## FORWARD LOOKING STATEMENTS

All statements contained in this Prospectus that are not statements of historical fact constitute forward-looking statements. All statements regarding our expected financial condition and results of operations, business, plans and prospects are forward-looking statements. These forward-looking statements include statements with respect to our business strategy, our revenue and profitability, our projects and other matters discussed in this Prospectus regarding matters that are not historical facts. Investors can generally identify forward-looking statements by the use of terminology such as “aim”, “anticipate”, “believe”, “expect”, “estimate”, “intend”, “objective”, “plan”, “project”, “may”, “will”, “will continue”, “will pursue”, “contemplate”, “future”, “goal”, “propose”, “will likely result”, “will seek to” or other words or phrases of similar import. All forward-looking statements (whether made by us or any third party) are predictions and are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

Forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect.

Further the actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, regulatory changes pertaining to the industries in India in which our Company operates and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India and overseas which have an impact on our business activities or investments, the monetary and fiscal policies of India and other jurisdictions in which we operate, inflation, deflation, unanticipated volatility in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes, changes in competition in our industry and incidence of any natural calamities and/or acts of violence.

- We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations;
- Our Company has not entered into any long-term contracts with our customers and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow would adversely impact our revenues and profitability;
- Our business and profitability heavily rely on the consistent and timely availability of finished products. Any disruption in supply or price volatility of these products can negatively impact our operations and financial health. Additionally, our dependence on third-party suppliers, without firm supply commitments or exclusive arrangements, poses a risk. The loss of any suppliers could adversely affect our business, operational outcomes, and financial condition;
- Our future growth is dependent upon our ability to identify and maintain new products, technologies and customers that achieve market acceptance with acceptable margins;
- Our business is dependent on suppliers/manufacturers effectively maintaining, promoting or developing their brands and maintaining standard quality products including launching new AV (Audio-Video) products at regular intervals;
- Most projects we operate have been awarded primarily through a competitive bidding process and our financial performance is largely dependent on our successful bidding for new projects. We may not always be able to qualify for, compete and win projects. If we are not able to successfully bid for new projects, it may adversely affect our business operations and financial conditions;
- Any Penalty or demand raised by statutory authorities in future will affect financial position of the Company;
- There are certain discrepancies/errors/delay filings noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate or any other law could impact the financial position of the Company to that extent;

- Our revenue is heavily reliant on our operations within certain geographical regions. Any adverse developments, such as economic downturns, political instability, or natural disasters, in these regions could significantly impact our revenue and overall financial performance;
- We could be subject to product liability claims, refunds and recalls or return of products, warranty claims which may have a material adverse impact, in which case our business and revenues, and ultimately our reputation, could be negatively affected;
- Any disruption or shutdown of our warehouse facilities, could adversely affect our business, results of operations and financial condition ;
- Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.

For further discussions of factors that could cause our actual results to differ, please refer the section titled “*Risk Factors*” and chapter titled “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on page 30, 123, and 226, respectively. By their nature, certain market risk disclosures are only estimating and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

There can be no assurance to Bidders that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, Bidders are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements to be a guarantee of our future performance.

Forward-looking statements reflect the current views as of the date of this Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, our Directors, the Syndicate Members nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

### SECTION III – RISK FACTORS

*An investment in Equity Shares involves a high degree of financial risk. Investors should carefully consider all information in this Prospectus, including the risks described below, before making an investment in our Equity Shares. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could suffer, the price of the Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Issue. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Any of the following risks, as well as the other risks and uncertainties discussed in this Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment.*

*This Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. #### MATERIALITY

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- Some events may have material impact quantitatively;
- Some events may have material impact qualitatively instead of quantitatively;
- Some events may not be material individually but may be found material collectively;
- Some events may not be material at present but may be having material impact in future.

#### BUSINESS RELATED RISKS

- 1. We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations.***

We depend on certain customers who have contributed to a substantial portion of our total revenues. The table below sets forth the revenue derived from our top 1 customer, top 5 customers and top 10 customers during the respective financial years:

(₹ in Lakhs)

*As certified by Statutory Auditor of our Company, by way of their certificate dated November 04, 2025.*

Our success is contingent upon our ability to retain our existing customer base, attract new users, and maintain or increase the level of engagement with the Audio-Video (AV) products we offer, which include active LED screens (indoor/outdoor), professional display screens (touch / non-touch screens), digital signage screens, video conferencing cameras, processors, media players, speakers, mics, amplifiers and cables etc, as well as our tailored AV solution for customized AV solutions for corporate boardroom, retail, outdoor advertising, smart classroom, government projects, place of worship, home theatre, experience centre and other industries. There is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. Reliance on a limited number of customers for our business may generally involve several risks. These risks may include, but are not limited to, reduction, delay or cancellation of orders from our significant customers; failure to renegotiate favourable terms with our key customers; the loss of these customers; all of which would have a material adverse effect on the business, financial condition, results of operations and future prospects of our Company. In order to retain some of our existing customers we may also be required to offer terms to such customers which we may place restraints on our resources.

Maintaining strong relationships with our key customers is, therefore, essential to our business strategy and to the growth of our business. Some of these customers have been associated with us for the past three years. Some of our customers may place demands on our resources or may require us to undertake additional obligations which have the effect of increasing our operating costs and therefore affect our profitability. Additionally, the loss of any key customer, may significantly affect our revenues, and we may have difficulty securing comparable levels of business from other customers to offset any loss of revenue from the loss of any of our key customers including our largest customer or even our top five customers. If one or more of our customers were to become insolvent or otherwise unable to pay for the products supplied by us, this could have a have an impact on our business as we may not be able to recoup the unpaid production costs and materials incurred for operation purposes. While we have not encountered any loss of any major customers during the period ended June 30, 2025 and in the last three Fiscals, there can be no assurance that we would not lose any of our major customers in the future. Any loss of our major customers may reduce our sales and affect our estimates of anticipated sales, and may have an adverse effect on our business, results of operations, financial condition and cash flow. Further pricing pressure from customers may adversely affect our gross margin, profitability and ability to increase our prices, which in turn may materially adversely affect our business, results of operations and financial condition. Our contingency plan if company losses customers is as below:

*a. Comprehensive Risk Assessment:*

The Company undertakes periodic assessments of market dynamics, client engagement patterns, and sectoral developments to identify potential risks to customer retention. Early detection enables management to proactively address emerging concerns before they materialize into customer loss.

*b. Diversification of Customer Base:*

To mitigate concentration risks, the Company strategically diversifies its clientele across multiple industries, geographies, and business segments. This ensures that the performance of the Company is not disproportionately impacted by the exit of any single customer or sectoral downturn.

*c. Customer Retention and Relationship Management:*

An experienced customer success and relationship management team closely monitors client satisfaction levels, gathers feedback, and analyzes potential reasons for dissatisfaction or disengagement. Corrective actions, including process improvements, customized solutions, and value-added services, are implemented to enhance customer loyalty and retention.

*d. Adaptive Business Strategy:*

In case of significant client loss, the Company is equipped to reallocate resources, recalibrate operational strategies, and intensify business development efforts in growth sectors, thereby ensuring stability of revenue streams and long-term sustainability.

**2. *Our Company has not entered into any long-term contracts with our customers and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow would adversely impact our revenues and profitability.***

We have not entered into any fixed contracts with our customers and we cater to them on an order-by-order basis. Generally, we entered with them project base contract. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, quality consistency, fluctuation in demand for our Company's products and customer's inventory management. Although we place a strong emphasis on quality, pricing and timely delivery of our products and after sales service such as feedback on the trends in their market, personal interaction by the top management with the customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

**3. Our business and profitability heavily rely on the consistent and timely availability of products. Any disruption in supply or price volatility of these products can negatively impact our operations and financial health. Additionally, our dependence on third-party suppliers, without firm supply commitments or exclusive arrangements, poses a risk. The loss of any suppliers could adversely affect our business, operational outcomes, and financial condition.**

Our company is engaged in the business of PRO AV (professional audio-video) integration. We excel in designing and implementing customized AV solutions for corporate boardroom, retail, outdoor advertising, smart classroom, government projects, place of worship, home theatre, experience center and other industries. Our Company is also engaged in direct selling and distribution of PRO AV products including active LED screens (indoor/outdoor), professional display screens (touch / non-touch screens), digital signage screens, video conferencing cameras, processors, media players, speakers, mics, amplifiers and cables etc. In addition to integration and direct selling of PRO AV products, we also offer after-sales services such as technical support, repair & maintenance services, and annual maintenance contracts (AMC) for AV infrastructure to ensure our customer's satisfaction.

The products we use are obtained from our global suppliers/ manufacturers or domestic vendors. There is a risk that these products may not meet the specified terms and conditions or performance standards, which could disrupt our business operations and damage our brand value. The success of our business operations is critically dependent on the availability of these finished products from our third-party global suppliers/manufacturers and domestic vendors. A substantial portion of the company's purchases of Audio-Video (AV) products has been dependent upon a few suppliers. Our inability to obtain good products in a timely manner, in sufficient quantities could adversely affect our operations, financial condition and/or profitability. Further our company relies on imported products with global brands, either through direct imports or high-seas purchases. However, this reliance on imports comes with several risks. Any deterioration in India's trade relations with these countries, or challenges faced by suppliers in their respective regions, could disrupt our supply chain, impacting our profitability. Purchases made from our top 10 suppliers for the period ended June 30, 2025 and for the financial year ended March 31, 2025, 2024 and 2023, were ₹ 2,750.08 lakhs, ₹ 8,014.32 lakhs, ₹ 6,284.78 lakhs and ₹ 4,306.06 lakhs representing 87.53%, 78.38%, 82.18% and 82.20% of our total purchases.

Any disruptions in the supply chain such as delays in manufacturing, transportation issues, or shortages of key components could hinder our ability to deliver products to our customers in a timely manner. This could lead to unfulfilled orders, customer dissatisfaction, and potential loss of market share. Price volatility of AV products, driven by factors such as fluctuations in raw material costs, changes in international trade policies, or currency exchange rate movements, could also adversely affect our cost structure and profitability. Sudden increases in the cost of acquiring these products may reduce our profit margins, especially if we are unable to pass on these costs to our customers through price adjustments. The following table sets forth cost of material consumed for the years indicated, which are also expressed as a percentage of total expenses:

(₹ in Lakhs)

Particulars	June 30, 2025		FY 2024-25		FY 2023-24		FY 2022-23	
	₹ in Lakhs	% of total expenses	₹ in Lakhs	% of total expenses	₹ in Lakhs	% of total expenses	₹ in Lakhs	% of total expenses
Cost of material consumed	2,748.11	88.31	9,953.43	87.40	7,330.41	88.59	5,841.20	84.02

Our business model depends on third-party global and domestic suppliers, with whom we do not have long-term or exclusive agreements but procure the products on order basis or short-term arrangement basis. This reliance exposes us to potential supply chain disruptions. If any key suppliers were to reduce or stop supplying products, or prioritize other customers, we may struggle to source comparable alternatives at similar costs or within required timelines. Identifying new suppliers could be both time-consuming and expensive, leading to operational delays. The loss or reduced availability of products from major suppliers could compel us to find alternatives at higher costs or potentially lower

quality, adversely affecting our operations, profitability, and financial health. These disruptions may weaken our competitive position and hinder our long-term growth prospects. While we have not experienced any interruptions in the supply of finished products in the period ended June 30, 2025, and in the past three Fiscals, we cannot assure you that such instance will not arise in the future.

**4. *Our future growth is dependent upon our ability to identify and maintain new products, technologies and customers that achieve market acceptance with acceptable margins.***

Our company is engaged in the business of PRO AV (professional audio-video) integration. Our Company is also engaged in direct selling and distribution of PRO AV products including active LED screens (indoor/outdoor), professional display screens (touch / non-touch screens), digital signage screens, video conferencing cameras, processors, media players, speakers, mics, amplifiers and cables etc. In addition to integration and direct selling of PRO AV products, we also offer after-sales services such as technical support, repair & maintenance services, and annual maintenance contracts (AMC) for AV infrastructure to ensure our customer's satisfaction. Thus, the markets in which we compete are characterized by changing consumer tastes, preferences, evolving industry standards and continuous improvements in product quality and variants. Our future success depends on our ability to timely identify & upgrade our self with competitive and innovative products and to market them quickly and cost effectively. Moreover, we are dependent on the spending habits of the consumers in India. If the end-user demand is low, we may see significant changes in orders from our customers and may experience greater pricing pressures. Our ability to anticipate customer needs and develop or acquire new products at competitive prices requires significant resources. The failure to successfully address these challenges could materially disrupt our sales and operations.

In case of any mismanagement in level of inventory and market demand, we may lose customers and be required to discount certain products, all of which could have an adverse effect on our business, results of operations, financial condition, cash flows and prospects. Decline in the demand for some of the products without a corresponding increase in demand for alternative products sold by us could negatively impact our revenue temporarily or permanently. These trends may also cause fluctuations in our results of operations between different periods. Our success is also dependent on the ability of our global suppliers/manufacturers or domestic vendors to anticipate, identify and respond to the latest technological trends and customer demands and to translate such trends and demands into product offerings in a timely manner, adapt to customer preferences, and our ability to continue upgrading our platforms in a manner so as to cater to evolving customer preferences.

**5. *Our business is dependent on global suppliers/manufacturers effectively maintaining, promoting or developing their brands and maintaining standard quality products including launching new AV (Audio-Video) products at regular intervals.***

Maintaining, developing, and enhancing brands, as well as retaining customers, involves several critical factors, such as increasing brand awareness through brand-building initiatives and ensuring customer satisfaction with quality customer service. If global suppliers/manufacturers cannot adapt to technological advancements or the growing popularity of alternative products, their products may become obsolete. To remain competitive, global suppliers/manufacturers need to develop, test, manufacture, and commercialize new products promptly.

Since we do not manufacture the products, we cannot assure that these global suppliers/manufacturers will effectively promote, develop their brands, or maintain product quality. If these brands fail to launch new products or innovate to meet evolving customer demands, the demand for their products may decline. In such situations, we endeavour to liquidate our inventory early or return products to the global suppliers/manufacturers to reduce write-downs. However, we may not always find customers or channel partners willing to purchase our inventory of products that lack market demand. A slowdown in demand for existing products could result in a write-down in the value of our inventory. We are not involved in the innovation or quality control of products manufactured by the global suppliers/manufacturers we distribute. However, if any of the products we distribute do not meet quality and performance standards or customers' expectations, our reputation and customer retention may suffer, and the demand for such products may decrease. If we fail to maintain our reputation or increase positive awareness of AV (Audio-Video) products and & automation solutions, or if the quality of products declines due to our global brand partners' inability to maintain required standards, our business, financial condition, and results of operations may be adversely affected.

**6. *Most projects we operate have been awarded primarily through a competitive bidding process and our financial performance is largely dependent on our successful bidding for new projects. We may not always be able to qualify for, compete and win projects. If we are not able to successfully bid for new projects, it may adversely affect our business operations and financial conditions.***

As a part of our business and operations, we bid for projects on an on-going basis. Projects are awarded following competitive bidding processes and satisfaction of prescribed qualification criteria. While service quality, technological

capacity and performance, as well as reputation, experience and sufficiency of financial resources are important considerations in selecting AV integrators by respective authority decision makers, there can be no assurance that we would be able to meet such qualification criteria. Further, once the prospective bidders satisfy the qualification requirements of the tender, the project is usually awarded based on the quote by the prospective bidder and reverse auction. We spend considerable time and resources in the preparation and submission of bids. We cannot assure you that we would bid where we have been prequalified to submit a bid or that our bids, when submitted or if already submitted, would be accepted. If we are not able to pre-qualify in our own right to bid for AV integrations contracts, we may be required to partner with other companies in bids for such projects. If we are unable to partner with other companies or lack the credentials to be the partner-of-choice for other companies, we may lose the opportunity to bid for AV integrations projects, which could affect our growth plans.

The growth of our business mainly depends on our ability to obtain new projects. Therefore, it is critical that we are able to secure new projects of similar value and volume. We are not in a position to predict whether and when we will be awarded a new contract. In the event that we are not able to continually and consistently secure new projects of similar or higher value this would have an adverse impact on our financial performance. Further, our future results of operations and cash flows can fluctuate materially depending on the timing of contract awards. In addition, the scope of work in a project, which is dependent on its scale and complexity, will affect the profit margin of the project and our financial performance. Further, we are required to furnish bank guarantees as part of our business contracts. Our inability to arrange such guarantees or the invocation of such guarantees may adversely affect our cash flows and financial condition.

Further, all our ongoing projects have been awarded to us for a definite term and the relevant authorities may float further tenders for such/similar projects after expiry of the current term. There is no assurance that we will be awarded such future projects. There may be a lapse of time between the completion of our ongoing projects and the commencement of our subsequent projects. Multi locational projects subject us to additional execution risks. Any cancellation or delay of projects could lead to idle or excess capacity, and in the event that we are unable to secure replacement projects on a timely basis, this may adversely affect our business operations and financial conditions.

In addition, projects awarded to us may be subject to litigation by unsuccessful bidders. Legal proceedings may result in delay in award of the projects and/or notification of appointed dates, for the bids where we have been successful, which may result in us having to retain unallocated resources and as a result, it would adversely affect our results of operations and financial condition. Further, we may be required to incur substantial expenditure, time and resources in defending such litigation. Any unsuccessful outcome in any such proceedings may lead to termination of a contract awarded to us, which could have a material adverse effect on our future revenues and profits.

**7. *We have certain outstanding litigation against us, an adverse outcome of which may adversely affect our business, reputation and results of operations.***

We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. **8. Any Penalty or demand raised by statutory authorities in future will affect financial position of the Company.**

In the past, our company has at several instances, delayed in filing of GST, TDS, ESIC and PF Returns, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues and late filing penalties, if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows.

1. The details of delays in filing GST returns including period of delay, return filing date, reason for delay and steps taken by the Company to address such delays are as follows:

Financial Year	Return Type	Total Number of Establishments	Establishments with Delayed Filings	Status	Period of Delay – (in days)
				No. of Instances	
2022-2023	GSTR-3B	5	2	4	6-17
2023-24	GSTR-3B	5	3	8	1-29
2024-2025	GSTR-3B	5	1	3	2-5

Due to a combination of operational and technical challenges, our company experienced delays in filing the GSTR within the prescribed timeline. The primary reasons include intermittent technical issues on the GST portal, delayed receipt of necessary input data from key vendors, and internal reconciliation processes taking longer than expected. Additionally, the transition to a new accounting system and the temporary unavailability of key compliance staff further impacted the timely filing. Recognizing the importance of timely compliance, the company has taken corrective steps, including the implementation of a more robust accounting and GST compliance software, establishing internal deadlines well ahead of the statutory due dates, and appointing a dedicated GST compliance officer to ensure better coordination and accountability. Regular internal checking and staff training have also been initiated to prevent such delays in the future.

2. The details of delays in filing EPF & ESIC returns including the period of delay, payment dates, reason for delay and steps taken by the Company to address such delays are as follows:

## ESIC

Financial Year	Amount Payable (Rs. in Lakhs)	Month to which the amount relates	Period of Delay
2022- 2023	0.10	July	16
	0.06	February	2
2023-2024	0.06	February	1
2024-2025	0.02	April	2
	0.04	June	1
	0.06	August	26

The delay in filing EPF and ESIC contributions was due to a combination of internal and external factors. These included a temporary shortfall in finance team manpower, delays in salary processing due to reconciliation issues, and transition to a new payroll system which caused unexpected technical disruptions. Additionally, there were challenges in timely data collection from certain departments, leading to further delays. To prevent recurrence, the company has now streamlined its payroll processing schedule, strengthened inter-departmental coordination, and appointed dedicated personnel to monitor statutory compliance. Furthermore, automated reminders and system alerts have been implemented to ensure timely filing, and periodic internal reviews are now conducted to reinforce accountability and compliance discipline.

- The details of delays in filing TDS/TCS returns including No. of Instances, reason for delay etc. and steps taken by the Company to address such delays are as follows:

Period/ Financial Year	26Q		24Q		Payment		
	No. of Instances	Range of Delay in days	No. of Instances	Range of Delay days	Amount Payable (Rs. Lakhs)	No. of Instances	Range of Delay in days
2022-2023	1	21	-	-	0.61	1	21
	-	-	1	1	2.35	1	1

The delay in filing TDS returns was due to delays in payment data reconciliation, system transition issues, and coordination gaps between teams. To prevent future delays, the company has strengthened internal timelines, assigned a dedicated TDS compliance resource, and implemented system-based reminders for timely filing.

If we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows.

For further details and reasons of such negative cash flow, please see chapter titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on page 226.

If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

**11. The restated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.**

**12. Our revenue is heavily reliant on our operations within certain geographical regions. Any adverse developments, such as economic downturns, political instability, or natural disasters, in these regions could significantly impact our revenue and overall financial performance.**

We have derived a significant portion of our revenue from operations from customers located in certain geographical regions especially Delhi. The following table sets forth our revenue from the major customers located in Delhi and other regions for the years indicated, which are also expressed as a percentage of our total revenue from operations:

(₹ in Lakhs)

As certified by Statutory Auditor of our Company, by way of their certificate dated November 04, 2025.

The concentration of our revenues from Delhi and above-mentioned regions heightens our exposure to adverse developments related to competition, as well as economic, political, regulatory circumstances including on account of any on-going economic slowdown and inflationary trends. The existing and potential competitors to our businesses in India may increase their focus in the said region, which could reduce our market share. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. Although, to increase our market presence, we also provide automation solutions and supply our products to countries such as Singapore, China, Dhaka, Maldives, Qatar and Bangladesh etc.

Further expansion into new geographic regions, including different states in India and overseas expansion, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including, laws and regulations, uncertainties and customer's preferences, political and economic stability. By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. Our inability to expand into other countries may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in such regions to expand our operations in other parts of India or internationally, due to factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local

regulations, business practices and industry needs, have stronger relationships with local dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside such markets may adversely affect our business prospects, financial conditions and results of operations.

**13. *We could be subject to product liability claims, refunds and recalls or return of products, warranty claims which may have a material adverse impact, in which case our business and revenues, and ultimately our reputation, could be negatively affected.***

Due to the nature of our business, we face a risk of the products containing quality issues or undetected errors or defects. These may result from the design or manufacture of the product or other parts used in the product, over which we have no control. We may face the risk of legal proceedings and claims being brought against us by our customers on account of sale of any defective products. While we typically have provisions in our agreements with suppliers/manufacturers that hold the suppliers/ manufacturers accountable for defective products, our ability to avoid such liabilities may be limited as a result of differing factors, such as the inability to exclude such damages due to applicable laws of the specific jurisdiction where the business is conducted. Our business and reputation may be adversely affected as a result of a significant quality or performance issue in the products sold by us, if we are required to pay for the associated damages. Further, when relying on contractual liability exclusions, we could lose customers if their claims are not addressed to their satisfaction. In addition, serious quality issues can expose us to product liability or recall claims in the event that the products we distribute fail to meet the required quality standards, or are alleged to cause harm to customers.

While we are generally not held accountable for such claims, we may face the risk of legal proceedings and product liability claims being brought against us, legitimate or otherwise, by various entities including consumers, dealers and corporates for various reasons including for defective products sold. There can be no assurance that we will be able to recover cost of such liability or recall from the global suppliers/manufacturers of such products, in a timely manner, and without initiating legal proceedings. Enforcement of provisions in our agreements that hold global suppliers/manufacturers liable for defective products can be a time-consuming and expensive legal process. A product recall or a product liability claim may also adversely affect our reputation and brand image, as well as entail significant costs in excess of our available insurance coverage, which may adversely affect our reputation, business and results of operations.

**14. *Any disruption or shutdown of our warehouse facilities, could adversely affect our business, results of operations and financial condition.***

We utilize warehouses located at Hall No.4, Second Floor, Built on Plot No. D-478, Palam, Sector-7 Dwarka, New Delhi-110075, Plot No-128, IMT Manesar, Sector 4, Manesar, Gurugram, Haryana, 122050, Building No. K-1, Gala No.1 And 2, Jay Shree Ram Complex, Near Monginis, Dapoda Village, Mankoli Naka, Bhiwandi, Thane, Maharashtra, 421302 and Plot no. 2, Basement, Pocket A2, Sector 17, Dwarka, New Delhi - 110075. For further details, please refer to the section titled “*Our Business*” beginning on page 123 of this Prospectus. These facility serves as a crucial storage hub for our products. We manage our inventory within these warehouses and fulfill customer orders by transporting products directly from these locations. While we diligently monitor inventory levels and maintain oversight of warehouse capacity and utilization, any unforeseen disruptions or shutdowns at our warehouse beyond our control could severely impact our supply chain and operational capabilities. Such disruptions may hinder our ability to fulfill contractual obligations promptly, potentially exposing us to legal liabilities and claims. Further having limited storage capacity which can result in stock out cost and loss of customer adversely affecting our business and results of operations. Further Improper storage and handling of our products could damage our inventories and, as a result, have an adverse effect on our business, results of operations and cash flows.

**16. Our business and results of operations are dependent on the contracts/ purchase orders that we enter into. Any breach of the conditions under these contracts/ purchase orders may adversely affect our business and results of operations.**

Such onerous terms may have an effect on our future growth including expansion of customer base. While, we consider all factors internally prior to entering into such contractual agreements, we cannot assure that we will not enter into such agreements in the future. This may result in potential loss of customers as we may not be able to provide our services to such customers in the future as we may not be willing to work with them. Additionally, non-compliance with the terms of the contractual arrangements may lead to among others damages or penalties, termination of the agreements and will also result in us being unable to attract further business in the future.

**17. Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by a public financial institution or a scheduled commercial bank and our management will have broad discretion over utilization of the Net Proceeds.**

We cannot assure you that use of the Net Proceeds to meet our future capital requirements, fund our growth and for other purposes identified by our management would result in actual growth of our business, increased profitability or an increase in the value of our business and your investment.

- 18. *We do not own the registered office, branch offices, warehouse, service centre from which we carry out our business activities. In case of nonrenewal of rent agreements or dispute in relation to use of the said premise, our business and results of operations can be adversely affected.***

Our registered office, branch offices, warehouse, service centre from which we carry out our business activities, are being taken by us on rent. In the event of termination/ non-renewal of said agreements, we may be required to vacate the said premises which may cause disruption in our corporate affairs and business and impede our effective operations which could temporarily impact on our business operations until we get suitable alternative premises. For details on the duration of existing rent/ lease agreements for our premises, please refer to the section titled “*Our Business*” beginning on page 123. There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our manufacturing operations which could materially and adversely affect our business, financial condition and results of operations.

- 19. *There may be potential conflict of interests between our Company and other venture or enterprises promoted by our promoters or directors.***

The main business object/activities of our Company and our Group Company i.e. Purplewave India Private Limited also permit them to undertake similar business to that of our business, which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Conflicts of interests may arise in allocating business opportunities between our Company and our Group Company in circumstances where our respective interests diverge. Further, our Company and our Group Company are allowed to carry on activities as per its articles, which are similar to the activities carried by our Group. Further, our Promoters, are also directors on the board of our Company and our Group Company. This may be a potential source of conflict of interest in addressing business opportunities, strategies, implementing new plans and affixing priorities. In cases of conflict, our Promoters may favour other companies in which our Promoters have interest.

Although we have entered into a non-compete arrangement, under which Purplewave India Private Limited have agreed not to compete with our business. However, we cannot assure you that there will be no conflict of interest in allocating business opportunities between us and our Promoter Group entity or that we will be able to suitably resolve any such conflict without an adverse effect on our business and financial performance.

- 20. *We rely on financing from banks or financial institutions to carry on our business operations, and inability to obtain additional financing on terms favourable to us or at all could have an adverse impact on our financial condition. Further, certain of our financing agreements involve variable interest rates and an increase in interest rates may adversely affect our results of operations and financial condition. If we are unable to raise additional capital, our business and future financial performance could be adversely affected.***

As at June 30, 2025, we had total fund based outstanding financial indebtedness of ₹ 1,490.62 lakhs. Our existing operations and execution of our business strategy may require substantial capital resources and we may incur additional debt to finance these requirements in the future. However, we may be unable to obtain sufficient financing on terms satisfactory to us, or at all. If interest rates increase it will be difficult to obtain credit. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure. We cannot assure you that we will have sufficient capital for our current operations, any future expansion plans that we may have and our ability to complete such expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any unfavourable change to terms of borrowings may adversely affect our cash flows, results of operations and financial conditions. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, financial condition and cash flows could be adversely affected.

There can be no assurance that we will be able to comply with our current financing arrangements or continue to access funds, including by way of short-term borrowings, on acceptable terms or at all. While we seek to mitigate against such risks by exploring favourable funding options from banks/financial institutions, there is no assurance that we will be successful in doing so. Any failure to obtain the requisite funds to meet our requirements or expand or modernize existing capabilities could result in our inability to effectively compete with other players in the industry, which could have a material adverse effect on our profitability, cash flows and results of operations.

**21. *Currently our Company has no experience centres for display of our products.***

Large Experience centres is the key growth driver in our business. Large experience centre ensures acquiring more customers, live demonstrations, strengthening brand image, tangible interaction with customers. Large experience centre also helps in attracting a variety of customers. Currently our Company has no experience centres for display of our products, however our Company intends to setup office space cum product display area from IPO proceeds. For further details, see “*Objects of the Issue*” on page 84 of this Prospectus. An experience centre with appropriate space can significantly enhance our business by providing a space for meaningful dealers & distributor interactions along with other customers, strengthening the brand, and driving sales. It also offers logistical benefits and valuable market insights, contributing to the overall growth and success of the business.

**22. *The Company’s customers operate in various industry segments/verticals and fluctuations in the performance of the industries in which the customers operate may result in a loss of customers, a decrease in the volume of work undertake or the price at which the company offer its products.***

The Company’s business operations are exposed to fluctuations in the performance of the industries in which its significant customers operate. Customers may also decide to reduce spending on services due to a changing economic environment and other factors relating to the industry in which they operate. For instance, in the period of pandemic wherein all the industries are facing a slowdown and cash crunch due to the lockdown and other restrictions imposed by several State Governments, had resultant in a widespread impact on the industry. A loss of any significant customers, a decrease in the volume of work that the company’s customers outsource or a decline in prices of the products offered by the company may materially and adversely affect its business, operations, financial condition and results of operations.

**23. *We may seek to expand our product portfolio and target emerging product areas. If such products do not witness demand that we expect them to, our business and results of operations may be adversely affected.***

We plan to target emerging AV (Audio-Video) products & AV integration segments in their developmental stages and establish product expertise allowing us to keep our broad product line current with emerging trends. For further information, see “*Our Business – Business Strategies*” on page 139. We expect that this will enable us to effectively introduce new products to our customers while simultaneously allowing us to establish a preferred position in servicing emerging global brands. Our focus on such product diversification may expose us to new operational, regulatory and market risks as well as risks associated with additional capital requirements as well as other considerable risks, including:

- our inability to integrate new operations, personnel, products, services and technologies;
- unforeseen or hidden liabilities, including exposure to lawsuits associated with new product quality and sales;
- the diversion of resources from our existing businesses;
- failure to comply with laws and regulations as well as industry or technical standards of product categories into which we seek to diversify;
- our inability to generate sufficient revenues to offset the costs and expenses behind focusing our resources on the new product categories; and
- potential loss of, or harm to employees or customer relationships.

Any of these events could disrupt our ability to manage our business, which in turn could have a material adverse effect on our financial condition and results of operations. Such risks could also result in our failure to derive the intended benefits of the product diversification, and we may be unable to benefit from such expansion initiatives, which may adversely impact our growth and prospects.

**24. *Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain or increase our historical growth rates.***

Our business has experienced growth in prior periods. Our revenue from operations increased from ₹ 7,011.39 Lakhs in F.Y. 2022-23 to ₹ 8,990.74 Lakhs and ₹ 12,601.59 Lakhs in Financial Years 2023-24 and 2024-25, respectively. Although we plan to continue to expand our scale of operations, we may not be able to sustain or increase these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain

& make new customers, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, competition with other players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

**25. *We are dependent on third-party transportation providers for the delivery of products distributed and traded by us.***

Our success relies on the uninterrupted supply and transportation of the products we distribute and trade. We deliver these products from our warehouses to our customers, substantially depending on third-party transportation and logistics providers for these deliveries. Although we have not experienced significant disruptions in supply and transportation in the past, we cannot guarantee that such disruptions will not occur in the future due to various factors, potentially resulting in material impacts. While we do not depend on a limited number of transportation operators, transportation strikes could adversely affect our supply chain and delivery schedules. Additionally, products may be lost or damaged in transit due to accidents or natural disasters, and delivery delays may negatively impact our business and operational results. Failure to deliver our products efficiently and reliably could adversely affect our business, financial condition, and results of operations.

**26. *Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuation.***

Our Company is dependent on third party suppliers for procuring our products. We are exposed to fluctuations in the prices of these products as well as their unavailability. We may be unable to control the factors affecting the price at which we procure the products. We also face the risks associated with compensating for or passing on such increase in our cost of products on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of products may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Our Company is involved in business transactions with international suppliers and has to conduct the same in accordance with the rules and regulations prescribed under FEMA. Our Company may fail to adhere to the prescribed timelines and may be required to pay penalty to the appropriate authority or department to regularize the payment. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it may adversely affect our business, results of operations, financial conditions and cash flows.

**27. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.***

Our operations are subject to accidents which are inherent to any business such as risks of employee accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including accidents that may cause injury and loss of life, severe damage to and the destruction of property, equipment and environment. Our significant insurance policies consist of Business Guard Sookshma Package Policy, Business Guard - Bharat Laghu Udyam Suraksha Policy to protect the stock against fire, natural calamities, terrorism and to protect the stock from burglars or thief. We have Marine Cargo Open Policy from Tata AIG General Insurance Company Ltd. which covers loss damage or expense that might occur during the transportation of goods. Our company have also taken various vehicle insurance policies and to protect the employees of the company we have taken accident and health insurance from Star Group Health Insurance and Accident Care (Group) Insurance from Star Health and Allied Insurance Company Ltd. However, we currently do not possess a key men insurance policy for our key managerial persons. While our existing insurance provides a level of protection, there can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. The details of amount insured and insured amount as percentage of total assets of the company for the period ended June 30, 2025 are as follows:

Particulars	Amount of Assets Insured (Insured value In Rs Lakhs)	As a percentage of Total Assets
Stock insurance including marine insurance	2,000.00	100.00%

Particulars	Amount of Assets Insured (Insured value In Rs Lakhs)	As a percentage of Total Assets
Office furniture and equipment	100.00	100.00%
Vehicle insurance	83.20	100.00%

*As certified by Statutory Auditor of our Company, by way of their certificate dated November 04, 2025.*

If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

**28. *We are exposed to credit risk from our customers and the recoverability of our trade receivables is subject to uncertainties.***

We generally extend a credit period to our customers, which exposes us to credit risk. The table below outlines specific details regarding our trade receivables and trade receivable turnover days for the indicated year/period:

Particulars	June 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
Trade Receivables (₹ in lakhs)	4,856.10	3,433.72	2,071.64	1,106.42
Trade Receivable Turnover Days (number of days)	422*	80	65	87

*\*Not annualised*

A customer's ability to make timely payments depends on various factors, including general economic conditions and their cash flow situation, which are beyond our control. Delays in receiving payments from customers could negatively impact our cash flow and hinder our ability to meet working capital requirements. There is no guarantee that our customers will pay us promptly or at all, which may affect the recoverability of our trade receivables. Additionally, we may struggle to manage any bad debt resulting from delayed payments. The table below outlines specific details regarding bad debts for the indicated year/period:

Particulars	June 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
Bad debts (₹ Lakhs)	-	-	3.24	-

Taking legal action against our customers to enforce their contractual obligations can be challenging, and there is no guarantee that we will receive a favourable judgment or that it will be issued in a timely manner. If any of our customers fail to fulfil their contractual commitments, or if they face insolvency or liquidation, it could negatively impact our financial condition and results of operations.

**29. *Our operations require a significant amount of working capital. Any inability to meet our working capital requirements may adversely affect our business, financial condition, cash flows and results of operations.***

Our operations require a significant amount to working capital, including to finance the purchase of AV products, maintenance of adequate levels of inventory and execution of integration processes before payment is received from customers.

Any inability to source the required amount of working capital for addressing any integration processes needs may lead to halt the integration processes, decreased revenues and a dissatisfied customer base. Further, any delay in the processing of payments by our customers may increase our working capital requirement. In the event a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that would be otherwise available.

While we have not faced any instances of difficulties to meet our working capital requirements in the period ended June 30, 2025, and Fiscals 2025, 2024 and 2023, there can be no assurance that such instances will not occur in the future. There can be no assurance that payments will be remitted by our customers to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims. Accordingly, continued increases in our working capital requirements may have an adverse effect on our business, financial condition, cash flows and results of operations.

**30. *Any IT system failures or lapses on part of any of our employees may lead to operational interruption, liabilities or reputational harm.***

The success of our businesses depends in part upon our ability to effectively deploy, implement and use information technology systems and advanced technology initiatives in a cost effective and timely basis. Our information technology systems include multiple applications, coding, configuration and other systems that allocate resources and facilitate internal and external communications, enabling us to coordinate and make quick decisions across our business. Our computer networks may be vulnerable to unauthorised access, computer hacking, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by our employees, subcontractors or third-party vendors. Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business.

***31. The markets we serve are subject to cyclical demand and vulnerable to economic downturn, which could harm our business and make it difficult to project long-term performance.***

Demand for our products and services depends in large part upon the level of capital and maintenance expenditures by many of our customers and end-users, in particular those customers in the PRO AV sector. These customers' expenditures historically have been cyclical in nature and vulnerable to economic downturns. Decreased capital and maintenance spending by these customers could have a material adverse effect on the demand for our products and services and our business, financial condition, and results of operations. In addition, this historically cyclical demand limits our ability to make accurate long-term predictions about the performance of our Company. Even if demand improves, it is difficult to predict whether any improvement represents a long-term improving trend or the extent or timing of improvement. There can be no assurance that historically improving cycles are representative of actual future demand.

***32. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks. Despite our internal control systems, we may be exposed to operational risks, including fraud, petty theft and embezzlement, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.***

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. We cannot assure you that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may affect ability to accurately report, or successfully manage, our financial risks, and to avoid fraud, which may in turn adversely affect our business, financial condition or results of operations.

Further, given the high volume of transactions we process on a daily basis, notwithstanding the internal controls that we have in place, we may be exposed to the risk of fraud or other misconduct by employees, contractors, or customers. Fraud and other misconduct can be difficult to detect and deter. Certain instances of fraud and misconduct may go unnoticed or may only be discovered and successfully rectified after substantial delays. Even when we discover such instances of fraud or theft and pursue them to the full extent of the law or with our insurance carriers, there can be no assurance that we will recover any of the amounts involved in these cases. In addition, our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.

***33. Our expansion into product categories and business verticals and increase in the number of products offered may expose us to new challenges and more risks.***

We may face challenges in inspecting and controlling quality, regulatory requirements, handling, storage and delivery of our products. We may also need to price aggressively in our product categories to retain and attract consumers, which may not be possible in instances where a product manufacturer imposes restrictions on our ability to offer such products at a discount and which would adversely affect our gross margins.

We may also make substantial investments in launching such new products on our platform. Expansion of our offerings or business verticals may also strain our management and operational resources. It may also be difficult for us to achieve profitability with new products and as a result, our profit margins may be lower than we anticipate, which would adversely affect our results of operations. We cannot assure you that we will be able to recover our investments in introducing any new products or that any such new products will be successful by any measure.

**34. *We are required to obtain, renew or maintain statutory and regulatory permits, licenses and approvals to operate our business and in case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.***

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Further we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities, there can be no assurance that the relevant authority will issue or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Approvals” on page 251 of this Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

**35. *Our Company is not having any exact comparable Indian peer which have similar business to our Company.***

Our Company is not having any exact comparable Indian peer which have similar business to our Company in terms of product mix, size, scale in the same market with the same customer portfolio. The Issue Price of the Equity Shares has been determined by our Company in consultation with the BRLM through the Book Building Process. A comparison of valuation of the issue with its listed peers would give a fair idea of what to pay in the market. In absence of the comparable Indian peer, investors might not be able to compare our results.

**36. *We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected. Further we may be subject to employee unrest, slowdowns and increased wage costs, which may have an adverse effect on our business, operations, our cash flow and financial condition.***

Our business operation required skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

As of September 30, 2025 we have 86 employees, with 20 employees being dedicated sales and marketing personnel and 43 employees being dedicated technical personnel. For the period ended June 30, 2025 and Fiscal 2025, 2024, 2023 we incurred employee benefits expense of ₹ 179.49 lakhs, ₹ 714.04lakhs, ₹ 497.70lakhs and ₹ 658.39lakhs, respectively, amounting to 5.00%, 5.67 %, 5.54 % and 9.39 % of our revenue from operations in the corresponding periods. As on the date of this Prospectus, our employees are not unionized. However, in the event that employees seek to unionise, it may become difficult for us to maintain flexible employee policies, which may increase our costs and adversely affect our business. We believe our employees and personnel are critical to maintain our competitive position. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal, and legislation that imposes certain financial obligations on employers upon retrenchment.

Although we have not experienced any employee unrest, we cannot assure you that we will not experience disruptions in our work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any employee unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are

very difficult for us to predict or control and any such event could adversely affect our business, results of operations and financial condition. A potential increase in the salary scale of our employees as a result of organisation or unrest, or a disruption in services from our employees or contract manufacturers due to potential strikes, could adversely affect our business operations and financial condition.

**37. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial Personnel and Senior Management as well as our ability to attract and retain them. Any loss of our Promoter, Directors, Key Managerial Personnel, Senior Management or our ability to attract and retain them could adversely affect our business, financial condition and results of operations.***

Our success largely depends upon the knowledge and experience of our Promoters, Directors, Key Managerial Personnel and Senior Management as well as our ability to attract and retain skilled personnel. Any loss of our Promoters, Directors, Key Managerial Personnel and Senior Management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial condition and results of operations. We depend on the management skills and guidance of our Promoters for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business, financial condition and results of operations could be adversely affected.

There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. Among our Key Managerial Personnel and Senior Management, we have not experienced any attrition in the period ended September 30, 2025 and Fiscals 2025, 2024 and 2023 respectively and among our total employees, we experienced attrition (calculated as employees who have left/average employees) of 17.65%, 24.66%, 11.97% and 12.61% in the period ended September 30, 2025 and Fiscals 2025, 2024 and 2023, respectively. For further information, see “Our Management” on page 166.

**38. *We face substantial and increasingly intense competition in the AV (Audio-Video) Industry & Automation Industry. If we are unable to compete effectively, our business, financial condition, results of operations and prospects would be materially and adversely affected.***

We face competition from unlisted players in the AV (Audio-Video) industry & Automation Industry which have a presence across multiple regions in India. There are various companies offering products and services similar to us. The critical factors that determine the success of a product or service vary by geographical market and product and service segment. We believe the principal elements of competition in our industry are price, durability, product quality, user experience, operational efficiency, timely delivery and reliability and most importantly our pace in keeping up with the changing technology in the industry. Due to the intensity, complexity and diversity of the competition overall, the competitive landscape in our industry or in specific industry segments can change very rapidly.

Further, new competitors may emerge at any time. Our competitors may be able to respond more quickly to new or emerging technologies or customer requirements, and may bring with them customer loyalties that may limit our ability to compete, which could decline our sales. In addition, a variety of known and unknown events could have a material adverse impact on our ability to compete. The success of our products as well as our ability to maintain or increase our sales may also depend upon the effectiveness of our marketing initiatives which may adversely affect our ability to compete effectively. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability.

Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

**39. *Adverse publicity regarding any product we sell could negatively impact us.***

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on

growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

40. **The trademark **PURPLEWAVE** is originally registered in the name of our Group Company M/s. Purplewave India Private Limited. Our Company has acquired the same on the basis of a trademark assignment agreement dated July 12, 2024.**

Our brand name **PURPLEWAVE** has been registered as a trademark in favour of our group Company M/s. Purplewave India Private Limited and our Company has acquired the same through a trademark assignment agreement dated July 12, 2024. The assignment agreement is not permanent and can be revoked by either of the parties on a prior notice. Further our Company shall be required to pay an annual royalty for the usage of the mark with limitations of not to make any alterations to same without prior approval. In such event if we fail to make the payment of royalty on time or adhere to the terms of the agreement, the owner may revoke the agreement in which event we may lose our brand name or alternatively shall also be required to change the first name of the Company. In such an event we may lose the goodwill acquired under the name and be required to incur extra efforts and costs to create a new brand name, thus adversely affecting the business and cash flows of the Company.

41. **Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.**

Our operations may be subject to incidents of theft or damage to our products. The business may also encounter some product loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance, losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

42. **We have incurred indebtedness and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.**

Some of the financing arrangements entered into by us include conditions that require our Company to obtain consents/NOCs from respective lenders prior to carrying out certain activities and entering into certain transactions. Failure to meet these conditions or obtain these consents/NOCs could have significant consequences on our business and operations. These covenants vary depending on the requirements of the financial institution extending such loan and the conditions negotiated under each financing agreement. Some of the corporate actions require prior consents/NOCs from or intimations to certain lenders. For details, please see “*Financial Indebtedness*” on page 224.

While we all relevant consents/NOCs required for the purposes of this Issue and have complied with these covenants, a failure to comply with such covenants in the future may restrict or delay certain actions or initiatives that we may propose to take from time to time. While we have not defaulted on any covenants, we cannot assure you that this will continue to be the case in the future, which may in turn adversely affect our business, results of operations, cash flows and financial condition.

If the obligations under any of our financing arrangements are accelerated, we may have to dedicate a portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. In addition, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. A default by us under the terms of any financing documents have an adverse effect on our operations, financial position and any credit ratings. For further information regarding our borrowings, please see “*Financial Indebtedness*” on page 224.

43. **Our Promoter, members of Promoter Group and director have mortgaged their properties and provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.**

Our Promoters, members of promoter group have mortgaged their properties and provided personal guarantees in relation to certain loan facilities availed of by us. In the event that any of these properties or guarantees are revoked by promoters, members of promoter group, the lenders for such facilities may require alternate properties as mortgages/guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative properties/guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at

all and any such failure to raise additional capital could affect our operations and our financial condition. For more information, please see the chapter titled “*Financial Indebtedness*” beginning on page 224.

**44. *Our Promoters and promoter group members are interested in our Company’s performance in addition to their remuneration and reimbursement of expenses.***

In addition to regular remuneration or benefits and reimbursement of expenses, our promoters and promoter group members are otherwise interested in our Company. This interest is to the extent of their shareholding in our Company, their rights to the extent of any dividends, repayment of unsecured loans Company availed from our promoters, and their rights in relation to interest payment on unsecured loans by them to our Company. We cannot assure you that our promoters and promoter group members will exercise their rights as Shareholders to the benefit and best interest of our Company. As Shareholders of our Company, our promoters may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information on the interest of our promoters and promoter group members of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see “*Our Management*”, “*Our Promoters and Promoter Group- Interests of Our Promoters*” and “*Restated Financial Information - Related Party Disclosure – Annexure –31*” on pages 166, 182 and 188 respectively.

**45. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for the objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “*Objects of the Issue*” beginning on page 84.

**46. *Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 187.

**47. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Prospectus.***

While facts and other statistics in the Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various governmental and organizational web site data that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 101. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

**48. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.***

After completion of the Issue, our Promoters and Promoter Group will collectively own 71.92 % of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree

of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

**49. Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.**

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

**50. The average cost of acquisition of Equity Shares by the Promoters may be less than the Issue Price.**

The average cost of acquisition of Equity Shares by the Promoters may be less than the Issue Price. The details of the average cost of acquisition of Equity Shares held by the Promoters are set out below:

Sr. No.	Name	No of Equity Shares held	Average cost of Acquisition (in ₹) *
<b>Promoters</b>			
1.	Manoj Kumar Singh	63,61,938	0.19
2.	Sandhya Singh	2,88,008	Nil
3.	Ananya Singh	09	24.44

*\*As certified by Statutory Auditor of our Company, by way of their certificate dated November 07, 2025.*

**51. The Promoters and Executive Directors of our Company do not have experience of being a director of a public listed company.**

The Promoters and Executive Directors of our Company do not have the experience of having held directorship of public listed company. Accordingly, they have limited exposure to management of affairs of the listed company which inter-alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, our Company will require to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted company. Our Company will also be subject to the SEBI Listing Regulations, which will require it to file audited annual and unaudited half yearly reports with respect to its business and financial condition. If our Company experiences any delays, we may fail to satisfy its reporting obligations and/or it may not be able to readily determine and accordingly report any changes in its results of operations as promptly as other listed companies.

Further, as a publicly listed company, our Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our Company's disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of Directors of our Company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

## EXTERNAL RISKS

**52. Recent global economic conditions have been challenging and continue to affect the Indian market, which may adversely affect our business, financial condition, results of operations and prospects.**

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market

price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India and could then adversely affect our business, financial performance and the price of our Equity Shares.

Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our equity shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

**53. *Natural or man-made disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.***

Natural disasters (such as typhoons, flooding, and/or earthquakes), epidemics, pandemics such as COVID-19, and man-made disasters, including acts of war, terrorist attacks, and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, and results of operations. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, adversely impact availability of natural gas, increase in supply chain, logistics times and costs, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. Our operations may be adversely affected by fires, natural disasters, and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity, and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic, and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares. A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1, and H1N1 strains of influenza in birds and swine and more recently, the SARS- CoV-2 virus and the monkeypox virus. A worsening of the current outbreak of the COVID-19 pandemic or future outbreaks of SARS-CoV-2 virus or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

**54. *Any downgrading of India's sovereign debt rating by an international rating agency could have a negative impact on our business and results of operations.***

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. Any adverse revisions to credit ratings for India and other jurisdictions we operate in by international rating agencies may adversely impact our ability to raise additional financing. This could have an adverse effect on our ability to fund our growth on favourable terms and consequently adversely affect our business and financial performance and the price of the Equity Share.

**55. *Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, United States, United Kingdom, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

**56. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate thereby reducing our margins.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

**57. *We may be affected by competition laws, the adverse application or interpretation of which could adversely affect our business.***

The Competition Act, 2002, of India, as amended (“**Competition Act**”), regulates practices having an appreciable adverse effect on competition in the relevant market in India (“**AAEC**”). Under the Competition Act, any formal or informal arrangement, understanding, or action in concert, which causes or is likely to cause an AAEC is considered void and may result in the imposition of substantial penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment, or the provision of services or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or number of clients in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an AAEC and is considered void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to and pre-approved by the Competition Commission of India (the “**CCI**”). Additionally, on May 11, 2011, the CCI issued Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, all agreements entered by us could be within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct, or combination occurring outside India if such agreement, conduct, or combination has an AAEC in India. However, the impact of the provisions of the Competition Act on the agreements entered by us cannot be predicted with certainty at this stage. However, since we pursue an acquisition driven growth strategy, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, results of operations, cash flows, and prospects.

**58. *The trading volume and market price of the Equity Shares may be volatile following the Issue.***

Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares. Further, the market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- Half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research

- analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

**59. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

**60. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any capital gain exceeding ₹125,000, realised on the sale of listed equity shares on a recognised stock exchange, held for more than 12 months immediately preceding the date of transfer, will be subject to long term capital gains in India, at the rate of 12.5% (plus applicable surcharge and cess). This beneficial rate is, among others, subject to payment of Securities Transaction Tax ("STT"). Further, any gain realised on the sale of equity shares in an Indian company held for more than 12 months, which are sold using any platform other than a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. Such gains will be subject to tax at the rate of 20% (plus applicable surcharge and cess), subject to STT being paid at the time of sale of such shares. Otherwise, such gains will be taxed at the applicable rates. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. Similarly, any business income realised from the transfer of Equity Shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller.

The Government of India announced the union budget for Fiscal 2026, following which the Finance Bill, 2025 ("Finance Bill") was introduced in the Lok Sabha on February 1, 2025. Subsequently, the Finance Bill received the assent from the President of India and became the Finance Act, 2025, with effect from April 1, 2025 as amended by the Finance Act (No.2), ("Finance Act"). As per the Finance Act, in case of domestic company, the rate of income-tax shall be 25% of the total income, if the total turnover or gross receipts of the previous year 2023-24 does not exceed ₹ 400 crores and where the companies continue in Section 115BA regime. In all other cases the rate of income-tax shall be 30% of the total income. However, domestic companies also have an option to opt for taxation under section 115BAA of the Act on fulfilment of conditions contained therein. The rate of income-tax rate is 22% under section 115BAA, having a surcharge at 10% on such tax. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning, investing or trading in the Equity Shares.

We cannot predict whether any amendments made pursuant to the Finance Act would have an adverse effect on our business, results of operations, financial condition and cash flows. Unfavourable changes in or interpretations of existing laws, rules and regulations, or the promulgation of new laws, rules and regulations including foreign investment and

stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

- 61. *Our Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for our Equity Shares. Further, our Equity Shares may not result in an active or liquid market and the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Issue Price or at all.***

Prior to this Issue, there has been no public market for our Equity Shares. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. We cannot assure you that an active trading market for the Equity Shares will develop or be sustained after this Issue. The Issue Price of our Equity Shares will be determined through the Book Building Process and may not be indicative of the market price of our Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of our Equity Shares may be subject to significant fluctuations in response to various factors, including variation in our operating results, market conditions specific to our industry, and volatility in stock exchange and securities markets.

Further, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a company. These broad market fluctuations and industry factors may materially reduce the market price of our Equity Shares, regardless of our Company's performance. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

- 62. *There is no guarantee that our Equity Shares will be listed on the BSE in a timely manner or at all and any trading closure at stock exchange may adversely affect the trading price of our Equity Shares. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.***

There is no guarantee that the Equity Shares will be listed on the BSE in a timely manner or at all and any trading closure at stock exchange may adversely affect the trading price of our Equity Shares. In accordance with Indian law, permission for listing and trading of the Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued by SEBI, the Equity Shares are required to be listed on the BSE within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares. Further, there can be no assurance that the Equity Shares once listed will continue to remain listed on the Stock Exchange. Indian laws permit a company to delist its equity shares on compliance with prescribed procedures including the requirement to obtain the approval of its shareholders. Further, certain instances of non-compliance with applicable laws can result in the delisting of the Equity Shares. We cannot assure you, therefore, that the Equity Shares, once listed, will continue to remain listed.

- 63. *Any future issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by shareholders with significant shareholding may adversely affect the trading price of the Equity Shares.***

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares including to comply with minimum public shareholding norms applicable to listed companies in India or, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. There can be no assurance that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

- 64. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign

currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Non-debt Instruments Rules, all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of the Equity Shares is situated in or is a citizen of any such country, can only be made through the Government approval route, as prescribed in the FDI Policy dated October 15, 2020 and the FEMA Non-debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

**65. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.***

Our restated Consolidated financial statements, including the financial statements provided in this Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled “Presentation of Financial Industry and Market Data” beginning on Page 19.

Accordingly, the degree to which the Indian GAAP financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited. India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards, i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

**66. *Changing laws, rules and regulations and legal uncertainties, including adverse application or interpretation of corporate and tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2023 (“Finance Bill”), has introduced various amendments. The Finance Bill has received assent from the President of India on March 31, 2023, and has been enacted as the Finance Act, 2023. We cannot predict whether any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

**67. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Individual Investors are not permitted to withdraw their Bids after Bid/ Issue Closing Date.***

Pursuant to the SEBI ICDR Regulations, Qualified Institutional Buyers and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Similarly, Retail Individual Investors can revise or withdraw their Bids at any time during the Bid/ Issue Period and until the Bid/ Issue Closing Date, but not thereafter. Therefore, Qualified Institutional Buyers and Non-Institutional Investors will not be able to withdraw or lower their Bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations or otherwise at any stage after the submission of their Bids.

## DETAILS OF THE OBJECTS OF THE ISSUE

### 1. Funding capital expenditure requirements of our company towards purchasing an office space cum product display area:

We have established our registered office on a rental commercial property situated Plot No. 1 & 2, Pocket A2, MNG Tower, First Floor, Dwarka Sector 17, South West Delhi, N.S.I.T. Dwarka, South West Delhi, New Delhi, Delhi, India, 110078. Further as on date of this Prospectus, our Company does not have any experience centre to showcase our extensive range of products. Hence, we intend to set up an office space cum product display area and raise fund for purchase of the office space for such set up. For further details in relation to the registered office as well as all other place of businesses as mentioned in ‘Our Properties’ under chapter titled “Our Business” on page 149 are taken on rent/lease basis by the Company.

In line with our strategic objectives and enhance workflow efficiency, we intend to set-up an office space cum product display area in Delhi. The premise identified by our Company is in the same building where our registered office is situated. The proposed office space cum product display area, situated at 3<sup>rd</sup> Floor, MNG Tower, Plot No. 1 & 2, Pocket A-2, Sector – 17, Dwarka, New Delhi, Delhi, 110078 (“Proposed office space cum product display area”) having approximately 4,392 sq. ft. carpet area. We propose to acquire the said property on ownership basis from Mithilesh Gupta and Geeta Gupta and has entered into an intent to sale agreement dated April 22, 2025.

We propose to deploy issue proceeds amounting to ₹ 1,291.02 Lakhs by acquiring property which will be used in setting up an additional office space cum product display area. This proposed expenditure will not only lead to creation of an

asset for the Company but will also streamline and enhance the efficiency of business processes by consolidating resources in one location.

**Objectives of capital expenditure towards setting up of an office space cum product display area:**

*Professional Presence:* This will enhance Company's credibility and image among clients, partners, and employees. Stakeholders can perceive professionalism and dedication from a dependable, owned office space cum product display area.

*Long-Term Security:* Owning office space plays a significant role in shaping and maintaining the professional image of the Company. Ownership provides stability by eliminating concerns related to lease renewals, potential rent increases, or eviction. This security allows the company to focus on its business operations without uncertain challenges.

*Accumulating Asset Value:* Having ownership of an office cum product display area permits the Company to increase its value gradually. This contrasts with renting, where payments contribute to a landlord's asset but do not generate any ownership benefits for the tenant. Over time, as property values increase, the Company benefits from appreciation, which can enhance overall asset value.

*Eliminates Rent Payments:* By purchasing office space, the Company eliminates the rental payments, which can be a significant recurring expense. Over time, this helps free up funds that can be reinvested into other business operations. For instance, the Company is currently paying rent of ₹ 2,95,000 per month which is subject to increase every year for its registered office situated in the same building having area. 4392 sq. ft. By owning the proposed office space cum product display area, the Company will save such additional rent expenditures which will contribute to the growth of the Company.

*Consolidation of Resources:* Having an office space cum product display area on the same property allows for more efficient operations. Teams may collaborate and communicate better as a result of this close proximity, which could boost output and efficiency.

*Customization:* With ownership, the Company has the freedom to undertake renovations and improvements tailored to its operational needs. This customization is not typically feasible in rental agreements, where landlords may impose restrictions.

*Enhance customer experience:* Currently, our Company does not have any experience centre to showcase our extensive range of products. Hence, we intend to showcase our extensive range of products in the proposed office space cum product display area to enhance the customer experience. The display stock will include our latest products and solutions, enabling customers to have a hands-on experience with our offerings.

This investment decision will enhance stability and support growth of the company for long-term success.

## **ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS**

The information provided below sets out the possible special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares, particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation of the benefits which an investor can avail.

### **A. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:**

#### **Under the Income Tax Act, 1961 ("the Act")**

##### **Special tax benefits available to the Company**

- The Company is not entitled to any special tax benefits under the Income Tax Act 1961 and GST Act.

### **B. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS:**

- The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

#### **NOTES:**

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above Annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 ('the Amendment Act, 2019') with effect from Financial Year 2019-20 granting an option to domestic companies to compute corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and cess of 4%), provided such companies do not avail specified exemptions/ incentives. The option under section 115BAA of the Act once exercised cannot be subsequently withdrawn for any future financial year. The Amendment Act, 2019 further provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax ('MAT') under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

In such a case, the Company is not allowed to claim any of the following deductions/ exemptions under the Act: -

- ✓ Deduction under the provisions of Section 10AA.
- ✓ Deduction under clause (iia) of sub-section (1) of Section 32 (additional depreciation).
- ✓ Deduction under section 32AD or Section 33AB or Section 33ABA
- ✓ Deduction under section 35AD or Section 35CCC
- ✓ Deduction under section 80G

Lower corporate tax rate under Section 115BAA of the Act and Minimum Alternate Tax ('MAT') credit under section 115JAA of the Act, which are in general available and hence may not be treated as special tax benefits.

The Company has evaluated and decided to exercise the option permitted under Section 115BAA of the Act for the

purpose of computing its income-tax liability for the Financial Year 2019-20 and onwards.

6. This Annexure is intended only to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. ### GLOBAL ECONOMIC OVERVIEW

#### Forces Shaping the Outlook

The global economy is holding steady, although the degree of grip varies widely across countries. Global GDP growth in the third quarter of 2024 was 0.1 percentage point below that predicted in the October 2024 WEO, after disappointing data releases in some Asian and European economies. Growth in China, at 4.7 percent in year-over-year terms, was below expectations. Faster-than-expected net export growth only partly offset a faster-than-expected slowdown in consumption amid delayed stabilization in the property market and persistently low consumer confidence. Growth in India also slowed more than expected, led by a sharper-than-expected deceleration in industrial activity. Growth continued to be subdued in the euro area (with Germany's performance lagging that of other euro area countries), largely reflecting continued weakness in manufacturing and goods exports even as consumption picked up in line with the recovery in real incomes. In Japan, output contracted mildly owing to temporary supply disruptions. By contrast, momentum in the United States remained robust, with the economy expanding at a rate of 2.7 percent in year-over-year terms in the third quarter, powered by strong consumption. Global disinflation continues, but there are signs that progress is stalling in some countries and that elevated inflation is persistent in a few cases. The global median of sequential core inflation has been just slightly above 2 percent for the past few months. Nominal wage growth is showing signs of moderation, alongside indications of continuing normalization in labor markets. Although core goods price inflation has fallen back to or below trend, services price inflation is still running above pre-COVID-19 averages in many economies, most notably the United States and the euro area. Pockets of elevated inflation, reflecting a range of idiosyncratic factors, also persist in some emerging market and developing economies in Europe and Latin America.

Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labor market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions (see Box 1). Equities in advanced economies have rallied on expectations of more business friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries (Figure 1). Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

#### The Outlook

IMF staff projections assume current policies in place at the time of publication. They incorporate recent market developments and the impact of heightened trade policy uncertainty, which is assumed to be temporary, with the effects

unwinding after about a year, but refrain from making any assumptions about potential policy changes that are currently under public debate. Energy commodity prices are expected to decline by 2.6 percent in 2025, more than assumed in October. This reflects a decline in oil prices driven by weak Chinese demand and strong supply from countries outside of OPEC+ (Organization of the Petroleum Exporting Countries plus selected nonmember countries, including Russia), partly offset by increases in gas prices as a result of colder-than-expected weather and supply disruptions, including the ongoing conflict in the Middle East and outages in gas fields. Nonfuel commodity prices are expected to increase by 2.5 percent in 2025, on account of upward revisions to food and beverage prices relative to the October 2024 WEO, driven by bad weather affecting large producers. Monetary policy rates of major central banks are expected to continue to decline, though at different paces, reflecting variations in growth and inflation outlooks. The fiscal policy stance is expected to tighten during 2025–26 in advanced economies including the United States and, to a lesser extent, in emerging market and developing economies.

Global growth is expected to remain stable, albeit lackluster. At 3.3 percent in both 2025 and 2026, the forecasts for growth are below the historical (2000–19) average of 3.7 percent and broadly unchanged from October (Table 1; see also Annex Table 1). The overall picture, however, hides divergent paths across economies and a precarious global growth profile (Figure 2).

Among advanced economies, growth forecast revisions go in different directions. In the United States, underlying demand remains robust, reflecting strong wealth effects, a less restrictive monetary policy stance, and supportive financial conditions. Growth is projected to be at 2.7 percent in 2025. This is 0.5 percentage point higher than the October forecast, in part reflecting carryover from 2024 as well as robust labor markets and accelerating investment, among other signs of strength. Growth is expected to taper to potential in 2026.

In the euro area, growth is expected to pick up but at a more gradual pace than anticipated in October, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened political and policy uncertainty explain a downward revision of 0.2 percentage point to 1.0 percent in 2025. In 2026, growth is set to rise to 1.4 percent, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat.

In other advanced economies, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds—including the sharp uptick in trade policy uncertainty—are expected to keep investment subdued.

In emerging market and developing economies, growth performance in 2025 and 2026 is expected to broadly match that in 2024. With respect to the projection in October, growth in 2025 for China is marginally revised upward by 0.1 percentage point to 4.6 percent. This revision reflects carryover from 2024 and the fiscal package announced in November largely offsetting the negative effect on investment from heightened trade policy uncertainty and property market drag. In 2026, growth is projected mostly to remain stable at 4.5 percent, as the effects of trade policy uncertainty dissipate and the retirement age increase slows down the decline in the labor supply. In India, growth is projected to be solid at 6.5 percent in 2025 and 2026, as projected in October and in line with potential.

In the Middle East and Central Asia, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3 percentage point downward revision to 2025 growth in Saudi Arabia, mostly driven by the extension of OPEC+ production cuts. In Latin America and the Caribbean, overall growth is projected to accelerate slightly in 2025 to 2.5 percent, despite an expected slowdown in the largest economies of the region. Growth in sub-Saharan Africa is expected to pick up in 2025, while it is forecast to slow down in emerging and developing Europe.

World trade volume estimates are revised downward slightly for 2025 and 2026. The revision owes to the sharp increase in trade policy uncertainty, which is likely to hurt investment disproportionately among trade-intensive firms. That said, in the baseline, the impact of heightened uncertainty is expected to be transitory. Furthermore, the front-loading of some trade flows in view of elevated trade policy uncertainty, and in anticipation of tighter trade restrictions, provides some offset in the near term.

Progress on disinflation is expected to continue. Deviations from the October 2024 WEO forecasts are minimal. The gradual cooling of labor markets is expected to keep demand pressures at bay. Combined with the expected decline in energy prices, headline inflation is projected to continue its descent toward central bank targets. That said, inflation is

projected to be close to, but above, the 2 percent target in 2025 in the United States, whereas inflationary dynamics are expected to be more subdued in the euro area. Low inflation is projected to persist in China. Consequently, the gap between anticipated policy rates in the United States and other countries becomes wider.

## Risks to the Outlook

In the medium term, the balance of risks to the outlook is tilted to the downside, with global growth poised to be lower than its 2025–26 average and five-year-ahead forecasts at about 3 percent. Near-term risks, in contrast, could reinforce divergences across countries: they are tilted to the upside in the United States, whereas downside risks prevail in most other economies amid elevated policy uncertainty and headwinds from ongoing adjustments (in particular, energy in Europe and real estate in China).

An intensification of protectionist policies, for instance, in the form of a new wave of tariffs, could exacerbate trade tensions, lower investment, reduce market efficiency, distort trade flows, and again disrupt supply chains. Growth could suffer in both the near and medium term, but at varying degrees across economies.

Looser fiscal policy in the United States, driven by new expansionary measures such as tax cuts, could boost economic activity in the near term, with small positive spillovers onto global growth. Yet in the longer run, this may require a larger fiscal policy adjustment that could become disruptive to markets and the economy, by potentially weakening the role of US Treasuries as the global safe asset, among other things. Furthermore, higher borrowing to fund looser fiscal policy could increase demand for capital globally, leading to an increase in interest rates and possibly depressing economic activity elsewhere.

Confidence and positive sentiment in the United States, partly driven by deregulation, could boost both the demand and the supply side of the economy. While relaxation of unduly tight regulations and reduced red tape for businesses may spur near-term US growth through higher investment, dollar appreciation could fuel risks of capital outflows from emerging market and developing economies and drive risk premiums upward. Moreover, an excessive rollback of regulations designed to put limits on risk-taking and debt accumulation may generate boom-bust dynamics for the United States in the longer term, with repercussions for the rest of the world. Downside risks to macro-financial stability may be amplified if compounded by a weaker fiscal outlook or stalled progress on structural reforms. Other supply-side shocks, such as labor force disruptions driven by reductions in migration flows to the United States, may permanently reduce potential output and raise inflation during the adjustment period.

A near-term boost for the US economy emanating from these factors would further underscore the divergent growth patterns across economies. If the adverse effects of tariffs and reduction in the labor force dominate, global activity as well as activity in the United States might be affected negatively in the medium term. Uncertainties are high: the effects of each factor would unfold differently across countries, influenced by trade and financial linkages; policy responses to actions taken by other countries could play out in a variety of ways, including an escalation of retaliatory tariffs; and the impacts of different policy combinations or different magnitudes of policy changes could be quite different.

Inflation dynamics could be shaped in opposite directions by these factors. The magnitude of the inflationary effect from tariffs is especially uncertain. While recent empirical studies find high pass-through to import prices, estimates of pass-through to consumer prices are lower and subject to significant uncertainty. Nevertheless, compared with what took place in earlier episodes of trade disputes, several factors suggest that upside risks to inflation from tariff hikes could be higher this time. First, the global economy is coming out of the most significant inflation surge in recent memory. Inflation expectations, especially in many advanced economies, are farther above the central bank target today than in 2017–21 (Figure 3). Second, the cyclical positions of many major economies are more conducive to higher inflation today than in 2016. Third, retaliation in the form of restrictions on specific, difficult-to-substitute materials or intermediate goods may have an outsized impact on aggregate inflation.

The risk of renewed inflationary pressures could prompt central banks to raise policy rates and intensify monetary policy divergence. Higher-for-even-longer interest rates could worsen fiscal, financial, and external risks. A stronger US dollar, arising from interest rate differentials and tariffs, among other factors, could alter capital flow patterns and global imbalances and complicate macroeconomic trade-offs.

In addition to risks from economic policy shifts, geopolitical tensions could intensify, leading to renewed spikes in commodity prices. The conflicts in the Middle East and Ukraine could worsen, directly affecting trade routes as well as food and energy prices. Commodity-importing countries may be particularly affected, with the stagflation impact of higher commodity prices compounded by an appreciating dollar.

On the upside, global economic activity may enjoy a bounce if incoming governments can renegotiate existing trade agreements and forge new deals. This could relieve uncertainty faster and be much less disruptive to growth and inflation. By boosting confidence, such cooperative outcomes could even support investment and medium-term growth prospects.

Momentum on other policy fronts could also lift growth. Many countries may embrace structural reforms to prevent divergence from their better-performing peers from becoming entrenched. Efforts to increase labor supply, reduce misallocation, enhance competition, and support innovation could raise medium-term growth.

### **Policy Priorities**

Against the backdrop of elevated uncertainty, policies need to rein in short-term risks and rebuild buffers while pushing ahead efforts to lift medium-term growth prospects.

Monetary policy should ensure that price stability is restored while supporting activity and employment. In economies in which inflationary pressures are proving persistent and the risk of upside surprises is on the rise, a restrictive stance will need to be maintained until evidence is clearer that the underlying inflation is sustainably returning to target. In economies in which activity is cooling fast and inflation is on track to durably go back to target, a less restrictive stance is justified.

In either case, fiscal policy should consolidate to put public debt on a sustainable path and restore the space needed for more agile responses. The consolidation path needs to be carefully calibrated to the conditions a particular economy is facing. It should be sizable yet gradual to avoid hurting economic activity, clearly communicated to avoid disruptions in debt markets, and credible to achieve long-lasting results. Adopting a growth-friendly approach and mitigating the adverse impacts on poor individuals could help preserve the economy's potential and maintain public support.

The divergent paths of monetary policy across countries could generate significant movements in exchange rates and capital flows. As laid out in the IMF's Integrated Policy Framework, adjusting policy rates and allowing exchange rate flexibility are advisable for countries with deep foreign exchange markets and low levels of foreign-currency debt. For those with shallow foreign exchange markets and substantial amounts of foreign-currency debt, temporary foreign exchange interventions (provided that foreign reserves are adequate and used prudently), capital flow management measures, macroprudential policies, or some combination of the three could, in some cases, accompany appropriately set monetary and fiscal policies to preserve macrofinancial stability

Beyond the near term, decisive policy action is needed to enhance economic dynamism, boost the supply side, and counter the rising risks to the already-dim medium-term growth prospects. Targeted reforms in labor markets, competition, health care, education, and digitalization can revive productivity growth and attract capital. Active communication to build consensus and continuous engagement with key stakeholders could help policymakers design and effectively implement measures that consider the distributional impact of reform.

Last but not least, multilateral cooperation is vital in containing fragmentation, sustaining growth and stability, and addressing global challenges. Trade policies should be consistent with the legal framework of the World Trade Organization (WTO), as well as being clear and transparent, to reduce uncertainty, lower volatility in markets, and mitigate distortions. Priorities should be given to restoring a fully and well-functioning WTO dispute settlement system, leveling the playing field, and achieving clarity and coherence of the desire among countries for greater resilience within the rules-based multilateral trading system.

## **INDIAN ECONOMY OVERVIEW**

### **Introduction**

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices for Q1 2024-25 is estimated at Rs. 77.31 lakh crores (US\$ 928.9 billion) with growth rate of 9.7%, compared to the growth of 8.5% for Q1 2023-24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-September 2025, India's exports stood at US\$ 211.46 billion, with Engineering Goods (26.57%), Petroleum Products (16.51%) and electronic goods (7.39%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

## Market Size

Real GDP or GDP at Constant (2011-12) Prices for the period Q1 2024-25 is estimated at Rs. 43.64 lakh crore (US\$ 524 billion), against the First Revised Estimates (FRE) of GDP for the year Q1 2023-24 of Rs. 40.91 lakh crore (US\$ 491 billion). The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 9.7 billion for the Q1 2024-25 from US\$ 8.9 billion in Q1 2023-24 or 1.1% of GDP. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

## Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of October 11, 2024, India's foreign exchange reserves stood at US\$ 690.43 billion.
- In 1H 2024, India saw a total of US\$ 31.5 billion in PE-VC investments.
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.

## Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2024-25, capital expenditure took lead by steeply increasing the capital expenditure outlay by 17.1 % to Rs.11 lakh crore (US\$ 133.51 billion) over Rs. 9.48 lakh crore (US\$ 113.91 billion) in 2023-24. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

## INDIAN ELECTRONICS SYSTEM DESIGN & MANUFACTURING (ESDM) INDUSTRY

### Introduction

The Indian Electronics System Design & Manufacturing (ESDM) sector is one of the fastest growing sectors in the economy and is witnessing a strong expansion in the country. The ESDM market in India is well known internationally for its potential for consumption and has experienced constant growth.

Indian manufacturers are attracting the attention of multinational corporations due to shifting global landscapes in electronics design and manufacturing capabilities, as well as cost structures. Companies from all over the world are striving to develop local capacities in India not only to serve the domestic market but also to cater to international markets.

The Electronics System Design & Manufacturing (ESDM) industry includes electronic hardware products and components relating to Information Technology (IT), office automation, telecom, consumer electronics, aviation, aerospace, defence, solar photovoltaic, nano electronics and medical electronics. The industry also includes design-

related activities such as product designing, chip designing, Very Large-Scale Integration (VLSI), board designing and embedded systems.

India witnessed a substantial spike in demand for electronic products in the last few years; this is mainly attributed to India's position as second-largest mobile phone manufacturer worldwide and surge in internet penetration rate. The Government of India attributes high priority to electronics hardware manufacturing, as it is one of the crucial pillars of Make in India, Digital India, and Start-up India programs.

The Electronics System Design & Manufacturing (ESDM) sector plays a vital role in the government's goal of generating US\$ 1 trillion of economic value from the digital economy by 2025. With various government initiatives aiming to boost domestic manufacturing, India has already started witnessing initial movement with increased production and assembly activities across products such as mobile phones and other consumer electronics.

## Market Size

The Indian electronics manufacturing industry is projected to reach US\$ 520 billion by 2025. The demand for electronic products is expected to rise to US\$ 400 billion by FY25 from US\$ 33 billion in FY20. Electronics system market is expected to witness 2.3x demand of its current size (FY19) to reach US\$ 160 billion by FY25. The top products under the ESDM sector with the highest CAGR include IT/OA at 54%, followed by industrial electronics at 38% and automotive electronics at 10%.

In FY24, the exports of electronic goods were recorded at US\$ 29.11 billion as compared to US\$ 23.57 in FY23.

Electronics design segment, growing at 20.1%, was 22% of the ESDM market size in FY19; it is anticipated to be 27% of the ESDM market size in FY25.

India is one of the largest consumer electronics markets in the Asia Pacific Region and is home to considerable talent for electronic chip design and embedded software. India has committed to reach US\$ 300 billion worth of electronics manufacturing and exports of US\$ 120 billion by 2025-26.

Major Government initiatives such as 'Digital India', 'Make in India' and supportive policies including a favourable FDI Policy for electronics manufacturing have simplified the process of setting up manufacturing units in India.

India is the second fastest digitizing economy amongst the 17 leading economies of the world. The Government of India aims to make Electronics Goods amongst India's 2-3 top-ranking exports by 2026. Electronics Goods exports are expected to increase from the projected US\$ 15 billion in 2021-22 to US\$ 120 billion by 2026.

## Investments/ Developments

Investment of Rs. 8,803 crore (US\$ 1.06 billion) has been made under the scheme for promotion of manufacturing of electronic components and semiconductors.

The PLI scheme for large-scale electronics manufacturing has attracted an incremental investment of Rs. 8,390 crore (US\$ 1.01 billion) in June 2024.

The Ministry of Electronics and Information Technology has supported over 3,600 tech startups with a total fund disbursement of Rs. 212 crore (US\$ 25.5 million).

India has made substantial cuts to import duties on mobile phones to enhance exports. In the last financial year, mobile phone exports reached Rs 1.2 lakh crore (US\$ 14.4 billion), and this upward trend is expected to persist.

India emerged as the second-largest manufacturer of mobile phones in the world, with a production value of mobile devices reaching US\$ 49.16 billion in 2024.

Prime Minister Mr. Narendra Modi participated in the event named India's Techade: Chips for Viksit Bharat and laid the foundation stone for three semiconductor projects valued at Rs. 1.25 lakh crore (US\$ 14.97 billion) on 13th March 2024.

Major Government initiatives such as 'Digital India', 'Make in India' and supportive policies including a favorable FDI Policy for electronics manufacturing have simplified the process of setting up manufacturing units in India.

Post-COVID, the Government of India aims to increase India's contribution by around US\$ 400 billion worth of electronics goods including exports worth US\$ 120 billion, which would account for 9-10% of the overall global value chains, from the current supply potential of 1-2%.

Union Budget 2023-24 has allocated Rs. 16,549 crore (US\$ 2 billion) for the Ministry of Electronics and Information Technology, which is nearly 40% higher on year. The budget for FY23 had allocated Rs. 14,300 crore (US\$ 1.73 billion) for the IT ministry.

The Indian startup ecosystem is experiencing a surge over the years, due to rapid technological advancements, increasing internet penetration, growing digital infrastructure, rising startup culture, government initiatives like Digital India, Make in India, and Startup India, as well as a large pool of skilled workforce.

India has witnessed an exceptional surge in the creation and funding of startups as the country has solidified its position as a major global centre for innovation and businesses. However, securing adequate funding remains a significant task for startups, often leading to survival challenges.

In 2023, the funding scenario for tech startups turned bleak amid the global uncertainty, witnessing a 67% YoY plunge in total funding to US\$ 6.0 billion. This decline came after the peak funding levels observed in 2021 (US\$ 24.1 billion) and 2022 (US\$ 18.2 billion), where investors displayed confidence in Indian tech startups. In 2023, the number of deals declined to 824. However, the decline appears to be cyclical than a long-term trend.

STPI Signs MoUs to strengthen tech startup ecosystem: AIC STPINEXT Initiatives (STPINEXT), a special purpose vehicle of Software Technology Parks of India (STPI), an organisation under the Ministry of Electronics and Information Technology (MeitY) has signed two Memorandums of Understanding (MoUs), one with HDFC Bank, and another with Excelpoint Systems India Pvt. Ltd., a niche technology player for fostering entrepreneurship and nurturing tech startups in the country. These partners would play a critical role in supporting and handholding the startups in the growth journey through technical guidance & assistance, mentoring, pitching to investors, funding support, and market connect & access etc.

### Road Ahead

Local electronics design and production are being positively influenced by ongoing domestic consumption, changing dynamics in the global supply chain, and a plethora of policy initiatives to assist indigenous manufacturing in the current period is most advantageous. The smooth implementation of new initiatives and the reversal of restrictive laws will go a long way toward boosting international business confidence in India's business environment and attracting manufacturing investments.

In India, Sony, Samsung, LG Electronics, Panasonic, and other companies are the market leaders in the ESDM sector. Government efforts are concentrated on bridging the digital gap. Projects like "Digital India," "Smart Cities," "ePanchayats," "National Optical Fiber Network," etc. enhanced consumer demand for electronic goods around the nation. India's middle class is rapidly expanding, which has improved the affordability of electronic products. The demand for electronic goods has increased as consumers' preferences for products and devices with smart technology (like smart LED TVs) and inventive designs have changed and disposable incomes have increased. Continuous rise in personal disposable income in India increased to reach 2,410 in FY23, which is directly correlated with consumers' desire to spend money on electronics.

#### SIGNIFICANT DEVELOPMENTS AFTER JUNE 30, 2024

In the opinion of the Board of Directors of our Company, since the date of the stub period as disclosed in this Prospectus, there have not arisen any circumstance that materially or adversely affect or are likely to affect the profitability of our Company or the value of its assets or its ability to pay its material liabilities within the next twelve months.

#### SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our financial condition and results of operations are affected by numerous factors and uncertainties, including those discussed in the section titled "Risk Factors" on page 30. The following is a discussion of certain factors that have had, and we expect will continue to have, a significant effect on our financial condition and results of operations:

- We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations;
- Our Company has not entered into any long-term contracts with our customers and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow would adversely impact our revenues and profitability;

- Our business and profitability heavily rely on the consistent and timely availability of finished products. Any disruption in supply or price volatility of these products can negatively impact our operations and financial health. Additionally, our dependence on third-party suppliers, without firm supply commitments or exclusive arrangements, poses a risk. The loss of any suppliers could adversely affect our business, operational outcomes, and financial condition;
- Our future growth is dependent upon our ability to identify and maintain new products, technologies and customers that achieve market acceptance with acceptable margins;

#### **PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE**

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

**Phase II:** This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

**Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

**The Issue is being made under Phase III of the UPI (on a mandatory basis).**

Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one working day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post- issue BRLM will be required to compensate the concerned investor. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the LMs, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment ("FDI") through press notes and press releases. The DPIIT, issued the Consolidated FDI Policy Circular of 2020 ("FDI Policy"), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee Company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

As per the FDI policy, FDI in companies engaged in the AV Service Providers which is the sector in which our Company operates, is permitted up to 100% of the paid-up share capital of such Company under the automatic route.
