental/lease basis.

To align with our strategic objectives and improve workflow efficiency, we intend to establish an integrated experience centre cum product display area in Gujarat. For this purpose, the Company has identified premises at Units 204, 205, 206, and 207, Shivalik Sharda Harmony, Panjarapole, Ahmedabad – 380015, Gujarat, India with an aggregate built-up area of approximately 5,678 sq. ft. The said property has been booked from Shivalik Param Structures LLP pursuant to a booking letter dated September 05, 2025, and is proposed to be acquired on ownership basis.

Our Board in its meeting dated September 08, 2025 took note that an amount of ₹ 1,404.77 Lakhs is proposed to be utilised from the net proceeds for funding of capital expenditure requirements of our company towards setting up an experience centre cum product display area. This proposed expenditure will not only lead to creation of an asset for the Company but will also streamline and enhance the efficiency of business processes by consolidating resources in one location.

Objectives of capital expenditure towards setting up of an experience centre cum product display area:

Tangible Interaction: The proposed Experience Centre will enable dealers, distributors, and customers to physically interact with our products, particularly robots, which is far more compelling than viewing them through online channels or catalogues. Customers will have convenient access to a wide range of products and services under one roof, enhancing overall experience and satisfaction. Live demonstrations of our products can be conducted in a controlled environment, showcasing their features, functionality, and quality. The ability to touch, feel, and operate products prior to purchase is expected to strengthen purchasing confidence. Further, the experience centre will support our dealers and distributors by providing a comprehensive solutions platform, thereby enabling them to improve customer acquisition, retention, and operational efficiency. It will provide a platform for in-depth consultations where our sales teams can tailor solutions to meet specific dealer and distributor requirements

Direct customer feedback and insights: A physical display environment allows our B2B sales force to receive immediate and direct customer feedback. Real-time reactions and inputs can be observed and addressed promptly, providing valuable insights for product development and continuous improvement. This will also help the Company in identifying emerging trends and evolving market needs by analysing customer queries, observations, and preferences.

Brand Image: Establishing a modern and well-designed experience centre will help strengthen the recognition, reputation, and credibility of our brand in India. The proposed investment reflects our commitment to quality, professionalism, and innovation, which in turn is expected to enhance brand perception among stakeholders.

Marketing and Promotion: The Experience Centre will also serve as a venue for hosting events, product launches, industry meetups, and for generating marketing content such as videos, photos, and testimonials. This will enhance the Company’s marketing and promotional initiatives and increase visibility across its target audience.

Training Sessions, Workshops and Seminars: The facility will provide a dedicated platform for conducting training sessions for dealers and distributors, ensuring proper understanding of our products and solutions.

Accumulating Asset Value: By acquiring the Experience Centre on ownership basis, the Company will be creating a tangible long-term asset. Unlike rental arrangements where payments accrue to the benefit of landlords, ownership will permit the Company to benefit from potential property value appreciation, thereby enhancing its overall asset base over time.

Elimination of Rental Outflow and Long-Term Security: Currently, the Company incurs an annual rental expense of ₹2,40,000, subject to periodic increases, for its existing Experience Centre of approximately 35.78 sq. mtrs. Ownership of the Experience Centre will provide long-term security and stability by eliminating risks associated with lease renewals, potential rent escalations, or eviction. This stability will allow the Company to focus on business expansion without being constrained by uncertainties relating to leased premises.

Customization: Ownership of the premises will provide the Company flexibility to customize, renovate, and expand the facility in line with its evolving business needs. Such customization opportunities are generally limited in leased properties due to restrictions imposed by landlords.

Benefit of location: The selection of Ahmedabad as the location for establishing the proposed experience centre cum product display area is aligned with the Company’s existing operational base and long-term growth strategy. Our

registered office, godown, and current Experience Centre are already situated in Ahmedabad, and consolidating these operations into a larger, owned facility will enhance efficiency and improve coordination. Further, Ahmedabad offers a cost-effective real estate market compared to other metropolitan cities, ensuring long-term financial advantages while simultaneously providing access to a skilled workforce from leading educational and technical institutions in the region.

Additionally, Ahmedabad's strategic location in western India provides strong connectivity to key industrial hubs and corporate clusters across Gujarat and neighbouring states such as Maharashtra, Rajasthan, and Madhya Pradesh. This not only ensures convenience for our customers, dealers, and distributors but also strengthens the Company's brand visibility and market presence in a rapidly growing commercial hub.

Furthermore, the ongoing development of GIFT City (Gujarat International Finance Tec-City) in the vicinity provides an additional strategic advantage. As one of India's ambitious smart city projects, GIFT City offers progressive infrastructure, tax incentives, and access to global financial services and markets. This development will not only bolster Ahmedabad's standing as a major financial and commercial center but also offer opportunities for the Company to tap into international business, expand its operational scope, and benefit from a conducive environment for business growth.

Acquiring property in Ahmedabad therefore provides long-term operational stability, opportunity for asset appreciation, and positions the Company to serve its stakeholders more effectively while supporting its future expansion plans.

2. Funding Working Capital Requirements of our Company

Our business is a working capital-intensive business. We finance our working capital requirement from our internal accruals. Considering the existing and future growth, our Company requires additional working capital for funding its incremental working capital requirements and unlocking the internal accruals deployed in working capital. The funding of the incremental working capital requirements will lead to a consequent increase in our profitability, ability to utilize internal accruals for growth opportunities, and achievement of the proposed targets as per our business plan.

Requirement of Working Capital: -

Our Company is engaged in the business of Audio Visual (AV) integration, supply and distribution of AV Products, Service Robots and Software Development related services. We provide comprehensive, end-to-end AV integration solutions which includes everything from system design, integration and management to on-site support. Our diverse portfolio of customized offerings and our ability to tailor solutions of both large scale and small-scale clients to meet the specific requirements of each client have helped us build a loyal customer base across a broad spectrum of industries. We are offering our customized solution to various sectors such as corporates, education, hospitality and manufacturing industry and others. Our offerings play a vital role in driving digital transformation across sectors.

All below factors mentioned below collectively create an environment that can lead to substantial changes in the company's working capital cycle and its overall working capital requirements:

- c) **Operational Requirements** – Our company operates in AV Integration, trading of AV Products, supply of Service Robots and Software Development related services. We typically provide a credit period of 80-120 days to our customers. Further, we have to maintain an inventory of 50-70 days to ensure the timely execution of the client's projects. Lead times from suppliers, especially for specialized AV equipment and robotic parts, necessitate stocking. On the other hand, we get an average credit period of 85-95 days from our suppliers. As a result, there exists a significant working capital gap that we must bridge to maintain smooth operations and ensure liquidity.
- d) **Strategic Expansion Plans** – As part of our growth strategy, we plan to expand operations by establishing an Experience Centre to strengthen brand visibility and enhance customer engagement. This proposed centre will allow our dealers and customers to interact with and experience our robotics solutions firsthand, thereby improving convenience and strengthening selling opportunities. A portion of the Net Proceeds amounting to Rs. 1,404.76 lakhs is proposed to be utilized for setting up the experience centre. This expansion is expected to enhance the company's operational capacity, leading to increased business activity. As a result, the company will require additional working capital to support and sustain the growth in operations.

Basis of estimation of incremental working capital requirement: -

Our Board in its meeting dated September 08, 2025 took note that an amount of ₹ 1,050.00 Lakhs is proposed to be utilised from the net proceeds for working capital requirements in Fiscal 2026 & Fiscal 2027. The balance portion of our Company's working capital requirement shall be met from the internal accruals and Short-Term Borrowings. The incremental and proposed working capital requirements, as approved by the Board pursuant to a resolution dated September 08, 2025 and key assumptions with respect to the determination of the same are mentioned below. Our Company's composition of working capital as of March 31, 2025, March 31, 2024, and March 31, 2023, based on audited financial statements and estimated & projected working capital requirements for Fiscal 2026 and Fiscal 2027, respectively, is as set out in the table below*:

The average inventory days of the company are expected to slightly increase to 64 days for Fiscal 2026 & Fiscal 2027 as the company needs to maintain a higher level of inventory to support the projected growth in its operations.</p> <p>For Fiscal 2023, the company's inventory days were 144 days as the company had to maintain increased inventory at the year-end, due to expected increase in the revenue of next fiscal year, i.e, Fiscal 2024. The revenue of the company increased from Rs. 955.72 Lakhs in Fiscal 2023 to Rs. 2,659.62 Lakhs in Fiscal 2024.</p>

It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares, particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation of the benefits which an investor can avail.

A. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:

Under the Income Tax Act, 1961 (“the Act”)

Special tax benefits available to the Company

- The Company is not entitled to any special tax benefits under the Income Tax Act 1961 and GST Act.

B. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS:

- The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

NOTES:

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above Annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year 2025-26. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 (‘the Amendment Act, 2019’) with effect from Financial Year 2019-20 granting an option to domestic companies to compute corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and cess of 4%), provided such companies do not avail specified exemptions/ incentives. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

In such a case, the Company is not allowed to claim any of the following deductions/ exemptions under the Act: -

- ✓ Deduction under the provisions of Section 10AA.
- ✓ Deduction under clause (ii) of sub-section (1) of Section 32 (additional depreciation).

Lower corporate tax rate under Section 115BAA of the Act and Minimum Alternate Tax (‘MAT’) credit under section 115JAA of the Act, which are in general available and hence may not be treated as special tax benefits.

The Company has evaluated and decided to exercise the option permitted under Section 115BAA of the Act for the purpose of computing its income-tax liability for the Financial Year 2023-24 and onwards.

6. This Annexure is intended only to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of tax consequences, each investor is advised to consult his or her tax advisor with respect to specific tax consequences of his/her investment in the shares of the Company.

Since the April 2025 WEO, *uncertainty* has remained elevated even as effective tariff rates have come down (Figure 1). Most notably, China and the United States on May 12 agreed to lower for 90 days (until August 12) tariffs that had resulted from post-April 2 escalation. The US pause on higher tariffs for most of its trading partners is now set to expire on August 1, pushing back the original deadline of July 9. Letters issued by the US administration in July to some trading partners threaten to impose tariffs even higher than those announced on April 2. Legal proceedings are currently underway in the United States concerning the use of the International Emergency Economic Powers Act as a legal basis for the imposition of tariffs. Although the passage of the One Big Beautiful Bill Act (OBBBA) in July brought clarity to the near-term path of US fiscal policy, it has added to uncertainty about longer-term fiscal sustainability.

Note: US effective tariff rates include the tariffs announced April 2, until April 9, when they were paused, and additional tariffs on China announced April 8 and afterward, until May 10, when they were paused. These effective tariff rates are based on a pre-2025 United States-Mexico-Canada Agreement compliance rate. The WUI database is constructed based on methodology in Ahir, H., N. Bloom, D. Furceri. 2022. "The World Uncertainty Index." NBER Working Paper 29763. The WUI is calculated by counting the frequency of the word "uncertain" in Economist Intelligence Unit country reports and normalizing by the total number of words. The index is then rescaled by multiplying by 1,000,000 and weighted using the 5-year moving average of nominal GDP in US dollar.

only by 0.5 percent, but this came after remarkably fast growth of 4.0 percent in the fourth quarter of 2024. Imports and business investment surged—especially in information processing equipment. Taken together, these patterns were consistent with aggressive front-loading by US firms and households ahead of expected higher prices induced by tariffs. In the euro area, GDP accelerated to 2.5 percent, driven by investment and net exports, even as private consumption lost steam. Ireland largely led the spurt, with growth shrinking to 1.4 percent when Ireland is excluded. China's real GDP growth, at an annualized rate of 6.0 percent, exceeded expectations. This was mainly driven by exports, propped up by a

Global financial conditions have eased (Box 1). US equity markets have largely rebounded, erasing losses from the April 2 tariff fallout and reaching new heights. Other global equity markets have also rallied, swayed by tariff-related announcements and releases of macroeconomic data that turned out to be better than expected. Notably, the US dollar has depreciated further, defying expectations that tariffs and larger fiscal deficits would cause the currency to appreciate. Implied paths for policy rates have flattened for advanced economies, while continued dollar weakness has provided some monetary policy space for emerging market and developing economies. Yield curves have steepened in the context of fiscal concerns, although the steepening thus far is not unusual by historical standards despite very high debt and deficit levels in many countries.

With these forces in place, the global economy has continued to hold steady, but the composition of activity points to distortions from tariffs, rather than underlying robustness. Global growth in the first quarter of 2025 was 0.3 percentage point above that predicted in the April WEO. International trade and investment drove activity, while private consumption was more subdued across major jurisdictions. Real GDP decreased in the United States, at an annualized rate of 0.5 percent, marking the first quarterly contraction in three years. Consumer spending rose

depreciating renminbi closely tracking the dollar and with declining sales to the United States more than offset by strong sales to the rest of the world (Figure 2), and, to a smaller extent, by consumption, supported by fiscal measures. Japan's economy contracted by an annualized 0.2 percent, as soft private consumption and weak net exports weighed on growth while strong private investment helped cushion the decline. *Global trade* grew robustly in the first quarter, but high-frequency indicators point to an unwinding of front-loading in the second quarter.

Global inflation is showing mixed signs. The global median of sequential headline inflation has increased a notch, but core inflation has eased considerably and is now below 2 percent. Several economies, including the euro area, have seen downside surprises. In the United States, inflation has ticked up, with tentative signs of pass-through from tariffs and a weaker dollar to consumer prices in some import-sensitive categories, and intermediate goods costs for producers have risen.

Risks on a Hazy Horizon

Overall, risks to the outlook remain tilted to the downside, as in the April WEO.

The precarious equilibrium of trade policy stances assumed in the baseline could be disturbed. The new equilibrium could be one with tariff rates similar to those today, or it could be one in which rates are much higher, negotiations break down, and an escalation of protectionist measures restarts. Resetting tariff rates to the levels of April 2 or higher (as mentioned in the US administration's letters to trade partners) on August 1 and implementing tariffs as high as 50 percent on copper as currently pronounced would dampen global growth. By way of illustration, staff simulations suggest that global growth in 2025 would be roughly 0.2 percentage point lower if the maximum of April-2 tariff rates and tariff rates in the letters sent up to July 14 were to be implemented. Imposition of additional sectoral tariffs in areas such as electronics and pharmaceuticals could raise effective tariff rates and create bottlenecks that amplify the direct effect of higher tariffs. Nontariff measures targeting critical inputs could lead to dislocations in global supply chains. In the presence of strategic complementarities whereby price hikes by one firm increase the incentive for other firms to take similar action, the potential inflationary impact of additional tariffs and nontariff measures could prove to be significant and persistent. Even if tariff rates do not change relative to what is assumed in the baseline and no new protectionist measures are introduced, elevated trade policy uncertainty could start weighing more heavily on activity, as the current US deadlines for additional measures to take effect expire without lasting, comprehensive agreements. Firms' investments in existing and new trade linkages may be affected, thus slowing down growth in trade and output, especially in export-oriented economies.

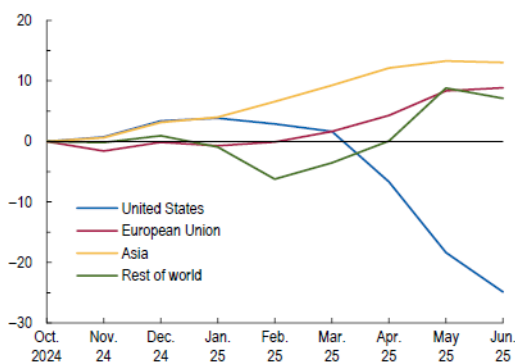

An escalation of geopolitical tensions, particularly in the Middle East or Ukraine, could introduce new negative supply shocks to the global economy. Shipping routes and supply chains may be disrupted while commodity prices rise, especially if, unlike what happened in June, supply infrastructure were to be damaged. These forces would lower growth and reignite inflationary pressures. Central banks could face more difficult trade-offs when they are already grappling with challenges from the trade environment.

Fiscal vulnerabilities could become more salient, with implications for financial markets and spillovers to the real economy. A number of economies, including Brazil, France, and the United States, are projected to run large fiscal deficits against the backdrop of historically high levels of public debt. This could raise term premiums and, especially in the case of the United States, tighten global financial conditions. An increase in US term premiums led by concerns regarding fiscal sustainability could also make financial markets excessively volatile, especially if it interacts with concerns about geoeconomic fragmentation and the future of the international monetary system centered on the dollar (see the 2025 *External Sector Report*).

Front-loading has shaped economic activity in the first half of the year, creating exposures that could amplify the impact of any potential negative shocks. For instance, a possible inventory overhang could reduce import orders more than projected. Firms may be burdened with increased holding costs and potential losses from obsolescence, especially if demand for stockpiled goods does not materialize or financial conditions tighten.

On the upside, a breakthrough in trade negotiations establishing a predictable framework could lead to a further decline in effective tariff rates and other protectionist measures. By meaningfully bringing down uncertainty and fostering policy predictability, nondiscriminatory agreements to reduce trade barriers could facilitate investment and other business decisions. Their impact could be larger if, besides goods trade, they cover trade in digital services and foreign investment.

 Note: Growth rates are calculated using three-month moving averages of seasonally adjusted goods exports, which are valued on free-on-board basis. Asia does not include Oceania.

In the longer term, benefits would accrue in the form of faster productivity growth and enhanced resilience to external shocks.

A new wave of credible trade agreements could usher in a broader reform momentum to lift medium-term growth. Progress on labor market policies for upskilling and a reduction of barriers to mobility, simplification of business regulations, and measures to enhance competition and innovation could become inevitable in a more challenging global economic environment.

Policies to Restore Confidence and Ensure Sustainability

Countries should reduce policy-induced uncertainty by promoting clear and transparent trade frameworks. Pragmatic cooperation is paramount in instances in which some rules of the international trading system, in their current form, may not be functioning as intended. This entails the pursuit of multilateral initiatives on the global commons and modernizing trade rules where feasible while seeking plurilateral or regional solutions on other matters. Bilateral negotiations can help defuse trade tensions and should aim to reduce trade and investment barriers while not increasing them toward third parties, which could escalate tensions with other trading partners. Such negotiations should be pursued with the ultimate aim of addressing the root causes of tensions: specifically, excess external imbalances arising from internal policy choices (see the 2025 *External Sector Report*). This would involve identifying and taking steps to resolve the underlying distortions for a more durable solution. Broad subsidies and industrial policies aiming to protect exports can be costly and distortive. To minimize the risk of misallocation amid limited fiscal space, industrial policies should be targeted narrowly to resolve specific, well-identified externalities and market failures. Adopting a pragmatic cooperative approach to these policies could reduce negative spillovers among trading partners. More generally, international cooperation across various policy areas, including trade, industrial policies, and taxation, can mitigate cross-country spillovers and support vulnerable economies.

Restoring fiscal space and ensuring sustainable public debt is crucial, even while addressing critical spending needs. This requires credible medium-term fiscal consolidation with growth-friendly adjustments and a focus on rebuilding buffers. Countries should enhance fiscal revenues, improve spending efficiency, crowd in private sector investment, and use automatic stabilizers for negative demand shocks. Any new discretionary measures should be well targeted at those severely affected by trade disruptions and should be temporary with clear sunset clauses. Spending cuts elsewhere or new revenues should offset such measures, especially in countries with limited fiscal space.

Central banks must carefully calibrate monetary policies to country-specific circumstances to maintain price and financial stability amid prolonged trade tensions and evolving tariffs. In countries imposing tariffs on trading partners—either by initiating or by retaliating—these actions constitute supply shocks. Hence, central banks in these countries face a difficult trade-off between shielding the real sector and preventing the expected one-off increase in prices from turning into persistently higher inflation. The trade-off becomes more pertinent if inflation is already above target. Further easing of monetary policy should then depend on having convincing evidence that inflation and inflation expectations are heading decisively back to target. Countries that have not imposed tariffs, by contrast, face a demand shock. Central banks could, in this case, gradually reduce the policy rate.

The differing economic impact of tariffs across countries could complicate the trade-offs by introducing a divergence in monetary policy stances. Under normal circumstances, exchange rates should be allowed to adjust. The IMF's Integrated Policy Framework provides guidance tailored to country-specific conditions on appropriate policy responses if disruptive movements in foreign exchange and risk premiums take hold. In some cases under such circumstances, at the same time as upholding appropriate monetary and fiscal policies, it may be suitable to implement temporary foreign exchange interventions or capital flow management measures.

In both tariffing and tariffed countries, elevated uncertainty and volatility require robust prudential policies to safeguard financial stability. Crucially, the ambiguous and volatile landscape also requires clear and consistent messaging from central banks and the protection of central bank independence, not only in legal terms, but also in practice.

Amid continued elevated levels of uncertainty, more prominent use of scenario analysis can support macroeconomic policymaking. Contingency plans for different types of risks should be ready to be activated should any of those risks be realized.

Ultimately, lifting medium-term growth prospects is the only sustainable way to ease macroeconomic trade-offs. Enduring structural reforms in areas such as labor markets, education, regulation, and competition can boost productivity, potential growth, and job creation. In addition, measures fostering technological advancements, including digitalization and the adoption of artificial intelligence, can further enhance productivity and potential growth.

Indian Economy Overview

Introduction

India's economic journey over the past few years has been marked by remarkable growth and a steady rise in its position on the global stage. After overtaking the United Kingdom (UK) to become the fifth largest economy in Q1 FY23, India has continued this upward trajectory to surpass Japan in June 2025 to become the fourth largest economy in the world. With a nominal Gross Domestic Product (GDP) of Rs. 3,31,03,000 crore (US\$ 3.78 trillion), India's growth reflects a combination of strong domestic demand and policy reforms positioning the country as a key destination for global capital.

Further, India is projected to reach a GDP of Rs. 4,26,45,000 crore (US\$ 5 trillion) by 2027 and is on course to surpass Germany by 2028. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Market Overview

India's economy shows robust expansion, with real GDP for FY25 estimated at Rs. 1,87,97,000 crore (US\$ 2.20 trillion), from Rs. 1,76,51,000 crore (US\$ 2.06 trillion) in FY24 with a growth rate of 6.5%. This growth is driven by rising employment and stronger private consumption, supported by improving consumer sentiment, which is expected to keep the momentum going in the near future.

Trade remains a critical pillar of India's growth story with exports reaching Rs. 37,31,000 crore (US\$ 436.6 billion) in FY25, led by Engineering Goods (26.88%), Petroleum Products (13.86%) and Electronic Goods (8.89%). These exports helped the economy stay resilient during the pandemic when other sectors slowed. Union Minister of Commerce and Industry, Mr. Piyush Goyal projects exports to reach Rs. 85,44,000 crore (US\$ 1 trillion) by 2030.

India's ability to attract Foreign Direct Investment (FDI) has also strengthened. The country received record FDI inflows amounting to Rs. 4,21,929 crore (US\$ 49.3 billion) in FY25 a 15% increase over FY24,

supported by a stable policy environment, a large domestic market and steady economic growth positioning the country as a key destination for global capital. This capital inflow also complements government plans for increased investment in infrastructure and asset-building projects to further boost economic growth.

India's external economic position is improving. The current account deficit narrowed to Rs. 1,98,726 crore (US\$ 23.30 billion), or 0.6% of GDP, in FY25 from Rs. 2,21,754 crore (US\$ 26.00 billion), or 0.7% of GDP, in FY24. This improvement was due to higher net receipts from services and secondary income, according to the Reserve Bank of India (RBI).

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With India's economy showing resilient growth, supported by strong domestic demand, policy reforms, and a healthy investment pipeline, several new projects and developments are underway across key sectors. This positive development across key sectors is evident from following key economic data points.

- According to the Department for Promotion of Industry and Internal Trade (DPIIT), India's cumulative FDI inflow stood at Rs. 91,45,988 crore (US\$ 1.07 trillion) between April 2000-March 2025 with major share coming from Mauritius at Rs. 15,36,849 crore (US\$ 180.19 billion) with a total share of 25%, followed by Singapore at 24% with Rs. 14,91,603 crore (US\$ 174.88 billion), the United States (US) at 10% with Rs. 6,02,574 crore (US\$ 70.65 billion), the Netherlands at 7% with Rs. 4,54,613 crore (US\$ 53.3 billion), and Japan at 6% with Rs. 3,78,653 crore (US\$ 44.39 billion).
- As of July 4, 2025, India's foreign exchange reserves stood at Rs. 59,68,048 crore (US\$ 699.74 billion).

- In May 2025, private equity (PE) and venture capital (VC) investments reached Rs. 20,470 crore (US\$ 2.4 billion) across 97 deals.
- Foreign Institutional Investors (FII) outflows in FY25 were close to Rs. 1,27,000 crore (US\$ 14.89 billion), while Domestic Institutional Investors (DII) bought in Rs. 6,00,000 crore (US\$ 70.34 billion) in the same period.
- The HSBC India Manufacturing Purchasing Managers' Index (PMI) rose to a 14-month high of 58.4 in June 2025 from 57.6 in May, indicating a strong improvement in manufacturing conditions. Robust domestic and international demand drove sharp increases in output and new orders, while employment saw a record rise as firms expanded their workforce to meet rising workloads. New export orders surged, marking the third-fastest growth since the survey began in 2005. Although input cost inflation eased, producer prices increased as companies passed on higher freight and labour costs to customers.
- India saw a robust 10.35% growth in passengers carried by domestic airlines at 431.98 lakh in FY25, from 391.46 lakh in FY24, according to the Directorate General of Civil Aviation (DGCA).
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks third position in the global number of scientific publications.
- In FY25, the Goods and Services Tax (GST) recorded its highest-ever gross collection at Rs. 22,08,000 crore (US\$ 258 billion), registering a YoY growth of 9.4%. The average monthly collection stood at Rs. 1,84,000 crore (US\$ 21.57 billion).
- In May 2025, the overall Index of Industrial Production (IIP) stood at 156.6 (base 2011–12 = 100), reflecting a YoY growth of 1.2%. The mining, manufacturing and electricity sectors stood at 136.6, 154.3 and 216, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) - Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- India's wheat procurement for FY26 has reached 29.7 million tonnes as of May 22, 2025, the highest in four years and up 13.5% YoY. Strong production of 115.43 million tonnes, favourable weather, and bonuses above the Minimum Support Price (MSP) in key states have driven this growth. The Food Corporation of India expects procurement to hit 32.5 million tonnes by season end, raising stocks to 44 million tonnes, well above the 18.4 million tonnes needed for the Public Distribution System.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, several of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- On July 5, 2025, the Union Cabinet approved the Rs. 1,00,000 crore (US\$ 11.72 billion) Research, Development and Innovation (RDI) Scheme, launching long-term, low- or zero-interest funding via a special purpose fund under the ANRF to jump-start India's R&D ecosystem and support deep-tech and startup innovation.
- On March 27, 2025, the Reserve Bank of India proposed doubling the investment cap for individual foreign investors in listed firms from 5% to 10%, with a combined foreign individual limit increasing to 24%, to counter Foreign Portfolio Investment (FPI) outflows.
- According to a report by Wood Mackenzie in January 2025, India, the US, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32,07,000 crore (US\$ 375 billion) and Rs. 48,21,000 crore (US\$ 564 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, one crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with Micro, Small and Medium Enterprises (MSME) value chains.

- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1,309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.

- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

Road Ahead

India's economy grew by 6.5% in FY25. With a 7.4% growth rate in Q4 FY25, with RBI projecting a growth rate of 6.5% in FY26 as well. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. In 2024, India rose to 15th place globally in FDI rankings and retained its position as South Asia's top recipient.

In H1 FY25, India's growth-focused approach was underscored by the government's capital expenditure outlay of Rs. 15,02,000 crore (US\$ 176 billion), reinforcing its commitment to infrastructure-led development.

In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10% to Rs. 11,21,000 crore (US\$ 131 billion) over Rs. 10,18,000 crore (US\$ 119 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total goods and service exports surged by 76% over the past decade, touching Rs. 70,36,425 crore (US\$ 825 billion) in FY25, driven by strong performance in engineering goods, electronics, and pharmaceuticals. With a reduction in port congestion, supply networks are being restored.

With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

IT & BPM INDUSTRY IN INDIA

Introduction

The IT & BPM sector has become one of the most significant growth catalysts for the Indian economy, contributing significantly to the country's GDP and public welfare.

India's IT sector witnessed a 16% YoY growth in hiring in April, driven by factors such as artificial intelligence (AI) adoption, cloud modernisation, and the expansion of Global Capability Centers (GCCs).

India's first made-in-India graphics processing units (GPUs) are expected to be ready for technology demonstrations by the end of 2025. Production readiness is projected for 2029 under the Rs. 10,372 crore (US\$ 1.21 billion) IndiaAI Mission.

As innovative digital applications permeate sector after sector, India is now prepared for the next phase of growth in its IT revolution. India is viewed by the rest of the world as having one of the largest Internet user bases and the cheapest Internet rates, with 76 crore citizens now having access to the Internet.

The current emphasis is on the production of significant economic value and citizen empowerment, thanks to a solid foundation of digital infrastructure and enhanced digital access provided by the Digital India Programme. India is one of the countries with the quickest pace of digital adoption. This was accomplished through a mix of government action, commercial innovation and investment, and new digital applications that are already improving and permeating a variety of activities and different forms of work, thus having a positive impact on the daily lives of citizens.

India's rankings improved six places to the 39th position in the 2024 edition of the Global Innovation Index (GII).

Market Size

According to the National Association of Software and Service Companies (NASSCOM), the Indian IT industry's revenue touched US\$ 227 billion in FY22, a 15.5% YoY growth and was estimated to have touched US\$ 245 billion in FY23.

Mid-tier Information Technology (IT) companies have reported stronger growth than their larger counterparts in FY25, demonstrating their ability to effectively navigate an uncertain macroeconomic environment. The challenge, however, remains whether they can sustain this momentum in FY26.

Source: NASSCOM

India's IT exports are projected to reach Rs. 17,95,920 crore (US\$ 210 billion) in FY25, with the US market recovering, European demand weakening, and a 5-6% growth anticipated in FY26, alongside the opportunities and challenges posed by generative AI.

The government has inked an agreement with Paytm (One97 Communications Ltd) under which the company would provide mentorship, infrastructure support, market access, and funding opportunities to start-ups.

The system infrastructure software market in India is expected to reach a projected revenue of Rs. 178 million (US\$ 20,823.6 million) by 2030. A compound annual growth rate of 9.2% is expected of India system infrastructure software market from 2023 to 2030.

The IT spending in India is estimated to record a double-digit growth of 11.1% in 2024, totalling US\$ 138.6

billion up from US\$ 124.7 billion last year. By 2025, the Indian software product industry is projected to hit Rs. 8,68,700 crore (US\$ 100 billion) as companies seek to expand globally.

The Indian software product industry is expected to reach US\$ 100 billion by 2025. Indian companies are focusing on investing internationally to expand their global footprint and enhance their global delivery centres.

The data annotation market in India stood at US\$ 250 million in FY20, of which the US market contributed 60% to the overall value. The market is expected to reach US\$ 7 billion by 2030 due to accelerated domestic demand for AI.

India's IT industry is likely to hit the US\$ 350 billion mark by 2026 and contribute 10% towards the country's gross domestic product (GDP), Infomerics Ratings said in a report.

The export of IT services has been the major contributor, accounting for more than 53% of total IT exports (including hardware).

BPM and engineering and R&D (ER&D) and software products exports accounted for 22% and 25%, respectively of total IT exports during FY23.

Exports from the Indian IT industry stood at US\$ 194 billion in FY23. The export of IT services was the major contributor, accounting for more than 51% of total IT exports (including hardware). BPM, and Software products and engineering services accounted for 19.3% and 22.1% each of total IT exports during FY23.

By 2026, the increased use of cloud technology could create 14 million jobs and contribute Rs. 33,01,060 crore (US\$ 380 billion) to India's GDP.

INDIAN ELECTRONICS SYSTEM DESIGN & MANUFACTURING (ESDM) INDUSTRY

Introduction

The Indian electronics system design and manufacturing (ESDM) sector is one of the fastest growing sectors in the economy and is witnessing a strong expansion in the country. The ESDM market in India is well known internationally for its potential for consumption and has experienced constant growth.

Indian manufacturers are attracting the attention of multinational corporations due to shifting global landscapes in electronics design and manufacturing capabilities, as well as cost structures. Companies from all over the world are striving to develop local capacities in India not only to serve the domestic market but also to cater to international markets.

The Electronics System Design & Manufacturing (ESDM) industry includes electronic hardware products and components relating to information technology (IT), office automation, telecom, consumer electronics, aviation, aerospace, defence, solar photovoltaic, nano electronics and medical electronics. The industry also includes design-

related activities such as product designing, chip designing, Very Large-Scale Integration (VLSI), board designing and embedded systems.

India witnessed a substantial spike in demand for electronic products in the last few years; this is mainly attributed to India's position as second-largest mobile phone manufacturer worldwide and surge in internet penetration rate. The Government of India attributes high priority to electronics hardware manufacturing, as it is one of the crucial pillars of Make in India, Digital India, and Start-up India programs.

The Electronics System Design & Manufacturing (ESDM) sector plays a vital role in the government's goal of generating US\$ 1 trillion of economic value from the digital economy by 2025. With various government initiatives aiming to boost domestic manufacturing, India has already started witnessing initial movement with increased production and assembly activities across products such as mobile phones and other consumer electronics.

Market Size

Electronics system market is expected to witness 2.3x demand of its current size (FY19) to reach US\$ 160 billion by FY25. The top products under the ESDM sector with the highest CAGR include IT/OA at 54%, followed by industrial electronics at 38% and automotive electronics at 10%.

India's electronics industry is targeting a manufacturing output of Rs. 43,10,000 (US\$ 500 billion) by 2030, which requires a fivefold increase in production. This growth is also expected to create 12 million jobs by 2027.

India's export of electronic goods rose tremendously to reach US\$ 38.56 billion in FY25 with a growth of 20.4% YoY. Mobile phones, IT hardware (laptops, tablets), consumer electronics (TV and audio), industrial electronics and auto electronics are key exports in this sector.

India is one of the largest consumer electronics markets in the Asia Pacific Region and is home to considerable talent for electronic chip design and embedded software. India has committed to reach US\$ 300 billion worth of electronics manufacturing and exports of US\$ 120 billion by 2025-26.

Major Government initiatives such as 'Digital India', 'Make in India' and supportive policies including a favourable FDI Policy for electronics manufacturing have simplified the process of setting up manufacturing units in India.

India is the second fastest digitizing economy amongst the 17 leading economies of the world. The Government of India aims to make Electronics Goods amongst India's 2-3 top-ranking exports by 2026.

Investments/ Developments

Reliance Industries is set to build the world's largest data center in Jamnagar, Gujarat, marking a major step in its entry into India's artificial intelligence (AI) sector. The company has procured AI semiconductors from Nvidia to power this project following a collaboration announcement at October 2024 Nvidia AI Summit.

Apple is engaged in discussions with Bharat Forge to establish a partnership, potentially designating the company as a supplier for the manufacturing of components such as mechanical parts.

FollowG has introduced an AI-powered application for the Open Network for Digital Commerce (ONDC), designed to assist small and medium-sized electronics retailers by facilitating connections with buyers across the country.

Investment of Rs. 8,803 crore (US\$ 1.06 billion) has been made under the scheme for promotion of manufacturing of electronic components and semiconductors.

The Ministry of Electronics and Information Technology has supported over 3,600 tech startups with a total fund disbursement of Rs. 212 crore (US\$ 25.5 million).

India has made substantial cuts to import duties on mobile phones to enhance exports. In the last financial year, mobile phone exports reached Rs 1.2 lakh crore (US\$ 14.4 billion), and this upward trend is expected to persist. India emerged as the second-largest manufacturer of mobile phones in the world, with a production value of mobile devices reaching US\$ 49.16 billion in 2024.

Prime Minister Mr. Narendra Modi participated in the event named India's Techade: Chips for Viksit Bharat and laid the foundation stone for three semiconductor projects valued at Rs. 1.25 lakh crore (US\$ 14.97 billion) on 13th March 2024.

Major Government initiatives such as 'Digital India', 'Make in India' and supportive policies including a favorable FDI Policy for electronics manufacturing have simplified the process of setting up manufacturing units in India.

Post-COVID, the Government of India aims to increase India's contribution by around US\$ 400 billion worth of electronics goods including exports worth US\$ 120 billion, which would account for 9-10% of the overall global value chains, from the current supply potential of 1-2%.

Union Budget 2023-24 has allocated Rs. 16,549 crore (US\$ 2 billion) for the Ministry of Electronics and Information Technology, which is nearly 40% higher on year. The budget for FY23 had allocated Rs. 14,300 crore (US\$ 1.73 billion) for the IT ministry.

The Indian startup ecosystem is experiencing a surge over the years, due to rapid technological advancements, increasing internet penetration, growing digital infrastructure, rising startup culture, government initiatives like Digital India, Make in India, and Startup India, as well as a large pool of skilled workforce.

India has witnessed an exceptional surge in the creation and funding of startups as the country has solidified its position as a major global centre for innovation and businesses. However, securing adequate funding remains a significant task for startups, often leading to survival challenges.

In 2023, the funding scenario for tech startups turned bleak amid the global uncertainty, witnessing a 67% YoY plunge in total funding to US\$ 6.0 billion. This decline came after the peak funding levels observed in 2021 (US\$ 24.1 billion) and 2022 (US\$ 18.2 billion), where investors displayed confidence in Indian tech startups. In 2023, the number of deals declined to 824. However, the decline appears to be cyclical than a long-term trend.

STPI Signs MoUs to strengthen tech startup ecosystem: AIC STPINEXT Initiatives (STPINEXT), a special purpose vehicle of Software Technology Parks of India (STPI), an organisation under the Ministry of Electronics and Information Technology (MeitY) has signed two memorandums of understanding (MoUs), one with HDFC Bank, and another with Excelpoint Systems India Pvt. Ltd., a niche technology player for fostering entrepreneurship and nurturing tech startups in the country. These partners would play a critical role in supporting and handholding the startups in the growth journey through technical guidance & assistance, mentoring, pitching to investors, funding support, and market connect & access etc.

Road Ahead

Local electronics design and production are being positively influenced by ongoing domestic consumption, changing dynamics in the global supply chain, and a plethora of policy initiatives to assist indigenous manufacturing in the current

period is most advantageous. The smooth implementation of new initiatives and the reversal of restrictive laws will go a long way toward boosting international business confidence in India's business environment and attracting manufacturing investments.

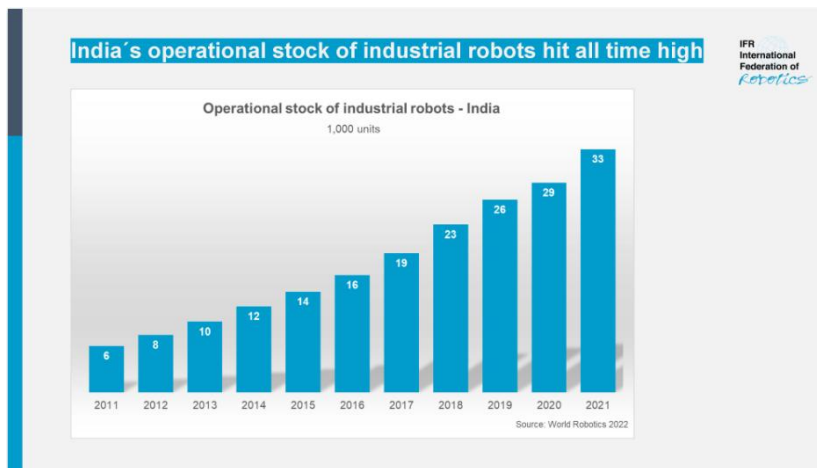

In India, Sony, Samsung, LG Electronics, Panasonic, and other companies are the market leaders in the ESDM sector. Government efforts are concentrated on bridging the digital gap. Projects like "Digital India," "Smart Cities," "ePanchayats," "National Optical Fiber Network," etc. enhanced consumer demand for electronic goods around the nation. India's middle class is rapidly expanding, which has improved the affordability of electronics products. The demand for electronic goods has increased as consumers' preferences for products and devices with smart technology (like smart LED TVs) and inventive designs have changed and disposable incomes have increased. Continuous rise in personal disposable income in India increased to reach 2,410 in FY23, which is directly correlated with consumers' desire to spend money on electronics.

Fueled by strong policy support, huge investments by public and private stakeholders and a spike in demand for electronic products, the ESDM sector in India has bright prospects ahead of it and is predicted to reach US\$ 220 billion by 2025, expanding at 16.1% CAGR between 2019-2025.

ROBOTICS INDUSTRY

Sales of industrial robots in India reached a new record of 4,945 units installed. This is an increase of 54 percent compared to the previous year (2020: 3,215 units). In terms of annual installations, India now ranks in tenth position worldwide. These are findings of the report World Robotics, presented by the International Federation of Robotics (IFR).

“India is one of the world's fastest-growing industrial economies,” says Marina Bill, President of the International Federation of Robotics. “Within five years, the operational stock of industrial robots has more than doubled, to reach 33,220 units in 2021. This corresponds to an average annual growth rate of 16% since 2016.”

Today, India is the world's fifth largest economy measured by manufacturing output. According to World Bank data, India's manufacturing value added in 2021 was USD 443.9 billion, a 21.6% increase from 2020.

The automotive industry remains the largest customer for the robotics industry in India with a share of 31% in 2021. Installations more than doubled to 1,547 units (+108%). The general industry in India is led by the metal industry with 308 units (-9%), the rubber and plastics industry with 246 units (+27%) and the electrical/electronics industry with 215 units (+98%).

Impressive potential for India

The long-term potential of robotics in India becomes clearer when compared to China: India's robot density in the automotive industry, which is the number of industrial robots per 10,000 employees, reached 148 robots in 2021. China's robot density hit 131 units in 2010 and skyrocketed to 772 units in 2021.

The Indian government supports growth in the industrial sector as one of the vital figures that affect the Gross Domestic Product (GDP). Today, the country's GDP of about USD 3 trillion ranks in fifth place, head-to-head with the UK and France – behind Germany, Japan, China and the USA - the International Monetary Fund reports.

Outlook for India

“As a result of the recent supply chain disruption, companies are rethinking their nearshoring strategies in Southeast Asia,” says Marina Bill. “India has traditionally been a popular destination for nearshoring in the manufacturing segment. The Indian government wants the country to be considered for new diversification options such as friendshoring, which is partnering with countries that share similar values and interests.”

The manufacturing sector is also expected to benefit from the government's initiatives to boost its competitiveness and attractiveness for investors. The Production Linked Incentive (PLI) scheme, for example, currently set to run until 2025, subsidizes companies that create production capacity in India in robot customer industries like automotive, metal, pharmaceuticals, and food processing.

Robots help to create new jobs

New manufacturing capacities in India are an important step to provide adequate education and employment opportunities for its people: According to projections of the United Nations, India now has a population of 1,4 billion, surpassing China for the first time. This means that India has a large and young workforce that can drive economic growth and innovation. India is expected to have the largest working-age population in the world by 2027.

iii) Custom Software and Application Development

Custom Software Development

When a business has unique requirements that pre-built software cannot address, custom software development becomes essential. We work closely with our clients to understand their specific needs, whether it's streamlining workflows, automating processes, or developing tools tailored to their industry. For instance, a warehouse operation may require a real-time inventory tracking system with automated low-stock alerts. We can develop such a system, ensuring it's scalable and capable of integrating with broader platforms over time, potentially evolving into a full-fledged ERP solution. Our focus is on delivering software that is intuitive, efficient, and adaptable to support the growth and changing needs of your business.

Mobile App Development

Our mobile app development service helps create apps for iOS or Android that work for business or customers. Whether it's an app for clients to place orders on their phones or one for their team to update project statuses from the field. We handle the design, coding, and testing to ensure it's smooth and easy to use, even if the internet is not perfect. While this isn't an ERP or MIS solution itself, it can support those systems by letting people access enterprise data or management reports on their phones, making it a handy add-on for bigger setups.

Portal Development

A portal is like a digital front door for the business. We build custom portals that bring everything together for employees, clients, or partners in one place. For instance, an employee portal could let the team request time off or find training resources, while a client portal might let customers check order statuses or chat with support. We make sure it looks clean, works well, and keeps data secure with the right access controls. This could lean into MIS if we add dashboards or reports, and with some tweaks, it might support ERP tasks like tracking resources or projects.

Website Development/SEO

We build and help to develop user-friendly websites and web applications that serve as the digital backbone of business. Our services transform online presence from a simple digital business card into a powerful tool for growth and engagement. SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 (the "UPI Streamlining Circular"), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post- issue BRLM will be required to compensate the concerned investor. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the LMs, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law.
